It Takes a Storyteller to Know a Storyteller Julia Nikiel,2023-01-23 If it is indeed impossible to think beyond capitalism then capital has become reality If global capitalism organizes reality through the stories it weaves capital is as strong as its fictions If capital is reality and capital is fiction then reality as such is fiction as well It is by reading this fiction for both patterns and inconsistencies that contemporary individuals can challenge global capital and unveil its hypocrisies and it is by fighting fiction with fiction i e projecting new realities such as those in the post millennial novels by William Gibson Douglas Coupland and Dave Eggers that people can imagine the world anew

William Gibson and the Future of Contemporary Culture Mitch R. Murray,Mathias Nilges,2021-03-15 William Gibson is frequently described as one of the most influential writers of the past few decades yet his body of work has only been studied partially and without full recognition of its implications for literature and culture beyond science fiction It is high time for a book that explores the significance and wide ranging impact of Gibson s fiction In the 1970s and 80s Gibson the Godfather of Cyberpunk rejuvenated science fiction In groundbreaking works such as *Neuromancer* which changed science fiction as we knew it Gibson provided us with a language and imaginary through which it became possible to make sense of the newly emerging world of globalization and the digital and media age Ever since Gibson s reformulation of science fiction has provided us not just with radically innovative visions of the future but indeed with trenchant analyses of our historical present and of the emergence and exhaustion of possible futures Contributors Maria Alberto Andrew M Butler Amy J Elias Christian Haines Kylie Korsnack Mathias Nilges Malka Older Aron Pease Lisa Swanstrom Takayuki Tatsumi Sherryl Vint Phillip E Wegner Roger Whitson Charles Yu

Profiles and Plotlines Katherine

D. Johnston, 2023-06-06 Algorithmic data profiling is not merely an important topic in contemporary fiction it is an increasingly dominant form of storytelling and characterization in our society These stories are being told inside boardrooms banks presidential briefings police stations advertising agencies and technology companies And so to the extent that data has taken up storytelling literature must take up data After all profiling coincides with character development surveillance reflects point of view and data points track as plot points in tales of the political economy In Profiles and Plotlines Katherine Johnston engages this energetic reformation of contemporary literature to account for a society and economy of frenetic counting Fiction and poetry are capable of addressing precisely that for which algorithms cannot or do not account the effects of profile culture the ideologies and supposed truth power of data the gendered and racialized dynamics of watching and being watched and the politics of who counts and what gets counted Johnston analyzes prescient work by contemporary authors such as Jennifer Egan Claudia Rankine Mohsin Hamid and William Gibson to probe how the claims of data surveillance serve to make lives seem legible intelligible and sometimes even expendable *Semiotic Bulimia* Douglas Shoback, 2019-10-11 In Trump's America our identities are in constant flux Fake News gaslighting lies attacks on the Fourth Estate all cogs of an empty signifier held by the Brand in 21st century Capitalism Meaning is in constant fluctuation a truth becoming a lie in just a second Our identities changing daily by the bombardment of 24 hour news cycles and the constant flow of information from our mobile devices What is true and what is false anymore In the 70's 80's and 90's we were certain about things We knew what was true and what was false or so we thought We bought physical products that remained the same every day Fireball Mountain would always be impossible to play Nintendo and Sega gave us mascots we could rely on Then something happened The world tilted a bit And things became strange and full of multiple meanings The internet and the iPhone gave the masses access to all the knowledge of humanity We thought we'd become enlightened We thought with this access to all the information ever recorded throughout human history people would make intelligent choices Opinions would be critically examined The marketplace of ideas would be flooded But no We got Facebook We got Twitter We got 4Chan and 8Chan and trolls and misinformation and augmented reality so real yet not We became sponges for lies And our identities changed The world's meaning changed 2016 happened And we needed guidance from the past And so we looked to our authors who try to predict the future This is what happened Science Fiction SF author William Gibson has never been one to shy away from the problems of semiology in late Capitalism and post modernism His novels deal extensively with the functions of the technological apparatus in relation to human bodies Bodies in Gibson novels are depicted as flesh machines a fusing of biological and mechanical parts creating something not quite human but not without humanity a cyborg With Gibson The natural world becomes attached to and defined by the gray starkness of technology In turn these worlds are controlled by omnipotent corporations and hyper Capitalistic enterprises suspended between the identifiable natural human and the controlled and created identity of the machine Because the natural human identity within Gibson novels is

intertwined with the created technological identity these novels inherently focus upon a crisis of representation in a world with no definitive separation between technological meaning and natural meaning Gibson novels focus upon the crisis of meaning within a world overwhelmed by an innumerable amount of signs In the 21st century where the sign has become the main method of establishing an identity it is increasingly important to see where these signs are created and more importantly where the signification comes from And in 2019 the sign and signifier both come from late Capitalism corporations No longer is a product the focus of the Corporation but the lifestyle of those who consume the product Just like a William Gibson model those of us living in the second decade of the 21st century have become cyborgs branded by Corporations our lifestyles determined by the branded ideologies created by these Corporations Our identities reliant upon modern Capitalist methods of branding We are cyborgs of the 21st century both through technological enhancement and in identity formation Our bodies the playground of the sign the signifier controlled by the company or the CEO Or even information itself

Business Review Weekly, 2006 **Rethinking Fiction after the 2007/8 Financial Crisis** Mirosław Aleksander Miernik, 2021-03-29 This book provides insight into the impact the 2007-8 financial crisis and subsequent Great Recession had on American fiction. Employing an interdisciplinary approach which combines literary studies with anthropology, economics, sociology, and psychology, the author attempts to gauge the changes that the crisis facilitated in the American novel. Focusing on four books: Elizabeth Strout's *My Name Is Lucy Barton*, Philipp Meyer's *American Rust*, Sophie McManus's *The Unfortunates*, and William Gibson's *The Peripheral*, the study traces how they present such issues as poverty, wealth, equality, distinction, opportunity, and how they relate both to traditional criticisms of consumer culture and the US economy, particularly those issues that have received more attention as a result of the crisis. It also tackles the issue of genre and interpretation in this period as well as what methods the analyzed novels employ in order to highlight the decreasing social mobility of Americans. **Miniature Lives** Michelle Gleeson, 2016-03 We can't avoid insects. They scurry past us in the kitchen, pop up in our gardens, or are presented to us in jars by inquisitive children. Despite encountering them on a daily basis, most people don't know an aphid from an antlion, and identifying an insect using field guides or internet searches can be daunting. *Miniature Lives* provides a range of simple strategies that people can use to identify and learn more about the insects in their homes and gardens. Featuring a step-by-step illustrated identification key and detailed illustrations and colour photographs, the book guides the reader through the basics of entomology, the study of insects. Simple explanations, amusing analogies, and quirky facts describe where insects live, how they grow, and protect themselves, the clues they leave behind, and their status as friend or foe in a way that is both interesting and easy to understand. Gardeners, nature lovers, students, teachers, and parents and grandparents of bug-crazed kids will love this comprehensive guide to the marvellous diversity of insects that surrounds us and the miniature lives they lead.
