Blue Planet in Green Shackles Václav Klaus, 2008-01-01 **Climate Obstruction across Europe** Robert J. Brulle, J. Timmons Roberts, Miranda C. Spencer, 2024-07-16 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations Understanding climate obstruction is foundational to advancing effective action on the global climate crisis Starting in the late 1980s a broad range of actors including corporations and trade associations acting in coordination with conservative think tanks foundations and public relations firms mounted a long term effort to oppose action to mitigate the greenhouse gas emissions responsible for climate change This is the first book to document the development and nature of these activities across Europe Leading teams of experts examine case studies of eleven nations and the European Union Each team documents the historic development of climate obstruction in the country the principal organizations involved in these efforts the strategies and tactics utilized and the nature of the arguments made to slow or stop climate action Noting significant differences between countries the book concludes with ten lessons on climate obstruction across Europe that emerged from the studies Future research is suggested to aid in better understanding the development of intentional barriers to action on climate change in Europe *The Oxford Handbook of Comparative Environmental Politics* Jeannie Lynn Sowers, Stacy D. VanDeveer, Erika Weinthal, 2023 Including 42 chapters organized across 9 sections The Oxford Handbook of Comparative Environmental Politics explores some of the most important environmental issues through the lens of comparative politics including energy climate change food health urbanization waste and sustainability The chapters delve into more traditional forms of comparative environmental politics CEP the political economy of natural resources and the role of corporations and supply chains while also showcasing new trends in CEP scholarship particularly the comparative study of environmental injustice and intersectional inequities The Handbook highlights scholarship from a broader range of regions and includes approaches from political science anthropology sociology geography gender theory law human rights and development studies **Global Environmental Politics in a Turbulent Era** Peter Dauvergne, Leah Shipton, 2023-03-02 With the rapid destabilization escalation and convergence of various environmental crises global environmental politics is facing extreme turbulence Tracing the causes consequences and dangers of planetary turbulence this essential book identifies the emerging opportunities to improve governance in environmental politics and transition the world order toward greater equity justice and sustainability *Climate Obstruction* Kristoffer Ekberg, Bernhard Forchtner, Martin Hultman, Kirsti M. Jylhä, 2022-12-30 In Climate Obstruction How Denial Delay and Inaction are Heating the Planet Kristoffer Ekberg Bernhard Forchtner Martin Hultman and Kirsti Jylhä bring together crucial insights from environmental history sociology media and communication studies and psychology to help us understand why we are failing to take necessary measures to avert the unfolding climate crisis They do so by examining the

variety of ways in which meaningful climate action has been obstructed This ranges from denial of the scientific evidence for human induced climate change and its policy consequences to seemingly sincere acknowledgement of scientific evidence while nevertheless delaying meaningful climate action The authors also consider all those actions by which often well meaning individuals and collectives unintendedly hamper climate action In doing so this book maps out arguments and strategies that have been used to counter environmental protection and regulation since the 1960s by first and foremost corporations supported by conservative actors but also far right ones as well as ordinary citizens This timely and accessible book provides tools and lessons to understand identify and call out such arguments and strategies and points to actions and systemic and cultural changes needed to avert or at least mitigate the climate crisis

It's The Sun, Not Us L.D. den Boer, 2019-08-27 Earth's climate is changing it always has and always will The cause may be debated but man made global warming has become the accepted narrative and Big Oil the popular villain Anyone daring to challenge this consensus is attacked smeared demonized as a denier even threatened Researchers who refuse to toe the line are discredited dismissed as incompetent and blacklisted regardless of their expertise experience or credentials This is not how science is conducted But not everyone can be silenced The author of this book is not incompetent Nor was he paid to write it He's just someone who cares about the truth a scientist with a broad understanding of how Earth's climate works and how it has changed over time His book is divided into two parts science and ideology The first part explains in language laypersons can understand how the Sun cosmic rays and other natural factors control Earth's climate and why carbon dioxide is virtually irrelevant The second part exposes and refutes the green ideology of man made global warming revealing the economic damage it causes It may be short but it's well researched packed with information and an enjoyable rewarding read

Beware of Demagogues Gerald H. Fickenscher, 2011-05 Demagoguery is the advocacy of what one knows is not true but what one believes others will accept for lack of full understanding Sound familiar Does the American government promise something for nothing knowing the average citizen does not fully comprehend the implications Are you unhappy with the political and corporate leadership of this country Do you feel you're unable to change the situation or at least protect yourself Recognizing the problem is half the battle and author Gerald Fickenscher identifies the problem as the government not the people or the economy Beware of Demagogues provides an insight into the venues by which American demagogues manipulate the public such as public education environmentalism inflation immigration lotteries and taxation Learn how to protect yourself and the foundational principles of this nation from the demagogues we've elected by following Gerald's course of action before America ceases to be the beacon of freedom to the rest of the world

An Unworthy Future Joseph Toomey, 2014-07-22 It is difficult to find an area of public policy more plagued by misunderstanding than energy policy Even worse every time the subject is raised we are obligated to get mired in pointless arguments about the weather This book helps set the record straight Not convinced Consider some of these inconvenient truths The cost of green energy climate remediation is anywhere from 10 to 1

