[The Sounding of the Whale](#) D. Graham Burnett, 2022-12-22 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with *The Sounding of the Whale* D. Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research *The Sounding of the Whale* tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below

[Resolved that the United States Federal Government Should Establish an Ocean Policy Substantially Increasing Protection of Marine Natural Resources](#) Julie Jennings, 2004

The Sea Can Wash Away All Evils Kimberley Christine Patton, 2007 Kimberley Patton examines the environmental crises facing the world's oceans from the perspective of religious history Much as the ancient Greeks believed and Euripides wrote that the sea can wash away all evils a wide range of cultures have sacralized the sea trusting in its power to wash away what is dangerous dirty and morally contaminating The sea makes life on land possible by keeping it pure Patton sets out to learn whether the treatment of the world's oceans by industrialized nations arises from the same faith

in their infinite and regenerative qualities Indeed the sea s natural characteristics such as its vast size and depth chronic motion and chaos seeming biotic inexhaustibility and unique composition of powerful purifiers salt and water support a view of the sea as a no place capable of swallowing limitless amounts of waste And despite evidence to the contrary the idea that the oceans could be harmed by wasteful and reckless practices has been slow to take hold Patton believes that environmental scientists and ecological advocates ignore this relationship at great cost She bases her argument on three influential stories Euripides tragedy Iphigenia in Tauris an Inuit myth about the wild and angry sea spirit Sedna who lives on the ocean floor with hair dirtied by human transgression and a disturbing medieval Hindu tale of a lethal underwater mare She also studies narratives in which the sea spits back its contents sins corpses evidence of guilt long sequestered suggesting that there are limits to the ocean s vast salty heart In these stories the sea is either an agent of destruction or a giver of life yet it is also treated as a passive receptacle Combining a history of this ambivalence toward the world s oceans with a serious scientific analysis of modern marine pollution Patton writes a compelling cross disciplinary study that couldn t be more urgent or timely

Under the Banyan Tree Sheldon J. Segal,2003-01-30 Human population growth has been a topic of speculation and spirited debate since the English economist Thomas Malthus predicted that population will increase faster than the food supply with catastrophic results Today even as fertility rates decline on a global scale relentless increases in population and other population driven factors threaten not only the food supply but also the stability of entire regions of the world No single individual has contributed more to our understanding of scientific matters related to human population than Sheldon Segal has Pioneer in contraceptive research and developer of Norplant Segal has orchestrated many of the international clinical trials of new contraceptives in the last quarter century In this one volume Segal examines how population factors impact critical scientific elements of human affairs contraception family planning environmental degradation climate change food and fresh water supply and the threat of newly emerging diseases As we follow Segal from meetings with heads of state and foreign ministers through to his impassioned grassroots efforts to secure suitable funds for impoverished countries we gain a behind the scenes perspective on how individuals and nations juggle humanitarian and scientific concerns with political agendas Informed at every turn by Segal s keen intelligence and humane values *Under The Banyan Tree* skillfully blends engaging narrative with history and analysis providing a dramatic and all encompassing portrait of this most basic of human concerns

Nader's sense of mission is infused in all of his work especially his weekly columns In Pursuit of Justice a collection of Nader's most recent trenchant articles written in the years immediately following the publication of The Ralph Nader Reader Nader addresses a broad array of issues among them corporate crime and power government accountability media control consumer rights healthcare congressional reform nuclear power and energy racial discrimination poverty food and drug safety air and water pollution fair taxation product liability protection union democracy living family wage unfair lending practices community radio industrial hemp banking pension law telecommunications and the importance of character Nader has even sponsored consumer initiatives to reform university governance educational testing daily newspapers women's health care legal services and professional sports all of which are reflected in these sharp and sometimes humorous essays As informative as it is pleasurable to read section after section of In Pursuit of Justice slices through government and corporate propaganda and reveals the corruption bias and injustice that all too often connect politics with big business thereby impeding the pursuit of justice Collecting more than one hundred of his most recent writings In Pursuit of Justice conveys Nader's inimitable sense of both the global political economy and our nation's democratic promise

