

A photograph of a slum street. In the foreground, a young girl with dark hair, wearing a green dress over a white shirt, stands with her back to the camera, looking down a dirt path. The path is littered with debris. On either side of the path are makeshift, multi-story buildings made of various materials like wood, metal, and corrugated metal. Clothes are hanging on lines between the buildings. In the background, more buildings and a few other people are visible under a clear sky.

New Orleans Under Reconstruction Michael Sorkin,Carol McMichael Reese,Anthony Fontenot,2014-05-20 When the levee system protecting New Orleans failed and was overtopped in August 2005 following the arrival of Hurricane Katrina 80 percent of the city was flooded with a loss of 103 000 homes in the metropolitan area At least 986 Louisiana residents died The devastation hit vulnerable communities the hardest the elderly the poor and African Americans The disaster exposed shocking inequalities in the city In response numerous urban plans and myriad architectural projects were proposed Nearly nine years later debates about planning and design for recovery renewal and resilience continue This bold challenging and informed book gathers together a panorama of responses from writers architects planners historians and activists including Mike Davis Rebecca Solnit Naomi Klein Denise Scott Brown and M Christine Boyer and searches for answers to one of the most important questions of our age How can we plan for the urban future creating more environmentally sustainable economically robust and socially equitable places to live A 2014 grant from the Graham Foundation for Advanced Studies in the Fine Arts

supported in part the publication of this book **The Interiors Theory Primer** William Mangold,2025-07-31 In a world where life is increasingly defined by the spaces we inhabit understanding interiors is essential to understanding ourselves The Interiors Theory Primer maps the intellectual terrain of interior design and spatial experience introducing readers to key concepts that shape how people occupy interior spaces Organized into three parts this book begins with foundational concerns such as place identity materiality and atmosphere and then examines the boundaries and expertise of the discipline before turning to critical and emerging topics like biophilia virtuality and social justice Each chapter presents a focused literature review of a major theme in interiors theory supported by key design precedents and suggestions for further reading Drawing on a wide range of scholarship The Interiors Theory Primer offers a coherent framework for understanding interiors as a distinct interdisciplinary field deeply embedded in the human condition Accessible to students useful to professionals and provocative for scholars The Interiors Theory Primer argues that the designed environments in which we live work and gather deserve greater attention not only for their aesthetic and functional qualities but also for their powerful role in shaping contemporary life *Environmental Psychology and Human Well-Being* Ann Sloan Devlin,2025-06-01 Environmental Psychology and Human Well Being Effects of Built and Natural Settings Second Edition provides an understanding on how mental and physical well being is affected by physical environments along with insights on how the design of environments might be improved to support better health outcomes The book s uniqueness emphasizes the impact of particular kinds of environments on humans e g cities therapeutic landscapes schools and thus considers the environment as the driver of behavior rather than starting with human attitudes and values In addition the content reviews the history discusses theoretical constructs research and design and provides up to date research survey findings New content on the effects of the pandemic on work and educational settings including remote options as well as a new chapter on shelters in response to natural disasters is included Provides research based insights on how an environment can impact mental and physical health and well being Integrates core psychological constructs such as territoriality environmental stress privacy social support and perceived control across settings Covers educational settings workplace settings environments for active living housing for the elderly natural settings therapeutic environments correctional facilities the pandemic and more Includes new chapter on shelters in response to natural disasters and the COVID 19 pandemic **Understanding Emergent Urbanism** Sotir Dharmo,2021-08-31 The ideas presented in this book are a conceptual leverage to correct the rigidity of top down practices and bring the real city or the city of everyday life closer to the city of conventional planning Considering self organization as the starting point at the base of complex systems this book tries to understand how specific qualities emerge and evolve from this behavior For this the book discusses new ways of looking at and understanding cities by applying holistic methods and approaches based on the conceptual grounds of quantum fractal and complexity theories The book highlights the fact that the information on how to transform and build a city is contained within the city itself In this

regard some methodological steps to unpack complexities and translate the essential qualities of space into potential generators for city design and planning are provided The book urges courageous experimentation and proposes a methodology where the computational nature of urban phenomena goes along with historic anthropological ideas thus emphasizing the characteristics of a specific reality in a model They do not exclude each other in fact they are part of the unbroken web of wholeness Importantly the proposed methodology supports gradual and natural coevolution process in the city through combining planned and unplanned actions and the involving multiplicity of actors impacting on Urban Planning and Design Practice

