Beyond Acting White Erin McNamara Horvat, Carla O'Connor, 2006-03-09 Why do Blacks underperform in school Researchers continue to pursue this question with vigor not only because Blacks currently lag behind Whites on a wide variety of educational indices but because the closing of the Black White achievement gap has slowed and by some measures reversed during the last quarter of the 20th century The social implications of the persistent educational gap between Blacks and Whites are substantial Black people s experience with poor school achievement and equally poor access to postsecondary education reduces their probability for achieving competitive economic and social rewards and are inconsistent with repeated evidence that Black people articulate high aspirations for their own educational and social mobility Despite the social needs that press us towards making better sense of the gap we are nevertheless limited in our understanding of how race operates to affect Black students educational experiences and outcomes In *Beyond Acting White* we contend with one of the most oft cited explanations for Black underachievement the notion that Blacks are culturally opposed to acting White and therefore culturally opposed to succeeding in school Our book uses the acting White hypothesis as the point of departure in order to explore and evaluate how and under what conditions Black culture and identity are implicated in our understanding of why Black students continue to lag behind their White peers in educational achievement and attainment *Beyond Acting White* provides a response to the growing call that we more precisely situate how race its representations intersectionalities and context specific contingencies help us make better sense of the Black White achievement gap

Acting White Stuart Buck, 2010-05-25 Commentators from Bill Cosby to Barack Obama have observed the phenomenon of black schoolchildren accusing studious classmates of acting white How did this contentious phrase with roots in Jim Crow era racial discord become a part of the schoolyard lexicon and what does it say about the state of racial identity in the American system of education The answer writes Stuart Buck in this frank and thoroughly researched book lies in the complex history of desegregation Although it arose from noble impulses and was to the overall benefit of the nation racial desegregation was often implemented in a way that was devastating to black communities It frequently destroyed black schools reduced the

Confronting Equity Issues on Campus Estela Mara Bensimon,Lindsey Malcom,2023-07-03 How can it be that 50 years after the passage of the Civil Rights Act our institutions of higher education have still not found ways of reducing the higher education gaps for racial and ethnic groups That is the question that informs and animates the Equity Scorecard model of organizational change It shifts institutions focus from what students do or fail to do to what institutions can do through their practices and structures as well as the actions of their leaders and faculty to produce equity in outcomes for racially marginalized populations Drawing on the theory of action research it creates a structure for practitioners to become investigators of their own institutional culture to become aware of racial disparities confront their own practices and learn how things are done on their own turf to ask In what ways am I contributing to equity inequity The Equity Scorecard model differs significantly from traditional approaches to effecting change by creating institutional teams to examine and discuss internal data about student outcomes disaggregated by race and ethnicity The premise of the project is that institutional data acts as a powerful trigger for group learning about inequities in educational outcomes and that the likelihood of improving those outcomes increases if the focus is on those things within the immediate control of the participating leaders and practitioners Numerous institutions have successfully used The Equity Scorecard s data tools and processes of self reflection to uncover and document the behaviors and structures that lead to failure to retain and graduate students from diverse racial and ethnic backgrounds with a history of unequal opportunity and to create the climate for faculty and staff to take ownership of the issues and develop sustainable practices to eliminate racial disparities in academic performance The Scorecard can be used at a small scale to analyze individual courses or programs as well as broader institutional issues This book presents the underlying concept of funds of knowledge for race conscious expertise that informs this process describes its underlying theories defines the attributes needed to achieve equity minded practice demonstrates through examples of implementation what different institutions have learned and what they have achieved and provides a blueprint for action for higher education as a whole For college leaders instructors and support staff who feel the pressure moral or otherwise to close the racial equity gap that their institutions produce year after year this book provides the structure knowledge and tools to do so It is also of value to scholars and students of higher education who have an interest in the study of organizational change

Crossing Segregated Boundaries Dionne Danns,2020-10-16 Scholars have

long explored school desegregation through various lenses examining policy the role of the courts and federal government resistance and backlash and the fight to preserve Black schools However few studies have examined the group experiences of students within desegregated schools Crossing Segregated Boundaries centers the experiences of over sixty graduates of the class of 1988 in three desegregated Chicago high schools Chicago's housing segregation and declining white enrollments severely curtailed the city's school desegregation plan and as a result desegregation options were academically stratified providing limited opportunities for a chosen few while leaving the majority of students in segregated underperforming schools Nevertheless desegregation did provide a transformative opportunity for those students involved While desegregation was the external impetus that brought students together the students themselves made integration possible and many students found that the few years that they spent in these schools had a profound impact on broadening their understanding of different racial and ethnic groups In very real ways desegregated schools reduced racial isolation for those who took part