000 times greater than the damage from the climate change it attempts to alleviate Germany the worlds leader in solar energy will spend more than 280 billion by 2030 on solar subsidies But all of that investment will only forestall 22nd century global warming by 37 hours Obamas carbon tax would cost Americans 1 2 trillion over just ten years But it would only reduce the midrange 3 degree modeled 22nd century global temperature increase by 0 038 degrees Celsius At their current emissions growth rate it will take China nine months to replace the entire U S emissions cut that Obama wants to achieve over seven years at a staggering cost in American jobs and lost economic growth The U S biofuel program imposes a cost on consumers 9 862 times greater than any climate benefit they or their distant progeny will ever derive This is not another skeptical global warming polemic but an economic evaluation of how and why green energy will fail The world has too many pressing needs For the money Obama squandered on just a single bankrupt crony solar company the U S could have prevented 300 000 childhood malaria deaths in poor countries A thoroughly researched heavily documented book by an expert in his field it will demonstrate in meticulous detail how wasteful and economically inefficient Obamas green energy dead end future will be compared to other worthy alternatives Its time to end the hysterical climate cynicism and get on humanitys side

Going Green Peggy Daniels Becker,2010-11-12 Help your readers richly explore the history of the green movement and evaluate whether or not going green makes a difference This book presents diversity of opinion on the topic including both conservative and liberal points of view in an even balance Readers will examine the benefits of reuse and recycling the impact of local food purchasing on the environment and the influence of green advertising Essay sources include Roberta Kwok Sarah Fenske Jeffrey Hollender and Jim Fedako

Living Through the End of Nature Paul Wapner,2013-02-08 How environmentalism can reinvent itself in a postnature age a proposal for navigating between naive naturalism and technological arrogance Environmentalists have always worked to protect the wildness of nature but now must find a new direction We have so tamed colonized and contaminated the natural world that safeguarding it from humans is no longer an option Humanity s imprint is now everywhere and all efforts to preserve nature require extensive human intervention At the same time we are repeatedly told that there is no such thing as nature itself only our own conceptions of it One person s endangered species is another s dinner or source of income In Living Through the End of Nature Paul Wapner probes the meaning of environmentalism in a postnature age Wapner argues that we can neither go back to a preindustrial Elysium nor forward to a technological utopia He proposes a third way that takes seriously the breached boundary between humans and nature and charts a co evolutionary path in which environmentalists exploit the tension between naturalism and mastery to build a more sustainable ecologically vibrant and socially just world Beautifully written and thoughtfully argued Living Through the End of Nature provides a powerful vision for environmentalism s future

Institutional Economics Wolfgang Kasper,Manfred E. Streit,Peter J. Boettke,2012-01-01 This thoroughly revised extended and updated edition of a critically acclaimed textbook provides an accessible and cohesive introduction to the

burgeoning discipline of institutional economics Requiring only a basic understanding of economics this lucid and well written text will be essential reading for undergraduate and postgraduate students wanting to understand the problems of the real world such as entrepreneurship innovation the cost of the welfare state international financial crises and economic development As institutional economics is now revolutionising policy making the book can also serve as a guide to the pressing problems facing policy makers in mature and emergent countries alike Key features include A short Primer at the beginning of each chapter to highlight the main issues and their relevance Key Concepts such as institutions economic order coordination costs competition and public policy are highlighted and clearly defined International coverage is ensured as the three authors experienced academic teachers work in the US Europe and the Asia Pacific *The Never-Ending Struggle for Free Society* Václav Klaus, Institut Václava Klause, 2015-02-11 This collection of speeches essays and articles originally written in English is a summary of the texts created by Václav Klaus in the last year and half in his capacity as the President of the Czech Republic and the first year and half of his post Presidential life Soils and Human Health Eric C. Brevik, Lynn C. Burgess, 2012-12-12 Despite the connections between soils and human health there has not been a great amount of attention focused on this area when compared to many other fields of scientific and medical study Soils and Human Health brings together authors from diverse fields with an interest in soils and human health including soil science geology geography biology and anthropology to investigate this issue from a number of perspectives The book includes a soil science primer chapter for readers from other fields and discusses the ways the soil science community can contribute to improving our understanding of soils and human health Features Discusses ways the soil science community can contribute to the improvement of soil health Approaches human health from a soils focused perspective covering the influence of soil conservation and contact with soil on human health Illustrates topics via case studies including arsenic in groundwater in Bangladesh the use of Agent Orange in Vietnam heavy metal contamination in Shipham United Kingdom and Omaha Nebraska USA and electronic waste recycling in China In a scientific world where the trend has often been ever increasing specialization and increasingly difficult communication between fields and subfields the interdisciplinary nature of soils and human health studies presents a significant challenge going forward Fields with an interest in soils and human health need to have increased cross disciplinary communication and cooperation This book is a step in the direction of accessibility and innovation elucidating the state of knowledge in the meeting of soil and health sciences and identifying places where more work is needed *Global Warming* Jay A. Auxt, Dr. William M. Curtis III, 2009-02-01 Droughts floods hurricanes cyclones We constantly hear of extreme weather conditions all over the world We hear dire warnings like Flee hurricane Ike or face certain death officials warn To be politically correct we must assume that these are a direct result of global warming However is this true Jay Auxt Global Warming and the Creator's Plan God has a clear plan for this earth and its inhabitants Although the media would have you believe the earth is doomed due to global warming the truth is that the earth has always