Design for Fragility Esther Charlesworth, John Fien, 2022-12-30 The demand is now urgent for architects to respond to the design and planning challenges of rebuilding cities and landscapes being destroyed by civil conflict un natural disasters political instability and poverty The number of people fleeing their homes and being displaced by such conflict now totals almost 100 million Despite the massive human and physical costs of these crises the number of architects planners and landscape architects equipped to work with disaster and development professionals in rebuilding in the aftermath of conflict floods fires earthquakes typhoons and tsunamis remains chronically low Design for Fragility expands the nascent but rapidly growing field of humanitarian architecture by exploring 13 design responses to such conflict and displacement across 11 countries including Australia Bangladesh Fiji India Iran Pakistan and the USA Linked to this displacement is the systemic poverty that often lingers from previous colonial territories and eras in which many of the featured projects in the book are located This book follows Charlesworth's Humanitarian Architecture 15 Stories of Architects Working After Disasters Routledge 2014 which analysed the role for architects in exercising spatial agency while

designing shelter and settlement projects for communities after conflict and disaster Since that time the humanitarian architecture movement has expanded globally with the prominence of design agencies including the MASS Design Group and Architecture Sans Frontières ASF International Design for Fragility analyses this role of spatial agency in architecture by addressing diverse conditions of fragility across 13 built projects from refugee housing in Uganda and an orphanage for teenage girls in Iran to a residential centre in Northern Australia for people with acquired brain injury Each of the projects profiled in this book explore The experiences and perceptions of fragility or precarity that provided a design challenge and directed the particular spatial response The specific typology of the project whether that be a housing health children's or a First Nations project The personal values that influenced the architects to work on humanitarian community projects and how consultation occurred with diverse and often contested project stakeholders The experiences of the design team as well as project managers occupants and donors of the built project exploring what they deemed successful about the project and what if any were its limitations Beautifully designed with over 150 illustrations this practical and inspiring book is for architects landscape architects design educators humanitarian and development aid agencies that are involved or seeking to be part of future disaster mitigation and reconstruction strategies and projects globally

Critical Practices in Architecture Jonathan Bean, Susannah Dickinson, Aletheia Ida, 2020-01-06 This book embraces the idea that in today's complex world multiple emerging perspectives are critical to the design fields the environment and society It also brings authors into conversation to focus on

