Beyond Ego Roger N. Walsh,1980 Brings together the writings of key explorers and theorists in the field of transpersonal psychology including Abraham Maslow s delineation of the psychology of well being and Ram Dass s examination of meditation *Beyond Ego* Roger N. Walsh,Frances E. Vaughan,1980-01-01 **The Quest for the Inner Man** Joseph Vrinte,1996 to record and analyse the inner and outer events of the investigation *African American Psychology* A. Kathleen Hoard Burlew,1992-09-04 In an effort to help develop an approach to psychology that is consistent with the African American experience African American Psychology provides a comprehensive overview of African American behavior and personality This collection of classical papers drawn from The Journal of Black Psychology points out that a Eurocentric perspective or orientation is inherent not only in most psychological theory but also in the research methods developed to test psychological theories As such those who try to understand the African American experience must not limit themselves to traditional concepts or research methods The five sections of this volume cover both alternative and theoretical perspectives and new approaches to conducting research the diversity of structure in African American families and the forces affecting them African American children and two controversial but critical areas of study intelligence and cognition **The Antipodes of the Mind** Benny Shanon,2002 This is a pioneering cognitive psychological study of Ayahuasca a plant based Amazonian psychotropic brew Benny Shanon presents a comprehensive charting of the various facets of the special state of mind induced by Ayahuasca and analyzes them from a cognitive psychological perspective He also presents some philosophical reflections Empirically the research presented in this book is based on the systematic recording of the author s extensive experiences with the brew and on the interviewing of a large number of informants indigenous people shamans members of different religious sects using Ayahuasca and travellers In addition to its being the most thorough study of the Ayahuasca experience to date the book lays the theoretical foundations for the psychological study of non ordinary states of consciousness in general *Portals* Lynne Hume,2020-06-29 As Alice in Wonderland discovered cave entrances tunnels spirals and mirrors can transport people to strange worlds where anything is possible Portals investigates how we move beyond the conscious and physical world using our senses into other realities of the spiritual and the divine Portals looks at the techniques used to alter consciousness practised by shamans monks and other religious specialists These include the use of drugs as well as drumming chanting and meditation The book provides a new anthropologically grounded perspective on the wide ranging questions about the realities of human consciousness and mystical spiritual and religious experience *Human Survival and Consciousness Evolution* Stanislav Grof,Marjorie Livingston Valier,1988-01-01 In addition to the apocalyptic prospect of global nuclear destruction there are other dismal scenarios involving resource and environmental issues that are less imminent but still serious in the long term Past analyses seeking remedies have focused on symptoms rather than causes They represent extensions and expressions of the same

philosophies and strategies that created these situations This book brings a fresh and optimistic perspective to the problem area It explores modern consciousness research and transpersonal psychology for practices that accelerate the development of consciousness It covers a wide range from laboratory techniques of experimental psychiatry transpersonal psychotherapies and Jungian psychology to the Oriental and Western mystical traditions **Life** V Janardhana,2021-02-16 It may not be possible to totally understand the mysteries of Life however we will try to go deep into what Life has to offer the natural tendencies of human beings and the way universe present itself to us which may throw some light on the mysteries of Life We will make an attempt to decipher uncertainties of Life and why we are not at peace in spite of the material comfort As one may realize the subject chosen is very vast and there is no single approach or many approaches that can tackle the subject any attempt however exhaustive it may be will fall short of minimum and sufficient conditions to find meaningful answers The humble request is to accept the approach taken to address the subject with the limitations that we all human beings have *ALTERED STATE OF CONSCIOUSNESS AND HEALING THERAPIES* Raul Valverde PhD,2018-07-30 Altered states of consciousness cover transpersonal experiences that involve an expansion of consciousness beyond the limits of time and space Altered states of consciousness allow us to answer the questions of who we really are and why we are here Topics included in this book are Spirituality Intuitions Channeling Neurotechnology and Holotropic therapy **Consciousness, Biofeedback and Neurotechnology** Raul Valverde PhD,2018 An introduction to the technologies that made possible the modern neurotechnology including biofeedback quantum physics quantum biofeedback theory of consciousness and applications of neurotechnology in psychology *Handbook of Multicultural Perspectives on Stress and Coping* Paul T. P. Wong,Lilian C. J. Wong,2007-02-15 Has the developing world developed modern concepts of stress Are coping methods the same around the globe Such questions are not simple to answer and until recently few knew to ask them In recent years Western psychologists have recognized that their prevailing views of psychology do not always translate worldwide and that no culture has a monopoly on either stress or coping The Handbook of Multicultural Perspectives on Stress and Coping was created to address this realization This unique volume moves beyond simple comparisons of behaviors in other countries by clarifying critical concepts in stress and coping analyzing and synthesizing vast amounts of global data and identifying constructs and methodologies necessary for meaningful cross cultural research An international multiethnic panel of forty five contributors presents elegant studies of stress survival and resilience as cultures evolve and countries interact including Personal transformation as a coping strategy Psychological skills that enhance intercultural adjustment Individual versus collectivist values in coping Buddhist and Taoist traditions in coping The cumulative effects of historical environmental and political stressors on nations in the Middle East Specific cross cultural perspectives from Latino American families to Canadian aboriginal peoples to minority university students The editors have assembled a vital store of knowledge raising crucial implications for clinicians working with immigrant international populations and evaluating the current state of
