Beyond The Postmodern Mind The Place Of Meaning In A Global Civilization:

Beyond the Postmodern Mind Huston Smith, 2013-11-30 This new edition of acclaimed essays explores sea changes in the relationship between religion and science over the course of Western culture and suggest possible breakthroughs toward reaching an enlightened consciousness **A John Haught Reader** John F. Haught, 2018-11-06 Classical Christian theologies came to expression at a time when the universe seemed relatively fixed and unchanging The otherworldly spiritual instincts of many religions reflected a static vertical and hierarchical understanding of the natural world Today however especially because of developments in the sciences it appears that the universe is still coming into being The writings offered in this book reflect their author's belief that if the universe is unfinished new thoughts about God and all the traditional theological topics are essential to make sense of it all John Haught argues that the universe is best understood according to the metaphor of drama rather than design This means that the most important question in science and theology today is not whether the intricate complexity of life points to a deity or even how God acts in nature but whether the cosmic drama as a whole carries a meaning Unfortunately the devotional life of most religious people on our planet still presupposes an essentially immobile universe Christian instruction for example continues to nurture an otherworldly piety that estranges nature unnecessarily from God The readings in this book however suggest that the ancient Abrahamic hope for the coming of God from out of the future may now become the foundation of a scientifically up to date theology of nature that affirms divine transcendence without robbing nature of its significance **Maynard Adams** Glenn Blackburn, 2009 Maynard Adams 1919 2003 was a profound philosopher and civic humanist at the University of North Carolina Chapel Hill A major intellectual figure of the second half of the twentieth century Adams developed a comprehensive philosophy of civilization that applies to all humanity but has a distinctly Southern dimension **Metaphors and Analogies in Sciences and Humanities** Shyam Wuppuluri, A. C. Grayling, 2022-05-30 In this highly interdisciplinary volume we systematically study the role of metaphors and analogies in mis shaping our understanding of the world Metaphors and Analogies occupy a prominent place in scientific discourses as they do in literature humanities and at the very level of our thinking itself But when misused they can lead us astray blinding our understanding inexorably How can metaphors aid us in our understanding of the world What role do they play in our scientific discourses and in humanities How do they help us understand and skillfully deal with our complex socio political scenarios Where is the dividing line between their use and abuse Join us as we explore some of these questions in this volume **The ^ASeven Pillars of Creation** William P. Brown, 2010-02-26 Brown embarks on an unprecedented tour of the various creation traditions of Scripture seven total in conversation with the natural sciences The result is a groundbreaking work that recaptures the genuine awe that drives the best of scientific and theological inquiry the wonder that unites the psalmist and the scientist **Christian Faith in Our Time** Paul Jersild, 2016-12-19 Jersild responds to a fundamental issue in the theology of the church what is the nature of our language in addressing the mysteries of our faith

such as speaking of God or of the incarnation Advocating a modest theology in facing the mystery of God and acknowledging the impact of postmodern sensibilities he lifts up the metaphorical language of Jesus as the key to a responsible theology Jersild makes his case for a faith based imagination centering on the life death and resurrection of Jesus as God's man who brings a divine redemptive love to the human story Theology does not give us a line in the sand that divides the saved from the lost nor is it the truth that makes all other religions false This is a book for seekers as well as many church members who harbor questions and doubts about the church's theology

Seyyed Hossein Nasr's Ecological Ethics Muzzamel Hussain Imran, 2023-12-02 The book explores the profound insights of Seyyed Hossein Nasr an Islamic scholar on the ecological crisis and its underlying causes Nasr argues that the dominance of scientism which prioritizes contemporary science as the sole source of knowledge has led to a destructive relationship between humans and nature He proposes that restoring the religious perspective is crucial for finding a lasting solution to the ecological problem The book delves into Nasr's comprehensive body of work covering diverse subjects such as Islamic philosophy Islamic art Islamic science Sufism and the ecological crisis Nasr's approach advocates for a holistic and inclusive philosophy that draws inspiration from the perennial philosophy and the principles of Islam He emphasizes the importance of reconnecting with our spiritual heritage and rediscovering reverence for the natural world The book also discusses the relevance and applicability of Nasr's ideas to non Islamic cultures and societies This is a unique study into the work of an important Islamic scholar and ecologist The key audience includes scholars and researchers interested in Islamic philosophy environmental ethics and the intersection of religion and ecology

A Passion for Truth John Huntington, 2018-12-21 A Passion for Truth is an intimate account of John Huntington's interior life as a physical scientist and as a priest In mid career as a scientist he experienced a sudden and undeniable call to the priesthood It became imperative to work to reconcile his two vocations within a single worldview This plunged him into an intense reflection on the authority of physical science and the trustworthiness of religious experience He could not turn away from the question This book is the result The author uncovered a number of fallacies embedded in our Western culture that serve to impede spiritual formation and to discourage the faithful At the root of them all is the idea that it is acceptable to be careless with the truth In liberal academic circles this is called postmodernism in theology it is called relativism in physical science it is called scientism He concluded that if striving for clear thinking is our loving response to our Creator who endowed us with intellect then loose thinking permissive thinking untruth relativism could not be from God It cannot be condoned Huntington wants to awaken in us a passion for truth and in doing so he wants to comfort us and bring us hope

God and Women JKohn D. Garr, 2011-02-16 Since time immemorial women have been the most consistently and universally abused people group on Planet Earth as men in virtually every human culture have systematically unrelentingly and often violently dominated women Unfortunately women of faith have also been virtually bound in chains of submission and gagged by demands for silence since the end of the apostolic era God and Women brings serious biblical and historical

scholarship to bear on the role of women in family society and church in an analysis of God's original intentions for women and for men at the moment when he created humanity Whether you are a woman or a man this book and the other volumes in this series will literally set you free challenging you to think and to act on divine truths from the Hebraic foundations of your faith You will clearly see God's original design and intent for women and you will start tearing down prison walls that have deprived half of God's children of the freedom to pursue his gifts and calling in the family in the society and especially in the community of faith
