*The Theological and the Political* Mark Lewis Taylor, 2011 Princeton s Mark Lewis Taylor has always worked at the intersection of the political and theological Now in this intense and exciting work he explores in a systematic way how those two dimensions of human reality can be conceived anew and together Taylor argues that the decline of political discourse the justification of torture and preemptive war mass incarceration the misuse of religion to justify atrocity and most especially the sheer weight of suffering in the world all these developments urge us to reconceive theology itself In conjunction with the latest insights of political theory decolonial thought and spectral theories in contemporary philosophy Taylor suggests that the political is the context of the theological and a realm in which we can discern beyond simple categories of transcendence and immanence a

transimmanence that is theologically illuminative and politically liberating Publisher description Economics, Religion and Happiness Vani Kant Borooah, 2023-10-09 Most books on happiness are concerned with answering in their diverse ways a basic question how should I live Such books assume however that the path to happiness lies entirely within one's control Happiness is simply a matter of doing certain things and refraining from doing certain other things This book however takes a different view It is that happiness is not always within our control but instead prey to the attitudes and actions of others Following Jean Paul Sartre's aphorism hell is other people the broad theme of this book is that unhappiness is other people In the language of economics other people through their attitudes and actions create externalities often negative which serve to make us unhappy The instruments for creating such externalities are intolerance and feelings of envy superiority This book expands on this theme in respect of three areas religion money and prejudice It is fair to say the existing unhappiness literature particularly in economics does not take many of these externalities into account Instead the focus is firstly on identifying the factors internal to oneself that contribute to personal happiness and secondly on measuring the relative strength of their contribution By contrast an analysis of the externalities that people impose upon others lies at the heart of this book Economics Religion and Happiness will primarily appeal to students academics and researchers across economics psychology philosophy and sociology and will also find an audience among those interested in exploring issues related to happiness in greater depth

God After the Church Lost Control Jan-Olav Henriksen, Pal Repstad, 2022-07-21 This book combines insights from sociology of religion and theology to consider the fundamental changes that have taken place in how people think about God in contemporary Western society It can be said that God has become irrelevant for many people often as a result of well grounded ethical critique of churches Here the authors argue for the necessity of rethinking God talk in a pluralist and changing context and for thinking critically about hegemonic ways of speaking about God from a moral and experiential perspective not only from the point of view of abstract theology Drawing on empirical material from a Norwegian setting the book advocates a critical constructive theology with a notion of God that takes human experience and social change seriously It depicts a God who is an enabler of moral maturity rather than an authoritarian moral instructor a God who is on the side of the marginalized and poor and a challenge to unjust hierarchies

**Does Terrorism Work?** Richard English, 2019-02-21 Terrorism is one of the most significant security threats that we face in the twenty first century Not surprisingly there is now a plethora of books on the subject offering definitions of what terrorism is and proffering advice on what causes it and how states should react to it But one of the most important questions about terrorism has until now been left remarkably under scrutinized does it work Richard English now brings thirty years of professional expertise studying terrorism to the task of answering this complex and controversial question Focussing principally on four of the most significant terrorist organizations of the last fifty years al Qaida the Provisional IRA Hamas and ETA and using a wealth of interview material with former terrorists as well as those involved in counter terrorism he argues that we need a far more honest understanding of the degree to which terrorism actually works as well as a more nuanced insight into the precise ways in which it does so Only then can we begin to grapple more effectively with what has become one of the most challenging and eye catching issues of our time *Early Trauma, Loneliness, the Indoctrinated Self, and the Need for Compassionate Empathy* Thomas G. Arizmendi, 2024-02-14 This book focuses on some of the detrimental effects of early trauma by detailing the particular outcomes of loneliness and heightened vulnerability to indoctrination These stress states are present at virtually pandemic levels In terms of loneliness the author goes well beyond the mental health consequences outlining the numerous medical conditions it may lead to such as heart disease immune system problems and many others Indoctrination processes are present in all walks of life no one is immune In extreme states of indoctrination such as in fundamentalism violence may be the result as we have seen with many wars and acts of terrorism Overall efforts to indoctrinate often play a huge role in forming our divided world Two notions in this book are unique the focus on environmental sensitivity as a critical force in determining levels of vulnerability to stressful events and the emphasis on compassionate empathy to repair unmet needs stemming from trauma *Exchanging Terrorism Oxygen for Media Airwaves: The Age of Terroredia* Eid, Mahmoud, 2014-03-31 Terroredia is a newly coined term by the editor Dr Mahmoud Eid to explain the phenomenal yet under researched relationship between terrorists and media professionals in which acts of terrorism and media coverage are exchanged influenced and fueled by one another Exchanging Terrorism Oxygen for Media Airwaves The Age of Terroredia provides a timely and thorough discussion on a wide range of issues surrounding terrorism in relation to both traditional and new media Comprised of insights and research from leading experts in the fields of terrorism and media studies this publication presents various topics relating to Terroredia understanding of terrorism and the role of the media terrorism manifestations and media representations of terrorism types of terrorism and media stereotypes of terrorism terrorism tactics and media strategies the war on terrorism the function of terrorism and the employment of the media new terrorism and new media contemporary cases of terrorist media interactions the rationality behind terrorism and counterterrorism as well as the responsibility of the media This publication is of interest to government officials media professionals researchers and upper level students interested in learning more about the complex relationship between

