

Blue Point Scan Tool Manuals

Ying Liu

Blue Point Scan Tool Manuals:

The Chicago Eye and Emergency Manual Thomas John, 2011-06 This manual is introduced globally to the ophthalmic community with the primary focus on the practicing eye care provider and all those involved in or interested in the management of ocular diseases Ocular management issues are complex and inter related to basic science and to clinical presentations of a large spectrum of ocular diseases Of equal importance is the recognition and diagnosis of the individual patient s ocular disease state Proper diagnosis will then channel the clinician in the correct direction to engage in the optimal management of the ocular condition and thus relieve the patient s signs and symptoms and possibly improve the way the patient sees the world All these clinical activities are often performed within a very narrow time slot with limited chair time for the individual patient It is of paramount importance to maximally utilize this limited time segment to deliver the best possible care to our patients At the same time it is important not to compromise eye care at the expense of speed Hence a clinician often needs the diagnostic and therapeutic reference materials that can be used in a short time to answer his clinical question s With this in mind the text is written in an easy to read quick reference format while at the same time providing an extensive and most comprehensive material that the clinician will find extremely useful Also practical images are inserted throughout the text to complement the process of clinical patient care This book helpful for practising ophthalmologists and students

Manual of Childhood Infection Karina Butler, Andrew Cant, Ron Dagan, Graham Davies, Ronald de Groot, 2016 This manual gives information on the causative organisms epidemiology and clinical features of all important childhood infections It includes guidance on the clinical management of the infections and on steps to be taken to prevent future cases
