Blood Oil Tyrants Violence And The Rules That Run The World:

Blood Oil Leif Wenar, 2015-12-02 Natural resources like oil and minerals are the largest source of unaccountable power in the world. Petrocrats like Putin and the Saudis spend resource money on weapons and oppression; militants in Iraq and in the Congo spend resource money on radicalization and ammunition. Resource-fueled authoritarians and extremists present endless crises to the West, and the source of their resource power is ultimately ordinary consumers doing their everyday shopping at the gas station and the mall. In this sweeping new book, one of today's leading political philosophers, Leif Wenar, goes behind the headlines in search of the hidden global rule that thwarts democracy and development and that puts shoppers into business with some of today's most dangerous men. Wenar discovers a rule that once licensed the slave trade and apartheid and genocide, a rule whose abolition has marked some of humanity's greatest triumphs, yet a rule that still enflames tyranny and war and terrorism through today's multi-trillion-dollar resource trade. *Blood Oil* shows how the West can now lead a peaceful revolution by ending its dependence on authoritarian oil and by getting consumers out of business with the men of blood. The book describes practical strategies for upgrading world trade for choosing new rules that will make us more secure at home, more trusted abroad, and better able to solve pressing global problems like climate change. *Blood Oil* shows citizens, consumers, and leaders how we can act together today to create a more united human future.

Blood Oil Leif Wenar, 2016 In this sweeping book, one of today's leading political philosophers, Leif Wenar goes behind the headlines in search of the hidden global rule that thwarts democracy and development and that puts shoppers into business with some of today's most dangerous men. **Democracy and Empire** Inés Valdez, 2023-09-07 Reconceptualizes central notions in political theory to make sense of the systems of imperial, popular sovereignty and self-determination.

The Other World Craig Arceneaux, Anika Leithner, Sara Lopus, Benjamin F. Timms, Shanruo Zhang, 2024-11-29 Now in its eleventh edition, *The Other World* combines thematic and area studies approaches to explore contemporary global issues. Accessible and interdisciplinary, this textbook offers political, economic, social, and historical analyses of Latin America, Sub-Saharan Africa, North Africa, and the Middle East and Asia. *The Other World* highlights similarities and differences as it recognizes the challenges and opportunities offered by globalization. New to the eleventh edition: A new co-author, Sara Lopus, whose academic training at the intersection of social, agricultural, and environmental problems enhances the interdisciplinary appeal of the book. A new concluding chapter on *Other World* features in Western countries and postcolonialism. Revamped sections on Perspectives on Globalization with cases on creative responses to sustainability, sovereignty, and cultural change issues. Discussion of new topics including cybersecurity and cyberwarfare, the impact of supply chain bottlenecks, food politics, and issues of global obesity, the rise of zoonotic diseases and pandemics such as COVID-19, new regional diplomacy in the Middle East, protest and political change in Latin America, refugee flows, the emergence of ageing populations, and many more. *The Other World* is the perfect introductory text to the world's developing regions and their political challenges, a must-buy for

courses in comparative politics politics of the developing world and introduction to international studies *The Misery of International Law* John Linarelli, Margot E. Salomon, M. Sornarajah, 2018 Poverty inequality and dispossession accompany economic globalization Bringing together three international law scholars this book addresses how international law and its regimes of trade investment finance as well as human rights are implicated in the construction of misery and how international law is producing reproducing and embedding injustice and narrowing the alternatives that might really serve humanity Adopting a pluralist approach the authors confront the unconscionable dimensions of the global economic order the false premises upon which they are built and the role of international law in constituting and sustaining them Combining insights from radical critiques political philosophy history and critical development studies the book explores the pathologies at work in international economic law today International law must abide by the requirements of justice if it is to make a call for compliance with it but this work claims it drastically fails to do so In a legal order structured around neoliberal ideologies rather than principles of justice every state can and does grab what it can in the economic sphere on the basis of power and interest legally so and under colour of law This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others It studies how a set of principles in the form of a New International Economic Order NIEO that could have laid the groundwork for a more inclusive international law without even disrupting its market orientation were nonetheless undermined As for international human rights law it is under the terms of global capitalism that human rights operate Before we can understand how human rights can create more just societies we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection This book challenges conventional justifications of economic globalization and eschews false choices It is not about whether one is for or against international trade foreign investment or global finance The issue is to resolve how if we are to engage in trade investment and finance we do so in a manner that is accountable to persons whose lives are affected by international law The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law and not merely as a discrete benevolent response to it *The Law of Political Economy* Poul F. Kjaer, 2020-04-23 Political economy themes have directly and indirectly been a central concern of law and legal scholarship ever since political economy emerged as a concept in the early seventeenth century a development which was reinforced by the emergence of political economy as an independent area of scholarly enquiry in the eighteenth century as developed by the French physiocrats This is not surprising in so far as the core institutions of the economy and economic exchanges such as property and contract are legal institutions In spite of this intrinsic link political economy discourses and legal discourses dealing with political economy themes unfold in a largely separate manner Indeed this book is also a reflection of this in so far as its core concern is how the law and legal scholarship conceive of and approach political economy issues Power Grab Paasha

Silenced Resistance Joanna Allan,2019-04-09 Spain s former African colonies Equatorial Guinea and Western Sahara share similar histories Both are under the thumbs of heavy handed postcolonial regimes and are known by human rights organizations as being among the worst places in the world with regard to oppression and lack of civil liberties Yet the resistance movement in one is dominated by women the other by men In this innovative work Joanna Allan demonstrates why we should foreground gender as key for understanding both authoritarian power projection and resistance She brings an ethnographic component to a subject that has often been looked at through the lens of literary studies to examine how concerns for equality and women s rights can be co opted for authoritarian projects She reveals how Moroccan and Equatoguinean regimes in partnership with Western states and corporations conjure

a mirage of promoting equality while simultaneously undermining women's rights in a bid to cash in on oil minerals and other natural resources This genderwashing along with historical local indigenous and colonially imposed gender norms mixed with Western misconceptions about African and Arab gender roles plays an integral role in determining the shape and composition of public resistance to authoritarian regimes

The Pivotal Generation Henry Shue, 2022-01-11 We all recognize that climate change is a supremely important issue of our time which requires both trans national and trans generational collaboration and shared responsibility What we haven't yet fully appreciated argues political philosopher Henry Shue are the ethical considerations surrounding the fact that the next one or two decades will determine whether climate change which already has led us to dangerous effects will surge into inescapably disastrous effects The people alive today thus represent a pivotal generation in human history For the past two centuries humans have undermined our climate at an increasing rate in ways that the present generations are the first to fully understand and the last to be able to reverse But our responsibility for decisive and immediate action rests on three special features of the relation of our present to the future that many have failed to realize 1 future generations face dangers greater than ours even if we act robustly 2 the worsening dangers for future generations are currently without limit and 3 a less robust effort by us is likely to allow climate change to pass critical tipping points for severely worse and potentially unavoidable future dangers Shue a renowned scholar of ethics politics and international relations who has been studying the ethics of climate change for the last two decades guides us through what our ethical responsibilities to others are both across

the world but especially over time and what those commitments require us to do in addressing the climate change crisis now and forcefully