The New Economy of Nature Gretchen Cara Daily, Katherine Ellison, 2002 Earth's ecosystems forests wetlands coral reefs and the like are among humanity's most precious assets offering such vital services as climate control and water purification So why are they being rapidly destroyed A major reason is that protecting them has been seen as largely a charitable venture and philanthropy isn't up to the job Increasing numbers of environmentally minded people are therefore trying to harness a more potent force self interest to preserve our environmental endowment Theirs is the quest portrayed in The New Economy of Nature In this timely and provocative book Gretchen Daily one of the world's leading ecologists and Katherine Ellison a Pulitzer Prize winning journalist give us an informative look at a new new economy that recognizes the full value of natural systems and the potential profits in protecting them

The Human Shore John R. Gillis, 2022-12-22 Since

before recorded history people have congregated near water But as growing populations around the globe continue to flow toward the coasts on an unprecedented scale and climate change raises water levels our relationship to the sea has begun to take on new and potentially catastrophic dimensions The latest generation of coastal dwellers lives largely in ignorance of the history of those who came before them the natural environment and the need to live sustainably on the world's shores Humanity has forgotten how to live with the oceans In *The Human Shore* a magisterial account of 100 000 years of seaside civilization John R Gillis recovers the coastal experience from its origins among the people who dwelled along the African shore to the bustle and glitz of today's megacities and beach resorts He takes readers from discussion of the possible coastal location of the Garden of Eden to the ancient communities that have existed along beaches bays and bayous since the beginning of human society to the crucial role played by coasts during the age of discovery and empire An account of the mass movement of whole populations to the coasts in the last half century brings the story of coastal life into the present Along the way Gillis addresses humankind's changing relationship to the sea from an environmental perspective laying out the history of the making and remaking of coastal landscapes the creation of ports the draining of wetlands the introduction and extinction of marine animals and the invention of the beach while giving us a global understanding of our relationship to the water Learned and deeply personal *The Human Shore* is more than a history it is the story of a space that has been central to the attitudes plans and existence of those who live and dream at land's end *Appeal to Reason* Craig Aaron, 2018-02-27 In *These Times* the national biweekly magazine of news and opinion has provided groundbreaking coverage of the labor movement the environment feminism grassroots politics minority communities and the media for twenty five years Filled with new writing commissioned specially for this anniversary volume images and text highlights of the last quarter century in the magazine *Appeal to Reason: The First 25 Years of In These Times* showcases contributors to the magazine like Noam Chomsky David Brower and Alice Walker to name just a few But it also asks an important question Where do we go from here For answers *Appeal to Reason* turns to more than twenty leading progressive writers including Barbara Ehrenreich Juan Gonzalez Salim Muwakkil and Robert W McChesney who take a fresh look at the lessons of the past and suggest directions for the future Exploring issues ranging from globalization and criminal justice to the environment and culture *Appeal to Reason* lays a political and intellectual foundation for the debates discussions and movements of the next twenty five years *Feeling the Heat* From the Editors of *E/The Environmental Magazine*, 2005-06-22 For an increasing number of people global warming is not an academic and scientific debate but a matter of survival As the planet warms at a rate of four degrees Fahrenheit per century violent storms are increasing in frequency icebergs are melting sea level is rising species are losing their habitats and temperature records are being broken *Feeling the Heat* consists of chapter length visits by well known authors to actual world hot spots where people are already coping day to day with the consequences of climactic disruption The locations for the book were strategically chosen because each represents a separate and important

global warming impact such as rising tides melting glaciers evolving ecosystems and air pollution Feeling the Heat takes global warming out of the realm of armchair speculation and arcane scientific debate revealing the process of climate change to be ongoing serious and immediate
