Alan M. Cavanaugh, 2010-05 Short Short Stories for Readers Short of Time is a compilation of 61 ultra short stories two pages or less in length These are in marked contrast to regular short stories that average 12 to 16 pages and may extend to a whopping 30 to 40 pages If you're like the author you're especially open to brief jolts of literature that consume only a few minutes or even less each In our fast paced society economy of words while reading and writing is correspondingly appropriate Snatch a sampling of stories when riding on short duration bus train and car trips waiting for a dentist or physician and maybe even while on a commode A re read of a story may provide an added benefit In this book you will find the short short stories to be highly varied Read about a woman having to learn wildflower names from her fiancée the dwarf planet Pluto's complaint of losing its planet's status a snake fearing woman who prefers her snakes having legs and a nearly 80 year old fiddler worried about contracting AIDS from bad blood during bypass surgery The photographs are meant to

complement the stories But they can be appreciated on their own merits You will note that their titles differ from those of the stories

Beyond the simple contrastive analysis: Appropriate experimental approaches for unraveling the neural basis of conscious experience Jaan Aru, Talis Bachmann, 2015-06-26

Contrasting conditions with and without conscious experience has served consciousness research well However research based on this simple contrast has led to controversies about the neural basis of conscious experience One key reason for these ongoing debates seems to be that the simple contrast between conditions with and without consciousness is not specific for unraveling the neural basis of conscious experience but rather also leads to other processes that precede or follow it Acknowledging this methodological problem implies that some of the previous research findings about the neural underpinnings of conscious experience are actually reflecting the prerequisites and consequences rather than the direct correlates of conscious perception Thus it is required to re evaluate the previous results to find out which of them are telling us anything about the neural basis of consciousness But first and foremost to overcome this methodological problem we need new experimental paradigms that go beyond the simple contrastive analysis or find the ways how some older but well forgotten paradigms may foster a new look at this emerging problem Accordingly this research topic is looking for empirical and theoretical contributions that 1 envision new and suitable experimental approaches to study consciousness that are free from the limitations of the simple contrastive analysis 2 provide empirical data that help to separate the neural correlates of

conscious experience from the prerequisites and consequences of it 3 help to re assess previous research findings about the neural correlates of conscious perception in the light of the methodological problems with the traditional contrastive analysis We hope that the theoretical insights and experimental approaches collected within this Research Topic help us to gain a more refined understanding of the neural basis of conscious experience *Easy English Horror Short Stories* Jenny Goldmann,Bellanova Books,2023-08-06 Learn English the Spooky Way Dare you wander the haunted trails of English learning Within these pages lies a spine chilling collection of 9 tales each crafted to both entertain and educate Join ghostly guides and face otherworldly trials as you enhance your vocabulary comprehension and conversational skills Designed specifically for brave English learners at the A2 B1 2 CEFR level these spooky stories offer more than just frights Quizzes glossaries and discussion questions await you making this journey into the unknown as thrilling as it is rewarding Will you face the mysteries hidden within The adventure is yours to unfold What s Included 9 Engaging Stories Explore diverse horror themes in short stories designed to intrigue and challenge while remaining suitable for all ages Language Level Targeting Crafted for A2 B1 2 CEFR learners ensuring accessible vocabulary and grammar The stories increase in difficulty meaning students can get a sense of advancement by the end of the book Educational Tools Glossaries multiple choice quizzes and discussion questions support comprehension and encourage conversations Community Support Join our special Facebook group to connect with other readers and practice your English in an interactive environment Whether you re a language teacher looking for fresh material or a self learner seeking an adventurous way to enhance your English skills Easy English Horror Stories offers a thrilling and educational experience Grab your copy today and unlock the mysteries of the English language if you dare **Borders and Border Crossings in the Contemporary British Short Story** Barbara Korte,Laura Ma Lojo-Rodríguez,2020-01-02 This book represents a contribution to both border studies and short story studies In today s world there is ample evidence of the return of borders worldwide as material reality as a concept and as a way of thinking This collection of critical essays focuses on the ways in which the contemporary British short story mirrors questions and engages with border issues in national and individual life At the same time the concept of the border as well as neighbouring notions of liminality and intersectionality is used to illuminate the short story s unique aesthetic potential The first section Geopolitics and Grievable Lives includes chapters that address the various ways in which contemporary stories engage with our newly bordered world and borders within contemporary Britain The second section examines how British short stories engage with Ethnicity and Liminal Identities while the third Animal Encounters and Metamorphic Bodies focuses on stories concerned with epistemological borders and borderlands of existence and identity Taken together the chapters in this volume demonstrate the varied and complex ways in which British short stories in the twenty first century engage with the concept of the border
