Integrated Power Devices and TCAD Simulation Yue Fu,Zhanming Li,Wai Tung Ng,Johnny K.O. Sin,2017-12-19 From power electronics to power integrated circuits PICs smart power technologies devices and beyond Integrated Power Devices and TCAD Simulation provides a complete picture of the power management and semiconductor industry An essential reference for power device engineering students and professionals the book not only describes the physics inside integrated power semiconductor devices such lateral double diffused metal oxide semiconductor field effect transistors LDMOSFETs lateral insulated gate bipolar transistors LIGBTs and super junction LDMOSFETs but also delivers a simple introduction to power management systems Instead of abstract theoretical treatments and daunting equations the text uses technology computer aided design TCAD simulation examples to explain the design of integrated power semiconductor devices It also explores next generation power devices such as gallium nitride power high electron mobility transistors GaN power HEMTs Including a virtual process flow for smart PIC technology as well as a hard to find technology development organization chart Integrated Power Devices and TCAD Simulation gives students and junior engineers a head start in the field of power semiconductor devices while helping to fill the gap between power device engineering and power management systems

Manual of Romance Languages in Africa Ursula Reutner,2023-12-18 With more than two thousand languages spread over its territory multilingualism is a common reality in Africa The main official languages of most African countries are Indo European in many instances Romance As they were primarily brought to Africa in the era of colonization the areas discussed in this volume are thirty five states that were once ruled by Belgium France Italy Portugal or Spain and the African regions still belonging to three of them Twenty six states are presented in relation to French four to Italian six to Portuguese and two to Spanish They are considered in separate chapters according to their sociolinguistic situation linguistic history external language policy linguistic characteristics and internal language policy The result is a comprehensive overview of the Romance languages in modern day Africa It follows a coherent structure offers linguistic and sociolinguistic information and illustrates language contact situations power relations as well as the cross fertilization and mutual enrichment emerging from the interplay of languages and cultures in Africa

Methods for Studying Nucleic Acid/Drug Interactions Meni Wanunu,Yitzhak Tor,2016-04-19 Since most therapeutic efforts have been predominantly focused on pharmaceuticals that target proteins there is an unmet need to develop drugs that intercept cellular pathways that critically involve nucleic acids Progress in the discovery of nucleic acid binding drugs naturally relies on the availability of analytical methods that assess the eff

Monte Carlo Calculations in Nuclear Medicine Michael Ljungberg,Sven-Erik Strand,Michael A. King,1998-01-01 Monte Carlo MC methods have proved invaluable in developing a range of computer programs to enhance images in different modalities including PET and SPECT Monte Carlo Calculations in Nuclear Medicine Applications in Diagnostic Imaging is the first book to cover applications of MC methods in nuclear medicine from first principles to current

Partitioning Techniques Shankru Guggari,Umadevi V,Vijayakumar Kadappa,2025-06-02 This book discusses various partitioning strategies tailored for traditional machine learning algorithms It examines how data can be divided efficiently to enhance the performance and scalability of classic machine learning models It explores how partitioning methods can be applied to neural networks and other deep learning architectures and describes various ways to accelerate training reduce memory consumption and enhance overall efficiency Graphs are prevalent in various AI domains This book is specifically designed for graph data structures using partitioning techniques and also explores insights into optimizing graph algorithms and analytics With the explosion of data efficient partitioning becomes crucial for processing large datasets This book discusses various partitioning techniques that enable effective management and analysis of big data enhancing speed and resource utilization Edge computing demands resource efficient strategies It examines partitioning methods tailored for edge devices enabling AI capabilities at the edge while addressing resource This book showcases how partitioning techniques have been successfully applied across various AI domains It demonstrates real world scenarios where partitioning optimizes AI algorithms and systems By bridging the gap between theory and practical applications this book intends to equip researchers practitioners and students with invaluable insights into harnessing partitioning for optimizing AI driven systems data processing and problem solving strategies It describes the various advantages and disadvantages of partitioning techniques This book is a vital resource illuminating the path towards unlocking the full potential of partitioning in shaping the future of AI technologies *Documentation Abstracts* ,1999 **Stream Ciphers** Andreas Klein,2013-04-08 In cryptography ciphers is the technical term for encryption and decryption algorithms They are an important sub family that features high speed and easy implementation and are an essential part of wireless internet and mobile phones Unlike block ciphers stream ciphers work on single bits or single words and need to maintain an internal state to change the cipher at each step Typically stream ciphers can reach higher speeds than block ciphers but they can be more vulnerable to attack Here mathematics comes into play Number theory algebra and statistics are the key to a better understanding of stream ciphers and essential for an informed decision on their safety Since the theory is less developed stream ciphers are often skipped in books on cryptography This book fills this gap It covers the mathematics of stream ciphers and its history and also discusses many modern examples and their robustness against attacks Part I covers linear feedback shift registers non linear combinations of LFSRs algebraic attacks and irregular clocked shift registers Part II studies some special ciphers including the security of mobile phones RC4 and related ciphers the eStream project and the blum blum shub generator and related ciphers Stream Ciphers requires basic knowledge of algebra and linear algebra combinatorics and probability theory and programming

Appendices in Part III help the reader with the more complicated subjects and provides the mathematical background needed. It covers for example complexity number theory finite fields statistics combinatorics Stream Ciphers concludes with exercises and solutions and is directed towards advanced undergraduate and graduate students in mathematics and computer science.

