In the background, there is a large, dense green bush and a white building with multiple windows. The scene is set outdoors, likely on a residential balcony.

## **Blue Chip Black Race Class And Status In The New Black Middle Class:**

**Blue-chip Black**, 2007 Explores middle class blacks who live in suburbs where poor blacks are not present This book examines the sense of identity that individuals in these groups craft to manage their interactions with lower class blacks middle class whites and other middle class blacks as they seek to reap the benefits of their middle class status **Blue-Chip Black** Karyn R. Lacy, 2007-07-03 Publisher description **Beyond Loving** Amy C. Steinbugler, 2012-09-06 In this book Amy Steinbugler challenges the widespread assumption that interracial intimacy represents the ultimate erasure of racial differences She finds that while interracial partners may be more racially progressive they are not necessarily enlightened subjects who have managed to get beyond race *Beyond Loving* adeptly examines how interracial couples experience race in their everyday lives and how they engage one another to address fundamental questions about the significance of race in contemporary life *Race and Ethnicity in America* John Iceland, 2017-02-14 This book examines patterns and trends in racial inequality over the past several decades Iceland finds that color lines have softened over time as there has been some narrowing of differences across many indicators for most groups over the past sixty years Asian Americans in particular have reached socioeconomic parity with white Americans Nevertheless deep seated inequalities in income poverty unemployment and health remain especially among blacks and to a lesser extent Hispanics The causes for disadvantage for the groups vary ranging from a legacy of racism current discrimination human capital deficits the unfolding process of immigrant incorporation and cultural responses to disadvantage Provided by publisher *Race in the 21st Century* John Hartigan (Jr.), 2015 What is the state of race relations in the U S Are we making progress toward ending racial discrimination and prejudice What exactly does race mean In *Race in the 21st Century* Ethnographic Approaches Second Edition John Hartigan Jr takes an anthropological look at such questions by introducing students to the study of race through qualitative methods In the first text to take an explicitly ethnographic approach Hartigan summarizes and explains the current state of social science knowledge on race in the U S motivating students to think through essential questions about race in relation to their own lives In contrast with many texts *Race in the 21st Century* focuses not on essential differences between racial or ethnic groups but rather on the commonalities Hartigan concentrates on the particular contexts in which people actively engage and respond to racial meanings and identities In this way he encourages readers to think critically about the meaning of race The second edition of *Race in the 21st Century* features a new chapter Postracial America which examines contentious arguments about whether or how race still matters in the U S today It engages students fully in the important question of what postracial America might mean or look like *What Work Means* Claudia Strauss, 2024-06-15 *What Work Means* goes beyond the stereotypes and captures the diverse ways Americans view work as a part of a good life Dispelling the notion of Americans as obsessive workaholics Claudia Strauss presents a more nuanced perspective While some live to work others prefer a diligent 9 to 5 work ethic that is conscientious but preserves time for other interests Her participants often enjoyed

their jobs without making work the focus of their life. These findings challenge laborist views of waged work as central to a good life as well as post-work theories that treat work solely as exploitative and soul-crushing. Drawing upon the evocative stories of unemployed Americans from a wide range of occupations from day laborers to corporate managers, both immigrant and native-born, Strauss explores how diverse Americans think about the place of work in a good life, gendered meanings of breadwinning, accepting financial support from family, friends, and the state, and what the ever-elusive American dream means to them. By considering how unemployment experiences diverge from joblessness earlier, *What Work Means* paves the way for a historically and culturally informed discussion of work meanings in a future of teleworking, greater automation, and increasing nonstandard employment.

**Uninvited Neighbors** Herbert G. Ruffin, 2014-03-28 In the late 1960s, African American protests and Black Power demonstrations in California's Santa Clara County, including what is now called Silicon Valley, took many observers by surprise. After all, as far back as the 1890s, the California constitution had legally abolished most forms of racial discrimination, and subsequent legal reform had surely taken care of the rest. White Americans might even have wondered where the black activists in the late sixties were coming from, because beginning with the writings of Frederick Jackson Turner, the most influential histories of the American West simply left out African Americans or later portrayed them as a passive and insignificant presence. *Uninvited Neighbors* puts black people back into the picture and dispels cherished myths about California's racial history. Reaching from the Spanish era to the valley's emergence as a center of the high-tech industry, this is the first comprehensive history of the African American experience in the Santa Clara Valley. Author Herbert G. Ruffin II's study presents the black experience in a new way, with a focus on how, despite their smaller numbers and obscure presence, African Americans in the South Bay forged communities that had a regional and national impact disproportionate to their population. As the region industrialized and spawned suburbs during and after World War II, its black citizens built institutions such as churches, social clubs, and civil rights organizations, and challenged socioeconomic restrictions. Ruffin explores the quest of the area's black people for the postwar American Dream. The book also addresses the scattering of the black community during the region's late yet rapid urban growth after 1950, which led to the creation of several distinct black suburban communities clustered in metropolitan San Jose. Ruffin treats people of color as agents of their own development and survival in a region that was always multiracial and where slavery and Jim Crow did not predominate, but where the white embrace of racial justice and equality was often insincere. The result offers a new view of the intersection of African American history and the history of the American West.

Shelton, 2024-08-13 Charts the changing dynamics of religion and spirituality among African Americans Recent decades have ushered in a profound transformation within the American religious landscape characterized by an explosion of religious diversification and individualism as well as a rising number of nones The Contemporary Black Church makes the case that the story of this changing religious landscape needs to be told incorporating more data as it applies specifically to African Americans Jason E Shelton draws from survey data as well as interviews with individuals from a wide variety of religious backgrounds to argue that social reforms and the resulting freedoms have paved the way for a pronounced diversification among African Americans in matters of faith Many African Americans have switched denominational affiliations within the Black Church others now adhere to historically White traditions and a record number of African Americans have left organized religion altogether in recent decades These changing demographics and affiliations are having a real and measurable effect on American politics particularly as members of the historic Black Church are much more likely than those of other faiths to vote and to strongly support government policies aimed at bridging the racial divide Though not the first work to note that African Americans are not monolithic in their religious affiliation or to argue that there is a trend toward secularism in Black America this book is the first to substantiate these claims with extensive empirical data charting these changing dynamics and their ramifications for American society and politics
