Between The Absolute And The Arbitrary Between The Absolute And The Arbitrary:

Between the Absolute and the Arbitrary Catherine Z. Elgin, 1997 In *Between the Absolute and the Arbitrary* Catherine Z. Elgin maps a constructivist alternative to the standard Anglo American conception of philosophy's problematic Under the standard conception unless answers to philosophical questions are absolute they are arbitrary Unless a philosophy is grounded in determinate agent neutral facts it is right only relative to a perspective that cannot in the end be justified Elgin charts a course between the two poles showing how fact and value intertwine where art and science intersect *Between the Absolute and the Arbitrary* cuts a path through philosophy of science philosophy of language and philosophy of art disclosing common problems resources and solutions Elgin highlights the ineliminability of values from the realm of facts the dependence of facts on category schemes and the ways human interests practices and goals affect the categories we contrive Individually the essays in this book contribute to ongoing debates in their respective fields Collectively they constitute a sustained critique of an entrenched conception of the resources available to philosophy and argue for a constructive nominalist alternative Once free of the conceptual stranglehold of traditional dualisms Elgin argues people can contrive a variety of frameworks tailor made to suit evolving interests and ends The results are neither absolute nor arbitrary

Measurement Karel Berka, 1983 For many years Karel Berka has worked at some of the central problems of the theory of the sciences At once a logician a mathematician a careful student of the physical sciences and the social sciences and a sharp but sympathetic critic of the major philosophies of science in this century Berka brings to this treatise on measurement both his technical mastery and his historical sensitivity We appreciate his careful analysis of his predecessors notably Helmholtz Campbell Holder Bridgman Carnap Hempel and Stevens and of his contemporaries such as Brian Ellis and also Patrick Suppes and J L Zinnes The issues to be clarified are familiar but still troubling how to justify the conceptual transition from classification to a metric how to explore ways to provide a quantitative understanding of a qualitative concept indeed how to understand and thereby control the Galilean enthusiasm to measure what is measurable and to try to render measurable what is not so as yet

[Resurrecting Erotic Transgression](#) Anita Monroe, 2016-06-16 *Resurrecting Erotic Transgression* presents a feminist theological methodology based on the work of Julia Kristeva This methodology provides the means for subjecting ambiguity bringing to theology a recognition of the multiplicity of language and identity A method of poetic reading is proposed with a three stage process articulation of the dualities present in and around a focal discourse subversion of these dualities through a range of strategies and the re presentation of the discourse emphasising its ambiguous nature The hermeneutical method of poetic reading is explored in relation to three biblical texts and an image of the otherness of God as whore

Language, Logic and Method Robert S. Cohen, Marx W. Wartofsky, 2012-12-06 Fundamental problems of the uses of formal techniques and of natural and instrumental practices have been raised again and again these past two decades in many quarters and from varying viewpoints We have brought a number of quite basic studies

of these issues together in this volume not linked conceptually nor by any rigorously defined problematic but rather simply some of the most interesting and even provocative of recent research accomplishments. Most of these papers are derived from the Boston Colloquium for the Philosophy of Science during 1973-80, the two exceptions being those of Karel Berka on scales of measurement and A. A. Zinov'ev on a non-traditional theory of quantifiers. Just how intriguing these results or conjectures seem to us may be seen from some brief quotations.

- 1 Judson Webb: the abstract machine concept has many of the appropriate kinds of properties for modelling living reproducing rule-following self-reflecting accident-prone and lucky creatures; the a priori logical results relevant to the abstract machine concept above all Godel's could not conceivably have turned out any better for the mechanist.
- 2 M. L. Dalla Chiara: modal interpretation of quantum logic shows clearly that it possesses a logical meaning which is quite independent of quantum mechanics.
- 3 Isaac Levi: as against Peirce and Popper, infallibilism is consistent with corrigibilism and a view which respects avoidance of error is an important desideratum for science.

Rights in Moral Lives A. I. Melden, 2024-03-29. In *Rights in Moral Lives* A. I. Melden, a distinguished philosopher and moral rights theorist examines important changes that have occurred in our thinking about rights since first mention of them was made in early modern times. His inquiry is framed by an opening question and a concluding response. The question is whether the Greeks had any conception of a moral right. Some argue that they did not on the ground that they had no word for a right. Others claim that they did since they employed certain locutions, the equivalents of which in our language are tied to some notion of a moral right. Melden reviews in detail some of the most important historical conceptions of rights and examines serious questions raised by the fact that there have been striking changes in our thinking about rights. His discussion elucidates the place of moral rights in the broader network of moral concepts along with the role they should play in our moral lives. Among the fundamental issues raised and discussed are the ways in which we are to understand various sorts of rights, the relation of special moral rights to our basic human rights, the now familiar claim that there are animal rights, the nature of moral progress and the dream of a moral science. This title is part of UC Press's *Voices Revived* program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach and impact. Re-reading Saussure Paul J. Thibault, 1997. Saussure's theory of language is generally considered to be a formal theory of abstract sign types and systems separate from our individual and social practices of making meaning. In this challenging book Thibault presents a different view of Saussure. Paying close attention to the original texts including *Cours de linguistique generale* he demonstrates that Saussure was centrally concerned with trying to formulate a theory of how meanings are made.

