Dumbadze, Suzanne Hudson, 2012-12-06 An engaging account of today's contemporary art world that features original articles by leading international art historians, critics, curators, and artists introducing varied perspectives on the most important debates and discussions happening around the world. Features a collection of all new essays organized around fourteen specific themes chosen to reflect the latest debates in contemporary art since 1989. Each topic is prefaced by an introduction on current discussions in the field and investigated by three essays each shedding light on the subject in new and contrasting ways. Topics include globalization, formalism, technology, participation, agency, biennials, activism, fundamentalism, judgment, markets, art schools, and scholarship. International in scope, bringing together over forty of the most important voices in the field, including Sofía Hernández Chong Cuy, David Joselit, Michelle Kuo, Raqs Media Collective, and Jan Verwoert. A stimulating guide that will encourage polemical interventions and foster critical dialogue among both students and art aficionados.

The Symbolist Roots of Modern Art Michelle Facos, 2017-07-05 With the words "A new manifestation of art was expected, necessary, inevitable," Jean Moris announced the advent of the Symbolist movement in 1886. When Symbolist artists began experimenting in order to invent new visual languages appropriate for representing modern life in all its complexity, they set the stage for innovation in twentieth-century art. Rejecting what they perceived as the superficial, descriptive quality of Impressionism, Naturalism, and Realism, Symbolist artists delved beneath the surface to express feelings, ideas, scientific processes, and universal truths. By privileging intangible concepts over perceived realities and by asserting their creative autonomy, Symbolist artists broke with the past and paved the way for the heterogeneity and penchant for risk-taking that characterizes modern art. The essays collected here, which consider artists from France to Russia and Finland to Greece, argue persuasively that Symbolist approaches to content, form, and subject helped to shape twentieth-century Modernism. Well-known figures such as Kandinsky, Khnopff, Matisse, and Munch are considered alongside lesser-known artists such as Fini, Gyzis, Koen, and Vrubel in order to demonstrate that Symbolist art did not constitute an isolated moment of wild experimentation but rather an inspirational point of departure for twentieth-century developments.

Theories and Documents of Contemporary Art Kristine Stiles, Peter Selz, 2012-09-25 An essential text in the field of contemporary art history, it has now been updated to represent 30 countries and over 100 new artists. The internationalism evident in this revised edition reflects the growing interest in contemporary art throughout the world, from the U.S. and Europe to the Middle East, Asia, Africa, Latin America, and Australia.