the built environment from the perspective of critical practice The authors take as a starting point Jane Rendell's ground breaking work which defines critical spatial practice as self reflective modes of thought that seek to change the world In opposition to conventional conceptions of architectural education and work this book reflects how socially engaged architects landscape architects designers urbanists and artists take up critical spatial practice Bridging ideas from multiple countries and approaches to design scholarship each chapter seeks to find places of convergence for the multiple strands that form around themes of practice equality methods theory ethics pedagogy and representation Rendell's foreword and postscript provide context for these themes and suggest a way forward in today's challenging changing times Architectural Conservation in Asia John H. Stubbs, Robert G. Thomson, 2016-11-10 The first comprehensive overview of architectural conservation in Asia Internationally renowned author John Stubbs follows up on the success of his previous volumes Time Honored A Global View of Architectural Conservation and Architectural Conservation in Europe and the Americas Architectural conservation is a rapidly expanding and under researched field in Asia and is international experts are often brought in making the subject of considerable interest to international academics Boxes and case studies by local experts add depth and interest to the authors meticulous research A website with extra information and resources accompanies the series <http://conservebuiltworld.com> Design for Partnerships for Change Sandi Hilal, Merve Bedir, Mette Ramsgaard Thomsen, Martin Tamke, 2023-09-27 Architecture has played a very important role in colonization of the society and the earth and today we have the urgent task to crack the theory and practice of this same Architecture We can achieve this only by working collectively towards reframing concepts that has been at the centre of a dominant universalist western knowledge creation Rethinking and reframing the ideals of community participation commons agency design and land this book puts forward a collective effort to shift the centre of architectural thinking and practice and create as many ways possible to understand our role as architects today We acknowledge unrecognized practices by bringing back everyday life experiences different paths and forms of knowledge production and storytelling that inform our understanding of architecture The book is part of a series of six volumes that explore the agency of the built environment in relation to the SDGs through new research conducted by leading researchers The series is led by editors Mette Ramsgaard Thomsen and Martin Tamke in collaboration with the theme editors Design for Climate Adaptation Billie Faircloth and Maibritt Pedersen Zari Design for Rethinking Resources Carlo Ratti and Mette Ramsgaard Thomsen Eds Design for Resilient Communities Anna Rubbo and Juan Du Eds Design for Health Arif Hasan and Christian Benimana Eds Design for Inclusivity Magda Mostafa and Ruth Baumeister Eds Design for Partnerships for Change Sandi Hilal and Merve Bedir Eds Beyond Shelter after Disaster: Practice, Process and Possibilities David Sanderson, Jeni Burnell, 2013-09-13 Providing shelter after a disaster is recognised as one of the most complex areas of humanitarian relief and recovery Some aid agencies have stopped providing shelter altogether after bad experiences while those that do quickly become engaged in challenges that go far beyond the provision of structures alone

Yet with the number and severity of disasters set to increase due to climate change and rapid urban growth the need for approaches that work has never been greater This book explores the issues in three parts The first Practice looks at lessons from past efforts Part two Process proposes practical and effective people centred approaches Part three considers currently neglected issues such as disability human rights and urban oriented approaches Through practical case studies and academic research Beyond Shelter after Disaster critiques past methods and explores future options for improving practice in one of the most complex areas of post disaster relief and recovery This book was originally published as a special issue in Environmental Hazards Human and Policy Dimensions

Building Theories Franca Trubiano, 2022-11-25 *Building Theories* speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this *Building Theories* argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hebsch Betticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas *Building Theories* considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techné with a dual commitment to fabrica e ratio with a productive return to l'art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in *Building Theories* ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form

Urban Water Systems & Floods D. Proverbs, S. Mambretti, C.A. Brebbia, N. Ursino, 2016-08-31 *Urban Water III* is the proceedings of the 3rd International Conference on the Design Construction Maintenance Monitoring and Control of Urban Water Systems The conference reconvened following its success in 2012 and in 2014 when it was held in the Algarve Portugal These proceedings deal with two main subjects water supply systems and urban drainage Water distribution networks often suffer substantial losses which indicate energy and treatment waste Sewer systems are under relentless pressure due to urbanisation and climate change and the environmental impact caused by urban drainage overflows is related to both water quantity and water quality Most architects and town planners are aware of the importance of the interaction between urban water cycles and city planning and landscaping Specialised computer tools are needed to manage all of these aspects and are

required to respond to the increased complexity of urban water systems Topics such as contamination and pollution discharges in urban water bodies as well as the monitoring of water recycling systems are currently receiving a great deal of attention from researchers and professional engineers working in the water industry Other related topics include Leakage and losses Modelling and experimentation Safety and security of water systems Maintenance and repairs Surface water and groundwater sources Reservoirs Network design Waste water treatment and disposal Combined sewer networks Flood control Storage tanks Environmental impact Domestic and industrial waste water issues In addition to the above the conference discusses legal and regulatory aspects along with more technical problems
