Dynamic Process Methodology In The Social And Developmental Sciences:

Dynamic Process Methodology in the Social and Developmental Sciences Jaan Valsiner, Peter C. M.

Molenaar, Maria C.D.P. Lyra, Nandita Chaudhary, 2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes

Cultural Psychology and Its Future Brady Wagoner, Nandita Chaudhary, Pernille Hviid, 2014-04-01

Cultural Psychology is a radical new look in psychology that studies how persons and social cultural worlds mutually constitute one another With the increase of globalization and multicultural exchanges cultural psychology becomes the psychological science for the 21st century Encounters with others fundamentally transform the way we understand ourselves No longer can we ignore questions about how our cultural traditions practices beliefs artifacts and other people constitute how we approach understand imagine and remember the world The Niels Bohr Professorship Lectures in Cultural Psychology series aims to highlight and develop new ideas that advance our understanding of these issues This first volume in the series features an address by Prof Jaan Valsiner which is followed by ten commentary chapters and his response to them In his lecture Valsiner explores what Niels Bohr's revolutionary principle of complementarity can contribute to the development of a cultural psychology that takes time semiotics and human feeling seriously Commentators further discuss how complementarity can act as an epistemology for psychology a number of new methodological strategies for incorporating culture and time into investigations and what cultural psychology can contribute to our understanding of imagination art language and self other relations

Psychology as a Dialogical Science Maria Cláudia Santos Lopes-de-Oliveira, Angela Uchoa Branco, Sandra Ferraz Dourado Castillo Freire, 2020-05-14 This book intends to translate into theoretical methodological and practical language the principles of dialogical psychology Throughout the 19th and 20th centuries

theoretical models in psychology have approached human mind and behavior from a monological point of view a generalizing perspective which ignored the core role of social transactions in the construction of the person and sought to explain psychological functioning only looking inside individuals minds and brains or in mechanist sets of reinforcement contingencies However for the last 40 years critical perspectives within the fields of psychological and sociological theoretical thinking have produced an important epistemological shift towards a new dialogical paradigm within the behavioral and social sciences The contributions in this volume intend to present both the theoretical framework and possible applications of dialogical psychology in different fields of research and practice such as Developmental psychology School and educational psychology Social and personality psychology Education Social work Anthropology Art Psychology as a Dialogical Science Self and Culture Mutual Development will be an invaluable resource to both researchers and practitioners working in the different areas involved in the study and promotion of healthy human development by providing an alternative scientific framework to help overcome the traditional reductionist monological explanations of psychological phenomena

The Emergence of Self in Educational Contexts Giuseppina Marsico, Luca Tateo, 2018-09-27 This book represents the first extensive introduction to the emerging construct of Educational Self The new concept describes a specific dimension of the Self which is elaborated in the course of a person s school life and is reactivated anytime the person is involved in an educational activity whether as a student teacher or parent The Educational Self ES approach was created by the volume editors and is currently being developed at various universities in Europe and Latin America as a way of understanding and operating in educational contexts The book presents the theoretical framework and the empirical developments of the construct paving the way for further applications in education The main locations of the empirical studies are Denmark Italy Brazil Portugal and Colombia but the research network is steadily expanding to other countries so that the concept here can be generalized to different cultural contexts The book addresses a range of contexts and moments in school life The editors introduction presents the construct of ES the opportunities for further theoretical and empirical developments of the concept and its potential applications in educational practices In the remainder of the volume ES is explored for different age groups from children to adolescents to higher education different actors peers teachers parents and their interactions different contexts formal education special institutions school family relationships and different phenomena disruptive behavior special needs value orientation school failure etc All the studies share a qualitative idiographic approach which is characteristic of the perspective of cultural psychology in which the ES construct was elaborated

Siblings in Adolescence Aiden Sisler, Angela Ittel, 2014-11-27 How do brothers and sisters shape one another Siblings in Adolescence provides a comprehensive overview of the most up to date international empirical research on the sibling bond during the critical adolescent years The authors examine how the relationship impacts on adolescent development as well as the effect on and within the family using evidence from behaviour genetics cross cultural studies and research utilizing both

quantitative and qualitative methods The book presents a multi faceted dynamic view of the adolescent sibling relationship drawing on perspectives from sociological psychological and ecological and systems science It introduces a novel theoretical perspective which covers sibling dynamics across various key environments such as their families communities and cultures Parents and siblings will also find useful coverage of the following issues school and life transitions parental separation health illness and disability diverse family experiences Siblings in Adolescence will be indispensable for advanced undergraduate and postgraduate students studying human development and will supplement postgraduate courses for teachers counsellors and social youth and health workers It will also be required reading for all those who work and do research with families and young people

Handbook of Research Methods for Studying Daily Life Matthias R. Mehl, Tamlin S. Conner, 2013-10-01 Bringing together leading authorities this unique handbook reviews the breadth of current approaches for studying how people think feel and behave in everyday environments rather than in the laboratory The volume thoroughly describes experience sampling methods diary methods physiological measures and other self report and non self report tools that allow for repeated real time measurement in natural settings Practical guidance is provided to help the reader design a high quality study select and implement appropriate methods and analyze the resulting data using cutting edge statistical techniques Applications across a wide range of psychological subfields and research areas are discussed in detail