French Revolution Contributors aim to unravel the constructs of absolutism and monarchism examining how the power and authority of monarchs was defined through contemporary politics and philosophy

Meaning in Law: A Theory of Speech Charles W. Collier, 2009-08-07 Despite widespread admiration for the First Amendment's protection of speech this iconic feature of American legal thought has never been adequately theorized Existing theories of speech proceed on the basis of legal doctrine and judicial decisionmaking social and political philosophy or legal and intellectual history But these are not the disciplines one would most naturally turn to in analyzing speech Meaning in Law A Theory of Speech takes a new and different approach This book develops a general legal theory of speech on the basis of linguistic theory and the philosophy of language The opening chapters retrace the main conceptual stages in the expression of meaning from natural meaning through symbolism to signification Later chapters analyze symbolic speech communication by nonlinguistic means as the key to developing an intention based theory of speech The essential elements of the theory are 1 nonnatural meaning 2 the signaling of intent 3 the recognition of intent and 4 establishing a convention A final chapter applies these insights to the case law of symbolic speech and resolves some basic confusions in the legal literature This analysis proceeds by way of an original distinction between actual conduct in the real world and the ideal conduct described in a statute The former may be described both as communicative and noncommunicative while the latter has already been conceptualized as either communicative or noncommunicative This distinction clears up a major legal quandary how conduct that counts as communication may nevertheless be regulated or prohibited without running afoul of the First Amendment's protection of speech

The Construction of Words Geert Booij, 2018-04-13 This volume focuses on detailed studies of various aspects of Construction Morphology and combines theoretical analysis and descriptive detail It deals with data from several domains of linguistics and contributes to an integration of findings from various subdisciplines of linguistics into a common model of the architecture of language It presents applications and extensions of the model of Construction Morphology to a wide range of languages Construction Morphology is one of the theoretical paradigms in present day morphology It makes use of concepts of Construction Grammar for the analysis of word formation and inflection Complex words are seen as constructions that is pairs of form and meaning Morphological patterns are accounted for by construction schemas These are the recipes for coining new words and word forms and they motivate the properties of existing complex words Both schemas and individual words are stored and hence there is no strict separation of lexicon and grammar In addition to abstract schemas there are subschemas for subclasses of complex words with specific properties This architecture of the grammar is in harmony with findings from other empirical domains of linguistics such as language acquisition word processing and language change

John Locke's Liberalism Ruth W. Grant, 2010-08-15 In this work Ruth W Grant presents a new approach to John Locke's familiar works Taking the unusual step of relating Locke's Two Treatises to his Essay Concerning Human Understanding Grant establishes the unity and coherence of Locke's political arguments She analyzes the Two Treatises as a systematic demonstration of liberal principles of right and power and grounds it in the epistemology set forth in the Essay

Arbitrary Power William Keach, 2015-07-28 This book explores previously unexamined links between the arbitrary as articulated in linguistic theories on the one hand and in political discourse about power on the other In particular William Keach shows how Enlightenment conceptions of the arbitrary were contested and extended in British Romantic writing In doing so he offers a new paradigm for understanding the recurrent problem of verbal representation in Romantic writing and the disputes over stylistic performance during this period With clarity and force Keach reads these phenomena in relation to a rapidly shifting literary marketplace and to the social pressures in Britain generated by the French Revolution the Napoleonic Wars and the class antagonisms that culminated in the Peterloo Massacre The question of what it means to think of language or politics as arbitrary persists through postmodern thinking and this book advances an unfinished dialogue between Romantic culture and the critical techniques we currently use to analyze it Keach's intertwined linguistic and political account of arbitrary power culminates in a detailed textual analysis of the language of revolutionary violence Including substantial sections on Blake Wollstonecraft Wordsworth Coleridge Byron P B Shelley Keats and Anna Jameson Arbitrary Power will engage not only students and scholars of eighteenth and nineteenth century literature but also those interested in critical and linguistic theory and in social and political history

Mathematical Dictionary and Cyclopaedia of Mathematical Science Charles Davies, William Guy Peck, 1865

Saussure's Philosophy of Language as Phenomenology Beata Stawarska, 2015 This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist doctrine associated with the posthumous *Course in General Linguistics* 1916 and to develop a new philosophical interpretation of Saussure's conception of language based solely on authentic source materials This project follows two new editorial paradigms 1 a critical re-examination of the 1916 *Course* in light of the relevant sources and 2 a reclamation of the historically authentic materials from Saussure's Nachlass some of them recently discovered In Stawarska's book this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings the signifier and the signified *la langue* and *la parole* synchrony and diachrony The book therefore puts pressure not only on the validity of the posthumous editorial redaction of Saussure's *course in general linguistics* in the *Course* but also on its structuralist and post-structuralist legacy within the works of Levi Strauss Lacan and Derrida Its constructive contribution consists in reclaiming the writings from Saussure's Nachlass in the service of a linguistic phenomenology which intersects individual expression in the present with historically sedimented social conventions Stawarska develops such a conception of language by engaging Saussure's own reflections with relevant writings by Hegel Husserl Roman Jakobson and Merleau-Ponty Finally she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing of the *Course* as official Saussurean doctrine
