experience of these fascinating sports *Being Extreme* Bill Gutman, 2014-04-01 As fast paced as a freefall from a roaring airplane as thrilling as a towering jump off a ski slope *Being Extreme* is a fascinating examination of the adrenaline rush of extreme sports Here is a world where living life on the edge is the only option where you are only as good as your last jump and where one false move can take you out of the game permanently From mountain climbing and freestyle motocross to skydiving and snowboarding and beyond in the past decade the world of extreme sports has exploded onto the scene with daredevils attempting acts of athleticism that leave spectators awed and fearful *Being Extreme* explores the motivations and societal impulses behind these high risk lifestyles through interviews with professional athletes and recreational enthusiasts as well as with psychiatrists who seek to understand the motivation behind these Big T personalities Authors Gutman and Frederick also explore what heart stopping sports are around the next curve because in a world where the rush is everything everyone is always upping their game *Understanding Extreme Sports: A Psychological Perspective* Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme sports with particular attention paid to the examination of motivations for initial participation continued participation effective performance and outcomes from participation References Brymer E Schweitzer R 2017a Phenomenology and the extreme sports experience NY Routledge Brymer E Schweitzer R D 2017b Evoking the Ineffable The phenomenology of extreme sports Psychology of Consciousness Theory Research and Practice 4 1 63 74 Giannoulakis C Pursglove L K 2017 Evolution of the Action Sport Setting In S E Klein Ed Defining Sport Conceptions and Borderlines Lexington Books London 128 146 Patterson I 2002 Baby Boomers and

Phenomenology and the Extreme Sport Experience Eric Brymer, Robert Schweitzer, 2017-03-27 Understanding the motivations behind those who partake in extreme sports can be difficult for some If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one's life then this confusion will continue to exist However an in depth examination of the phenomenology of the extreme sport experience yields a much more complex picture This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death Extreme sports are not necessarily synonymous with risk and participation may not be about risk taking Participants report deep inner transformations that influence world views and meaningfulness feelings of coming home and authentic integration as well as a freedom beyond the everyday Phenomenologically these experiences have been interpreted as transcendent of time other space and body Extreme sport participation therefore points to a more potent life enhancing endeavour worthy of further investigation This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk taking the death wish and the concept of No Fear in extreme sports and repositions the experience in a previously unexplored manner This is valuable reading for students and academics interested in Sports Psychology Social Psychology Health Psychology Tourism Leisure Studies and the practical applications of phenomenology
