Introduction When I was at college and naturally perpetually hungry because we were on the go physically and mentally from 6 in the morning to 2 o clock at night those were the days my friend I heard about different food philosophies going back to ancient times especially as practiced in the East One of my friends was telling me about how her ancestors lived long and healthy productive lives for millenniums surviving on just 10 fistfuls she cupped her hands together and made a swallowing motion per meal That made up a healthy mouthful According to her this was practiced even today even in this day of plenty because according to them 10 fistfuls of food was enough to make a satisfying meal for you According to her throughout the day one did not go beyond 32 mouthfuls fistfuls Why 32 I queried Why not 31 or 33 or much much more than that Well she said 10 fistfuls per meal 3 meals per day and 2 extra for when you are really hungry

Barley Water From One Year to Three Years Normal Growth Signs of a Healthy Child Ignorance Superstition and Lack of Knowledge Conclusion Author Bio Publisher Introduction Many people will be under the impression why I would want to write a book upon the diet for a healthy baby because according to them every mother knows that the best diet for a little one is just go pick up one of the packages of baby food from the nearest supermarket shelf and there you are instant baby food for your baby For a majority of mothers out there it is just bring it home open it up mix it in a bowl and feed it to your baby at regular intervals No mess no fuss Is it a wonder that a majority of new mothers out there use this shortcut to feed their little ones because according to them the food that their baby is being fed is prepared by expensive brands and nutritious and best of all it feeds baby fruit cereals solids and semisolids This book is definitely against such a time saving activity because you want a healthy baby don't you This book is going to tell you all about natural diets being used down the ages to feed babies and when and how Throw away all your scientific based books telling you all about the amount of calories you need to feed your baby and the nutritive value of every spoonful Babies are not to be brought up that way They have to be brought up in a natural manner in which they can build a strong immune system which is going to keep them be healthy for the rest of their lives But you are going to say you were brought up on store bought baby food and it did not seem to have any detrimental effect upon your health Well I would just say please compare yourself to a baby who was brought upon fresh fruit vegetables natural products and the traditional way of bringing up a baby which so many people are being brainwashed into thinking to be old fashioned old school and even medieval by the popular media today selling products of the multibillion dollar baby food industry and compare his state of health with your own He does have the slighter edge over you doesn't he He is not prone to infections has a stronger immune system can throw off fever and other ailments easily and has more energy staying power and even powers of concentration In fact you are sick and tired of such a bouncing dynamo floating all over the place
