Bureau of the Census,1975 *Men without Work* Nicholas Eberstadt,2022-09-19 Nicholas Eberstadt s landmark 2016 study *Men without Work* cast a spotlight on the collapse of work for men in modern America Rosy reports of low unemployment rates and full or near full employment conditions he contends were overlooking a quiet continuing crisis Depression era work rates for American men of prime working age 25 54 The grim truth over six million prime age men were neither working nor looking for work Conventional unemployment measures ignored these labor force dropouts but their ranks had been rising relentlessly for half a century Eberstadt s unflinching analysis was in the words of The New York Times an unsettling portrait not just of male unemployment but also of lives deeply alienated from civil society The famed American work ethic was once near universal men of sound mind and body took pride in contributing to their communities and families No longer warned Eberstadt And now six years and one catastrophic pandemic later the problem has not only worsened it has seemingly been spreading among prime age women and workers over fifty five In a brand new introduction Eberstadt explains how the government s response to Covid 19 inadvertently exacerbated the flight from work in America From indiscriminate pandemic shutdowns to almost unconditional unemployment benefits Americans were essentially paid not to work Thus today despite the vaccine rollouts inexplicable numbers of working age men and women are sitting on the sidelines while over 11 million jobs go unfilled Current low rates of unemployment touted by pundits and politicians are grievously misleading The truth is that fewer prime age American men are looking for readily available work than at any previous juncture in our history And others may be catching the Men Without Work virus too Given the devastating economic impact of the Covid calamity and the unforeseen aftershocks yet to come this reissue of Eberstadt s groundbreaking work is timelier than ever **Measuring Respirator Use in the Workplace** National Research Council,Committee on National Statistics,Division of Behavioral and Social Sciences and Education,Board on Chemical Sciences and Technology,Division on Earth and Life Studies,Committee on the Review of the National Institute of Occupational Safety and Health/Bureau of Labor Statistics Respirator Use Survey,2007-06-21 Respirators are used in a variety of workplaces including emergency response mining operations construction manufacturing and hospitals In 2001 National Institute of Occupational Safety and Health NIOSH and Bureau of Labor Statistics commissioned a nationwide survey of respirator use in the workplace the results of which were published in the 2003 report *Respirator Usage in Private Sector Firms* The purpose of the survey was to evaluate respirator use and practices including training practices and the value of respirator manufacturer s instruction in order to help guide NIOSH respirator certification and research This National Research Council NRC report evaluates the survey in terms of several

measures such as the adequacy and appropriateness of the survey instrument the survey methodology data analysis and the conclusions drawn from the data The NRC report finds that the survey was an important first step in collecting respiratory protection data from a probability sample but that several improvements could be made in survey design and analysis Based on the review of the survey the NRC report concludes that data on respirator use would be best provided by employers and employees in the context of the work setting Bulletin of the United States Bureau of Labor Statistics ,1975 Report to Federal Statistical Agencies United States.