Hebrew Bible scholars reflect on texts of violence in the Hebrew Bible as well as their often problematic reception history Authoritative texts and traditions can be rewritten and adapted to new circumstances and insights Texts are subject to a process of change The study of the ways in which these authoritative biblical texts are produced and or received in various socio historical circumstances discloses a range of theological and ideological perspectives In reflecting on these issues the central question is how to allow for a given text s plurality of possible and realised meanings while also retaining the ability to form critical judgments regarding biblical exegesis This volume highlight that violence in particular is a fruitful area to explore this tension      **God, Religious Extremism and Violence** Matthew Rowley, 2024-03-21 Why do religious militants think their actions are right or righteous What keeps me from acting like them Why do some religious persons act on their beliefs in charitable inspiring and deeply humane ways Is secularism the solution to religious violence or is it part of the problem This Element explores the vexed issue of violence done in the name of God looking at the topic through the lens of peace and conflict studies religious studies and historical studies The beliefs of various communities religious and secular are explored looking at how convictions inhibit and enable violence This Element aims to foster a deeper and more nuanced understanding of the promises and perils of religion so that readers can better respond to a world filled with violence

Moon, 2022-04-01 The COVID 19 era will be remembered not only for the tragic global public health crisis but also for the continued police violence against persons of color the courageous activism that continues to rise up to confront racialized violence in all its forms and the perpetuation of white nationalist rhetoric from the highest government elected offices Everywhere we look we find trauma and pain and we find resilience and resolve This volume featuring leading theological scholars and religious leaders is rich in analysis of the plagues we are facing and equally rich in the resources practices and

inspirations that will carry our efforts to build a more just world      For Love of the Father Ruth Stein,2010 For Love of the Father provides a psychological explanation of the attraction of destructive and self destructive fundamentalism in terms of male longings      On Holy Ground: The Theory and Practice of Religious Education Liam Gearon,2013-07-18 Religion has had notable and renewed prominence in contemporary public and political life Religious questions have also been freshly examined in philosophy and theology the natural sciences the social sciences psychology phenomenology politics and the arts These fields reflect complex multi disciplinary understandings of religion some hostile some accommodating For religious education this has all contributed to its own international renaissance Religious education in ensuring it is contemporary shares with these fields the same criticality the same distance between the study of religion and the religious life Yet what are the grounds of this modern religious education Through a systematic historical and contemporary cross disciplinary analysis answering this question is the ambitious task of the book Chapters include philosophy theology and religious education the natural sciences and religious education the social sciences and religious education psychology spirituality and religious education phenomenology and religious education the politics of religious education the aesthetics of religious education The central problem of all modern religious education remains this what are the grounds of religious education when religious education is no longer grounded in the religious life in the life of the holy Although this primarily appears to be an epistemological problem it soon becomes a moral and existential one The book will be of key interest to teachers theorists and researchers working in religious education      *Relating God and the Self* Jan-Olav Henriksen,2016-04-08 Religion is not only about understanding the world it is just as much about how to develop and shape the self's experience of itself Because the religious self is shaped by our symbols of God and symbols of God are also shaped by the self theology and philosophy of religion cannot ignore this interplay or the psychological dimension when they discuss what symbols of God are adequate and not By discussing critically different ways the symbol of God functions in the formation of the self the book develops a nuanced and original approach to the interplay between God and the self It suggests that play is actually an important metaphor in order to develop a dynamic understanding of religion's way of relating God and the Self This approach challenges understandings of religion focussing only its cognitive claims as well as those who emphasize doctrinal orthodoxy as the most important element in religion
