Cracking the Japanese Market James Morgan,1991-04-04 Global business today is played by new rules many of which are being written by the Japanese and their remarkably successful companies Because the Japanese are redefining business as we know it Western companies expecting to profit from the new global marketplace must first learn to compete and succeed against the Japanese in Japan James C Morgan Chairman of Applied Materials Inc the leading supplier of advanced processing equipment to the worldwide semiconductor industry which does about forty percent of its business in Japan and J Jeffrey Morgan who has worked in Tokyo on the inside at Mitsui Co Japan s oldest trading conglomerate contend that apathy and ignorance have prevented many Western companies from capitalizing on the enormous opportunities for business in Japan In this brilliant examination of Japanese markets companies and business practices with special emphasis on the establishment of Applied Materials Japan the Morgans father and son assert that success in the world of Japanese business is determined by two factors technology and relationships Candidly discussing their own mistakes and failures as well as their triumphs the authors provide invaluable insights into the specific challenges facing Western companies in establishing a presence in Japan problems in financing the venture product design and production marketing and distribution and most important creating long term relationships or putting on a Japanese face The extraordinary success of Applied Materials Japan hailed by George Bush on the campaign trail in 1988 as a model for all America is testimony to the valuable lessons to be learned from this book The Morgans provide a clearly written step by step framework for reorienting company thinking revising corporate strategy and revitalizing any organization for world class competitiveness Using vivid examples of Western companies that have both succeeded admirably and failed miserably in Japan **Cracking the Japanese Market** is a straightforward examination of what it takes to compete successfully there and by extension in the world today **Special Bibliography Series** ,1957 **Japan - Restless Competitor** Malcolm Trevor,2013-12-16 In this important new and controversial study about the nature and focus of the Japanese economic agenda the author argues forcefully that the official mind set of leading bureaucrats top politicians and big business makes it virtually impossible for the western industrialized world to do business on an equal footing Put simply it is a question of western free market economics facing Japanese economic nationalism which is by its very nature both an expansive and a protectionist ideology International observers

continue to ask is Japan changing or more forcefully is Japan capable of change. Notions of reform and restructuring are today part of the Japanese lexicon but appear to hold little substance. Trevor argues that any western notion of Japan changing fundamentally i.e. adopting western or Anglo Saxon philosophies is facile, completely unrealistic. This book is for everyone who wonders what motivates Japan's politico-economic system and whether it is changing.

The European Union and Interregionalism Mr Mathew Doidge, 2013-03-28. The European Union and Interregionalism is the most comprehensive study of interregionalism to date, providing a vigorous analysis of its role and functions in the architecture of global governance and of the place of qualitative differences between regional actors in shaping interregional relationships. Regionalism itself is an established phenomenon with regional politics becoming increasingly institutionalised. As a result with the EU as forerunner, regions have begun to exert themselves in the external policy space, developing networks of relations including prominently interregional relations. We have thus seen the emergence of a new governance space at the interregional level, banded on one side by sites of global governance and on the other by governance at the regional level. Important questions challenging the current literature of these interregional structures include: do interregional relationships conform to theoretical expectations and what patterns of engagement and interaction are emerging within the EU's core interregional partnerships and are these replicated elsewhere? Exploring interregionalism beyond the core Europe-Asia partnerships including the network of relations centred on ASEAN, this book should be read by all those engaged in consideration of interregional structures to understand how patterns of EU-centred interregional engagement rather than being *sui generis* are increasingly evident in the broader network of interregional relationships.

Japan Malcolm Trevor, 2001. This controversial study examines Japan's economic nationalism which forms the basis of central government policy i.e. the system in which business and politics are inseparable and which impacts on Japan's relations with the world.

Japanese Industrial Targeting William R. Nester, 2016-07-27. Japan achieved its present economic position by rejecting free trade theory and instead mastering neomercantilist policies which target strategic industries for development with a range of government-sponsored cartels, subsidies, import barriers and export incentives. These policies stimulated an economic growth rate which averaged ten percent before 1973 and five percent since, rates four and two times greater than America's during the same periods. This book analyzes the policy-making process, implementation, successes, occasional shortcomings and challenges posed by Tokyo's neomercantilist policies toward its trade rivals.