Hayes' Principles and Methods of Toxicology A. Wallace Hayes, Tetyana Kobets, 2023-07-03 Hayes Principles and Methods of Toxicology has long been established as a reliable and informative reference for the concepts methodologies and assessments integral to toxicology. The new edition contains updated and new chapters with the addition of new authors while maintaining the same high standards that have made this book a benchmark resource in the field. Key Features: The comprehensive yet concise coverage of various aspects of fundamental and applied toxicology makes this book a valuable resource for educators students and professionals. Questions provided at the end of each chapter allow readers to test their knowledge and understanding of the material covered. All chapters have been updated and over 60 new authors have been added to reflect the dynamic nature of toxicological sciences. New topics in this edition include Safety Assessment of Cosmetics and Personal Care Products The Importance of the Dose Rate Response Novel Approaches and Alternative Models Epigenetic Toxicology and an Expanded Glossary. The volume is divided into 4 major sections addressing fundamental principles of toxicology: Section I Principles of Toxicology major classes of established chemical hazards; Section II Agents current methods used for the assessment of various endpoints indicative of chemical toxicity; Section III Methods as well as toxicology of specific target systems and organs; Section IV Organ and System Specific Toxicology. This volume will be a valuable tool for the audience that wishes to broaden their understanding of hazards and mechanisms of toxicity and to stay on top of the emerging methods and concepts of the rapidly advancing field of toxicology and risk assessment.

Sequential Monte Carlo Methods in Practice Arnaud Doucet, Nando de Freitas, Neil Gordon, 2013-03-09 Monte Carlo methods are revolutionising the on line analysis of data in fields as diverse as financial modelling target tracking and computer vision. These methods appearing under the names of bootstrap filters condensation optimal Monte Carlo filters particle filters and survival of the fittest have made it possible to solve numerically many complex non standard problems that were previously intractable. This book presents the first comprehensive treatment of these techniques including convergence results and applications to tracking guidance automated target recognition aircraft navigation robot navigation econometrics financial modelling neural networks optimal control optimal filtering communications reinforcement learning signal enhancement model averaging and selection computer vision semiconductor design population biology dynamic Bayesian networks and time series analysis. This will be of great value to students researchers and practitioners who have some basic knowledge of probability. Arnaud Doucet received the Ph D degree from the University of Paris XI Orsay in 1997. From 1998 to 2000 he conducted research at the Signal Processing Group of Cambridge University UK. He is currently an assistant professor at the Department of Electrical Engineering of Melbourne University Australia. His research interests include Bayesian statistics.

dynamic models and Monte Carlo methods Nando de Freitas obtained a Ph D degree in information engineering from Cambridge University in 1999 He is presently a research associate with the artificial intelligence group of the University of California at Berkeley His main research interests are in Bayesian statistics and the application of on line and batch Monte Carlo methods to machine learning

Controlling Salmonella in Poultry Production and Processing Scott M. Russell, Ph.D.,2012-02-16 Salmonella is a major pathogen that can result in deadly foodborne illness The Centers for Disease Control and Prevention CDC estimates that there are 1 4 million cases of Salmonella poisoning each year in the United States from a variety of causes with undercooked poultry and eggs being the prime culprits Therefore intervention strategies are vital to reducing its occurrence Controlling Salmonella in Poultry Production and Processing provides a complete analysis of the challenges faced in controlling Salmonella in this industry and keeping the public safe from this threat Author Scott M Russell Ph D works closely with the poultry industry throughout the United States and Canada and with companies in Central and South America Europe and China In this volume he explores The origin of Salmonella in poultry Intervention strategies for controlling Salmonella during breeding hatching grow out transportation and processing How to design a processing plant to eliminate Salmonella How to verify intervention strategies to ensure they are working Increasing yield during processing while controlling Salmonella New regulations being proposed by USDA FSIS and their impact on poultry companies regarding competition and international exportation of products The differences between the EU and the U S with regard to Salmonella control Providing readers with numerous examples of real world experiences Dr Russell offers knowledge gleaned from traveling to poultry plants throughout the world over an 18 year period assisting processors with identifying the sources of Salmonella in their operations and developing successful intervention strategies *NBS Special Publication* ,1968