From Dream to Action Tatiana Valério, Ana Clara S. Bastos, Luca Tateo, 2021-01-01 The ubiquitous presence of imaginative work points at its importance among the higher mental functions This collective volume discusses both the social relevance of imagination that cannot be reduced to an inter individual feature and the cultural historical conditions of imagining The authors develop different theoretical and empirical works in which imagining planning anticipating remembering and acting are put in relation with crucial moments of human existence as early as birth and even after death The proposal of this volume emerged during a kitchen seminar session at the III International Seminar of Cultural Psychology in Salvador da Bahia Brazil 2017 The debate revolved around the imaginative capability of human beings and the possibilities to investigate this phenomenon in a new key The awareness that an innovative theoretical and empirical contribution was needed to the understanding of imaginative phenomena in everyday life led to the proposal of the book

From Dream to Action Imagination and Im Possible Futures The book aims to talk to different audiences psychologists sociologists artists teachers and healthcare professionals addressing a variety of life experiences such as imagining alternative futures when facing a terminal illness an adoption a transplant waiting list or the choice to give up your musical instrument mobilize multiple dimensions of human psyche from the basic emotions to the more sophisticated higher mental functions The constant effort is to understand the psychological and sociocultural dynamics of each event and to contribute to the understanding of human imagining in the area of semiotic cultural psychology dialoguing with contributions from all the human and social sciences

The ^AOxford Handbook of Culture and Psychology Jaan Valsiner, 2013-12-15 Now in

paperback The Oxford Handbook of Culture and Psychology is an internationally representative overview of the state of the art in cultural psychology *Identity Development in the Lifecourse* Mariann Märtsin, 2019-11-21 This book offers a unique developmental perspective on identity construction in the context of mobility and transition to adulthood Drawing upon semiotic cultural psychology it embeds identity construction into the processes of meaning making viewing identity as a field of hyper generalised signs that are constantly reconstructed through encounters with social others in cultural worlds and which allow individuals to make sense of themselves in relation to their lived pasts experienced presents and imagined futures Märtsin invites the reader to travel with eight young adults as they embark on their developmental journeys and seek to make sense of issues that matter most to them home adventure and belonging friendships recognition and future planning The book is an invaluable resource for students and researchers interested in understanding the experiences of emerging adults in contemporary globalized world but also for those interested in identity processes from a semiotic cultural and developmental perspective *Biographical Ruptures and Their Repair* Amrei C. Joerchel, Gerhard Benetka, 2014-11-01 Biographical ruptures and their repairs Cultural transitions in development represents the efforts of bridging theoretical methodological and practice oriented issues revolving around the notion of biographical ruptures and their repairs The aim is to bring novel understandings from cultural psychological perspectives to the debate of what it means to be a developing human being in an ever changing world Contrary to mainstream psychology ruptures and repairs are here not necessarily understood as a personal experience which must be overcome through various coping strategies Rather ruptures are understood as experiences which necessarily emerge out of the complex interrelatedness of intra psychological inter personal and societal processes Moving along these different levels of analysis each of the 13 chapters of this book contributes to the general cultural psychological understanding of ruptures from their own particular standpoint The notion of ruptures and their repairs are discussed from such differing standpoints such as classical developmental psychological theories and challenges to such developmental approaches They are discussed in relation to racial interpellations using the documentary method and social representations theory On the object level ruptures are pointed out within popular music videos and from a Ganzheitspsychological approach and others The current book thus does not only represent a conglomerate of various theoretical methodological or practice oriented approaches to ruptures and their repairs each adding with their own expertise to a better understanding of the phenomenon in its whole It also demonstrated a lively debate between leading specialists and practitioners from different disciplines and countries Theoretical and methodological issues as well as ethical and moral ones are each discussed from their own cultural psychological viewpoint This book will interest practitioners scientists and students or anyone who is interested in biographical rupture and their repairs from a cultural psychological developmental social psychological or psychotherapeutic viewpoint **Emerging Methods in Psychology** Seth Surgan, 2017-09-08 The motivation for this volume in the History and Theory of Psychology series is to look across sub

disciplines within psychology and highlight instances where researchers transcended the tendency to think about methodology along traditional lines Contributors have located examples of researchers who built upon existing ideas to create methods true to their interests and theoretical convictions Emerging Methods in Psychology shows how a discipline creates new methods and carves out possibilities that not only generate data but also advance knowledge of human psychological functioning It concentrates on showcasing the possibilities that exist when the researcher focuses on the relationship between theory method and data The question of what kind of expertise is required is a key issue This is particularly the case in psychology where the tradition of standardizing methods over the last century has served to stabilize research questions Knowledge creation is deeply affective and ambiguous rather than the secure accumulation of data by a socially legitimized procedure This innovative volume moves beyond psychology as social engineering into new varieties of social knowledge

