Make / Believe John Hartley, 2025-01-23 This book illustrates that mediated popular culture and science based knowledge systems entangled and compromised as both have become are still a robust crucible for system change for the future when they combine forces Planetary crises require responses from everyone This means that collective action is not simply a scientific or political problem It is a problem of culture and media But modern politics journalism and science were not designed for global climate action They've divided humans into competitive and often hostile we and they groups Identity news and knowledge are all weaponized Culture makes groups groups make knowledge and knowledge makes enemies What can be done to prevent global conflict and the drift to war Make Believe turns to popular culture and social media to argue for an alternative storyline While the Great Powers are making new enemies emergent classes led by children are using planetary connectivity to make new worlds A digital planet generates new kinds of strategic stories for pan human action based on difference intersectionality and cooperation for a sustainable Earth system Make Believe shows how alternatives to the Great Game of global contestation are gathering strength in unlikely places among women children lifestyle and pop culture Popular digital media literacy is now a prerequisite for the remediation of the planet **Book Review Index**, 2006

Every 3rd issue is a quarterly cumulation Medicine, mobility and the empire Markku Hokkanen, 2017-11-02 David Livingstone's Zambesi expedition marked the beginning of an ongoing series of medical exchanges between the British and Malawians This book explores these entangled histories by placing medicine in the frameworks of mobilities and networks that extended across Southern Africa and beyond It provides a new approach to the study of medicine and empire Drawing on a range of written and oral sources the book argues that mobility was a crucial aspect of intertwined medical cultures that shared a search for therapy in changing conditions Mobile individuals ideas and materials played key roles in medical networks that involved both professionals and laypeople These networks connected colonial medicine with Protestant Christianity and migrant labour The book will be of value to scholars and students of history and anthropology of colonialism and medicine as well as a wider readership interested in the plural search for health in Africa and globally **Biomedicine**

as a Contested Site Poonam Bala, 2009 This volume presents biomedicine as a site of contestation and conflicts of processes of adaptation accommodation and of resistance in a unique relationship with colonization and social control in a medical encounter that signaled the limits of State control of indigenous populations Medicine and Colonial Identity Bridie

Medicine and Indigenous Societies David Arnold, 1988 In recent years it has become apparent that the interaction of imperialism with disease medical research and the administration of health policies is considerably more complex This book reflects the breadth and interdisciplinary range of current scholarship applied to a variety of imperial experiences in different

continents Common themes and widely applicable modes of analysis emerge include the confrontation between indigenous and western medical systems the role of medicine in war and resistance and the nature of approaches to mental health The book identifies disease and medicine as a site of contact conflict and possible eventual convergence between western rulers and indigenous peoples and illustrates the contradictions and rivalries within the imperial order The causes and consequences of this rapid transition from white man s medicine to public health during the latter decades of the nineteenth and early years of the twentieth centuries are touched upon By the late 1850s each of the presidency towns of Calcutta Bombay and Madras could boast its own asylum for the European insane about twenty native lunatic asylums had been established in provincial towns To many nineteenth century British medical officers smallpox was the scourge of India Following the British discovery in 1901 of a major sleeping sickness epidemic in Uganda King Leopold of Belgium invited the recently established Liverpool School of Tropical Medicine to examine his Congo Free State Cholera claimed its victims from all levels of society including Americans prominent Filipinos Chinese and Spaniards

Dis-ease in the Colonial State

Osaak Olumwullah,2002-07-30 Olumwullah examines disease biomedicine and processes of social change among the AbaNyole of Western Kenya and analyzes the introduction and use of biomedicine as a cultural tool of domination by British colonizers and the AbaNyole s reaction to this therapeutic tradition and its technologies He argues that biomedicine is a tool that the colonizers used to think about the colonized Through an examination of ideas about order and disorder in Nyole cosmology Nyole experiences with new diseases and biomedical practices that were brought to bear on these diseases and how these experiences and the meanings they produced transformed metaphors of disease illness and healing this study argues that just as colonialism was more than a quest for the construction of exploitative political and economic institutions so was biomedicine more than a mere matter of scientific interest based on benevolent neutrality By setting the terms of discourse between the West and the African cultural environment and by insinuating itself at the center of contestation over knowledge between a British science and African ways of knowing colonial biomedical science turned the African body into a site of colonizing power and of contestation between the colonized and the colonizer Narratives about the incidence of diseases like the plague were in themselves experiences of suffering that opened a window to how local knowledge about disease etiology and disease causation was produced among the AbaNyole Instead of being passive victims of capitalistic forces of domination and exploitation the Nyole confronted biomedicine as its assemblage of practices inhabited passed through transformed conserved or escaped the terrain sketched by a pre European Nyole worldview Conventiona expectations about disease as misfortune were altered as colonialism came to be seen and experienced as a form of social death the AbaNyole had never before encountered

