Money Without Boundaries Thomas J. Anderson, 2019-08-27 Discover how blockchain will facilitate a new currency that will transcend space and time Largely inspired by The Denationalization of Money by Fredrich Hayek Money Without Boundaries ideological foundation is also inspired by economists and thought leaders like Milton Friedman and Irving Fisher advancements in capital markets over the past 50 years and the convergence of old and new technologies Author Thomas J Anderson explains how blockchain acts as the filter and the glue making it all possible Compared with other currencies blockchain managed money markets are more straightforward and transparent It is easier to monitor understand and assess the quality of their full faith and credit Money Without Boundaries shows how not only money but also the process of borrowing and lending will evolve to be conducted in a

100% trusted secure transparent open architecture environment Anderson begins with a history of money and discusses the rise of cryptocurrency concluding with a comparison of decentralized money markets to all other alternatives Money without Boundaries Demonstrates how blockchain technology allows full transparency Explains how blockchain makes it possible for money to be fully commoditized Explains how this fully market based decentralized self regulating system has vast implications throughout the global financial system Shows how everyone will benefit when they have the opportunity to compete on full faith in credit If you are interested in cryptocurrency money monetary theory or understanding how the applied uses of blockchain technology will change your everyday life this is essential reading

**Posthuman Property and Law** Jannice Käll, 2022-07-28 This book analyses the phenomenon of digitally mediated property and considers how it problematises the boundary between human and nonhuman actors The book addresses the increasingly porous border between personhood and property in digitized settings and considers how the increased commodification of knowledge makes visible a rupture in the liberal concept of the property owning free person Engaging with the latest work in posthumanist and new materialist theory it shows how property as a concept as well as a means for control changes fundamentally under advanced capitalism Such change is exemplified by the way in which data as an object of commodification is extracted from human activities yet is also directly used to affectively control or nudge humans Taking up a range of human engagements with digital platforms and coded architectures as well as the circulation of affects through practices of artificial intelligence that are employed to shape behaviour the book argues that property now needs to be understood according to an ecology of human as well as nonhuman actors The idea of posthuman property then offers both a means to critique property control through digital technologies as well as to move beyond the notion of the self owning object owning human Engaging the most challenging contemporary technological developments this book will appeal to researchers in the areas of Law and Technology Legal Theory Intellectual Property Law Legal Philosophy Sociology of Law Sociology and Media Studies