been warming very gradually and that the current warming is insignificant especially considering the scope of God's ultimate plan for each and every one of us Unlock the clues to this contemporary controversy by discovering Old Testament biblical references from the past Scientific data of the present Biblical prophecy for the future Contrary to secular media this book clearly illustrates that the concept of man induced global warming is totally unfounded and that God alone is in control of our destiny Learn to sift unsupported rumor and alarmist rhetoric from verifiable facts on this hot button issue with Global Warming and the Creator's Plan This was a very revealing book and it sure gave me something to think about I realize the media has its own agenda but this book helps us to remember that God has a plan and ultimately it is His plan that will prevail The book was very well researched and easy to read as well I recommend it Dave H from Book Bargains and Reviews

Water, Peace, and War Brahma Chellaney, 2015-03-01 This pioneering and authoritative study considers the profound impact of the growing global water crunch on international peace and security as well as possible ways to mitigate the crisis Although water is essential to sustaining life and livelihoods geostrategist Brahma Chellaney argues that it remains the world's most underappreciated and undervalued resource One sobering fact is that the retail price of bottled water is already higher than the international spot price of crude oil But unlike oil water has no substitute raising the specter of water becoming the next flashpoint for conflict Water war as a concept may not mesh with the conventional construct of warfare especially for those who plan with tanks combat planes and attack submarines as weapons Yet armies don't necessarily have to march to battle to seize or defend water resources Water wars in a political diplomatic or economic sense are already being waged between riparian neighbors in many parts of the world fueling cycles of bitter recrimination exacerbating water challenges and fostering mistrust that impedes broader regional cooperation and integration The danger is that these water wars could escalate to armed conflict or further limit already stretched food and energy production Writing in a direct nontechnical and engaging style Brahma Chellaney draws on a wide range of research from scientific and policy fields to examine the different global linkages between water and peace Offering a holistic picture and integrated solutions his book promises to become the recognized authority on the most precious natural resource of this century and how we can secure humankind's water future *Contesting Global Environmental Knowledge, Norms and Governance* M. J.

Peterson, 2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to

environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international environmental politics and global policy making Policy analysts should also find it useful

Pianeta blu, non verde. Cosa è in pericolo: il clima o la libertà? Václav Klaus, 2009 The Ghosts of Europe Anne Porter, 2010-09-23 One of the country's most distinguished writers and publishers returns to her roots to explore the consequences of democracy in the former Habsburg lands In 1989 the Berlin Wall was dismantled Communism gave way to democracy Since that time the former borderlands of the long defunct Habsburg Empire and the more recently dispersed Soviet Empire have been trying to invent their own versions of democracy and market driven economics But these experiments have led to a widening gap between rich and poor The worldwide economic crisis has severely tested Central Europe's determination to live peaceably and there are many disquieting signs of old hatreds and racial tensions returning Author Anna Porter travels through the Czech Republic Hungary Poland and Slovakia to speak with leading intellectuals politicians former dissidents and the champions of aggrieved memories She interviews great figures of the revolution Václav Havel Adam Michnik George Konrad and its new custodians among them Radek Sikorski and Ferenc Gyurcsány and also examines the younger generation with little or no experience of Communism and no interest in its aftermath She visits Poland's Institute of National Remembrance Prague's Jewish Museum and Hungary's House of Terror each an attempt to reckon with dark episodes of history

Why We Hate the Oil Companies John Hofmeister, 2011-08-30 As president of Shell Oil John Hofmeister was known for being a straight shooter willing to challenge his peers throughout the industry Now he's a man on a mission the founder of Citizens for Affordable Energy crisscrossing the country in a grassroots campaign to change the way we look at energy in this country While pundits proffer false new promises of green energy independence or flatly deny the existence of a problem Hofmeister offers an insider's view of what's behind the energy companies posturing and how politicians use energy misinformation disinformation and lack of information to get and stay elected He tackles the energy controversy head on without regard for political correctness He also provides a new framework for solving difficult problems identifying solutions that will lead to a future of comfortable lifestyles affordable and clean energy environmental protection and sustained economic competitiveness

Global Warming: Reality, or Bubble? Bob Carter, Václav Klaus, Fred Singer, Michael Walker, Julian Morris, Luboš Motl, Miroslav Kutílek, Institut Václava Klause, 2015-03-02 This publication contains texts from the seminar

Climate Hazard Adaptation is the Key that was held on 8th December 2010 lecture by Fred Singer in which he argues that the global warming we are experiencing today is a natural phenomenon Publication contains also texts from the seminar Global Warming Facts and Myths that was held on 15th November 2007 and other supplementary texts
