Schultz, NAVAL POSTGRADUATE SCHOOL MONTEREY CA., 1981 The effects of various thermo mechanical treatments on the microstructure and mechanical properties of AISI 52100 steel have been investigated using a combination of optical and transmission electron microscopy in conjunction with standard mechanical testing The response of the as treated material to various hardening and tempering treatments has been determined and compared to that of material processed using a standard commercial technique The results indicate that the thermo mechanical treatments examined refine the microstructure and increase the tensile strength of AISI 52100 steel Using these treatments allows processing of the steel to be accomplished at lower austenitizing temperatures and in shorter times than in currently utilized techniques Additionally the degradation of mechanical properties by time at various tempering temperatures is reduced Author **A comparison of mechanical properties, machinability, and weldability of AISI 4140 with free-machining modifiers** Kendall Lee Read, 1993 *Mechanical Properties of Metals* Pennsylvania State University. Self-Tempering Process to Satisfy ASTM A 706 Standard of Rebar Matthew Allen, 2011 Experiments were conducted to investigate the potential of using a quench and self tempering heat treatment process with AISI 1117 steel to satisfy the mechanical properties of ASTM A 706 rebar A series of quenching tests were performed and the resulting microstructure and mechanical properties studied using optical microscopy microhardness measurement and tensile tests The presence of martensite throughout the samples contributed to the enhanced strength and strain hardening ratio tensile to yield strength of the material The experimental results showed that AISI 1117 is capable of meeting the ASTM standard In addition to the experiments a computer model using the finite difference method and incorporating heat transfer and microstructure evolution was developed to assist in future optimization of the heat treatment process