Making of The Future Tatsuya Sato,Naohisa Mori,Jaana Valsiner,2016-08-01 Making of the Future is the first English language coverage of the new methodological perspective in cultural psychology TEA Trajectory Equifinality Approach that was established in 2004 as a collaboration of Japanese and American cultural psychologists In the decade that follows it has become a guiding approach for cultural psychology all over the World Its central feature is the reliance on irreversible time as the basis for understanding of cultural phenomena and the consideration of real and imaginary options in human life course as relevant for the construction of personal futures The book is expected to be of interest in researchers and practitioners in education developmental and social psychology developmental sociology and history It has extensions for research methodology in the focus on different sampling strategies

Human Development in the Life Course Tania Zittoun,Jaana Valsiner,Dankert Vedeler,João Salgado,Miguel M. Gonçalves,Dieter Ferring,2013-11-14 Drawing on philosophy the history of psychology and the natural sciences this book proposes a new theoretical foundation for the psychology of the life course It features the study of unique individual life courses in their social and cultural environment combining the perspectives of developmental and sociocultural psychology psychotherapy learning sciences and gerontology psychology In particular the book highlights semiotic processes specific to human development that allow us to draw upon past experiences to choose among alternatives and to plan our futures Imagination is an important outcome of semiotic processes and enables us to deal with daily constraints and transitions and promotes the transformation of social representation and symbolic systems giving each person a unique style or melody of living The book concludes by questioning the methodology and epistemology of current life course studies

Symbolic Universes in Time of (Post)Crisis Sergio Salvatore,Viviana Fini,Terri Mannarini,Jaana Valsiner,Giuseppe Alessandro Veltri,2019-06-18 This book investigates whether how and where the cultural milieu of European societies has changed as a result of the socio economics crisis To do so it adopts a psycho cultural approach which views the cultural milieu as a set of meanings placing the generalized image social actors have of themselves the world events and their relationships in the context of the socio political and institutional environment

including policies By analyzing the changes in cultural milieu and social identity the book develops strategic and methodological guidelines for the design of post crisis policies providing a concept of how the cultural dynamics are associated with certain individual characteristics and specific socio economic phenomena **From Methodology to Methods in Human Psychology** Jaan Valsiner, 2017-07-18 This Brief aims to provide a theoretically innovative introduction to the methodology of the human sciences It presents a new version of methodology as a system of mutually linked acts of creating knowledge where both abstract and concrete features of research are intricately intertwined It shows how the constructions of particular methods that are used in the science of psychology are interdependent with general psychology This is exemplified as the Methodology Cycle The need for an emphasis on the Methodology Cycle grows out of the habitual presentation of methods as if they were independent from the assumptions which they are built upon with the ultimate goal of searching for and creating universal principles Chapters discuss the Methodology Cycle and its uses in various areas of empirical study in psychological functions Featured topics in this Brief include The strict separation between methodology and methods Introspection the primary method of psychology Extrospection the act of introspection turned outwards Generalization and its effect on uniqueness From Methodology to Methods in Human Psychology will be of interest to psychologists undergraduate and graduate students and researchers *How Children Learn from Parents and Parenting Others in Formal and Informal Settings: International and Cultural Perspectives, 2nd Edition* Yvette Renee Harris, Claudio Longobardi, 2020-07-28 For several decades parent child cognitive interaction researchers have acknowledged that children learn cognitive skills in the context of their social and early environments These cognitive skills are often imparted to the children by parents or parenting others in formal or informal settings Thus for example such informal settings as dinner table conversations walks through grocery stores museums or neighborhoods become rich laboratories for children to learn varied cognitive skills ranging from numeracy concepts and language The way in which those learning opportunities are provided by parents structured by parents and scaffolded by parents may well vary depending on culture and other socio demographic variables and may well vary depending on formal or informal settings The aim of this Research Topic is to bring together scholarship from both global north and global south contexts which explores how children learn via parental involvement in formal and informal settings Publisher's note In this 2nd edition the following article has been added Harris YR and Longobardi C 2020 Editorial How Children Learn From Parents and Parenting Others in Formal and Informal Settings International and Cultural Perspectives Front Psychol 11 1026 doi 10 3389 fpsyg 2020 01026 **Proceedings of ECCS 2014** Stefano Battiston, Francesco De Pellegrini, Guido Caldarelli, Emanuela Merelli, 2016-05-03 This work provides a careful selection of extended contributions presented at the 2014 ECCS conference and its satellite meetings reflecting the scope and diversity of both fundamental and applied research areas in the field The ECCS meeting held under the patronage of the Complex Systems Society is an annual event that has become the leading European conference devoted to complexity science

It presents cutting edge research and offers a unique opportunity to study novel scientific approaches in a multitude of application areas ECCS 14 the eleventh annual event took place in Lucca Italy It gathered some 650 scholars representing a wide range of topics related to complex systems research with emphasis on interdisciplinary approaches The editors are leading specialists in the area The book is of great interest to scientists researchers and graduate students in complexity complex systems and networks *From "Modern" to "Postmodern" Psychology: Is There a Way Past?* Barbara