Curing Their Ills Megan Vaughan,1991 This is a lively and original book which treats Western biomedical discourse about illness in Africa as a cultural system that constructed the African out of widely varying and sometimes improbable materials Referring mainly to British dependencies in East and Central Africa in

the late nineteenth to the mid twentieth century it draws on diverse sources ranging from court records and medical journals to fund raising posters and jungle doctor cartoons *Curing Their Ills* brings refreshing concreteness and dynamism to the discussion of European attitudes toward their others as it traces the shifts and variations in medical discourse on African illness Among the topics the book covers are the differences between missionary medicine which emphasized individual responsibility for sin and disease and secular medicine which tended toward an ethnic model of collective pathology leprosy and the construction of the social role of the leper and the struggle to define insanity in a context of great ignorance about what the normal African was like and a determination to crush indigenous beliefs about bewitchment The underlying assumption of this discourse was that disease was produced by the disintegration and degeneration of tribal cultures which was seen to be occurring in the process of individualization and modernization This was a cultural rather than a materialist model the argument being that Africans were made sick not by the material changes to their lives and environment but by their cultural maladaptation to modern life The scientific discourse about the biological inferiority of the African traced by one school of scientists to defects in the frontal lobe makes painful reading today it persisted into the 1950s

Medicine and Colonial Engagements in India and Sub-Saharan Africa Poonam Bala, 2018-06-11 This volume examines the various modalities of imperial engagements with the colonized peoples in the former British colonies of India and in sub Saharan Africa Articulated through race gender and medicine these modalities also became colonial sites of desire addressing colonial anxieties ensuing from concerted engagements Focussing on colonial India South Africa Kenya Uganda Swaziland and Zimbabwe this volume brings together essays from eminent scholars to examine the dynamics of colonial engagements and their implications in understanding their role in the dominant discourses of the empire Given its transnational perspective in addressing colonial India and Sub Saharan Africa the book will appeal to historians sociologists and anthropologists and to scholars and students in colonial studies cultural studies history of medicine and world history

From Western Medicine to Global Medicine Mark Harrison, Margaret Jones, Helen M. Sweet, 2009 The hospital has for many years been the symbol of modern scientific medicine Indeed it was in the hospital that modern Western medicine was born But until recently we had little idea of how or why these iconic medical institutions developed outside the Western World *From Western Medicine to Global Medicine* provides the first book length account of the hospital's emergence in Asia Africa and other non Western contexts Its essays examine various facets of hospital medicine from eighteenth century onwards including interaction with indigenous traditions of healing and with economic and political issues during the colonial and post colonial periods An introductory essay provides an overview of the varied trajectories of institutional development taking place outside Europe and North America while the individual contributions from historians anthropologists and sociologists provide important insights into the varied uses and forms which hospitals have taken in non Western contexts

Colonizing the Body David Arnold, 1993 In this innovative analysis of medicine and disease in colonial India David Arnold explores the vital role of the

state in medical and public health activities arguing that Western medicine became a critical battleground between the colonized and the colonizers Focusing on three major epidemic diseases smallpox cholera and plague Arnold analyzes the impact of medical interventionism He demonstrates that Western medicine as practiced in India was not simply transferred from West to East but was also fashioned in response to local needs and Indian conditions By emphasizing this colonial dimension of medicine Arnold highlights the centrality of the body to political authority in British India and shows how medicine both influenced and articulated the intrinsic contradictions of colonial rule In this innovative analysis of medicine and disease in colonial India David Arnold explores the vital role of the state in medical and public health activities arguing that Western medicine became a critical battleground between the colonized and the colonizers Focusing on three major epidemic diseases smallpox cholera and plague Arnold analyzes the impact of medical interventionism He demonstrates that Western medicine as practiced in India was not simply transferred from West to East but was also fashioned in response to local needs and Indian conditions By emphasizing this colonial dimension of medicine Arnold highlights the centrality of the body to political authority in British India and shows how medicine both influenced and articulated the intrinsic contradictions of colonial rule
