Good Kids Isabel Jijon, 2025-07-29 One in ten children worldwide is involved in some form of child labor While almost half are in occupations that put their safety at risk the other half have gray jobs like industrial farming or selling candy on the street Children in these positions often defend the value of their work and some even join social movements to demand the right to work with dignity In *Good Kids* Isabel Jijon reveals how global campaigns against child labor are often met with resistance from the very children they are meant to protect Conducting interviews in Bolivia and Ecuador with children who defend their labor Jijon explores what they mean by value rights and dignity in this context She finds that working children seek a sense of self worth as well as worthiness in their closest relationships they use work to prove that they are good sons daughters good friends or simply good kids Drawing also on interviews with reformers invested in ending child labor Jijon produces a nuanced picture of the ways that global campaigns can unintentionally undermine these relationships and make working children feel stigmatized rather than protected This fascinating and challenging study of moral meaning making upends simple understandings of harm and worthiness in a vast but poorly understood labor market *Handbook of*

Children's Rights Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self determination With contributions from a wide range of international scholars the *Handbook of Children's Rights* brings together research theory and practice from diverse perspectives on children's rights This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child evolving capacities of the child states rights versus children's rights rights of children versus parental or family rights children as citizens children's rights versus children's responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g childhood studies developmental psychology sociology of childhood anthropology and political science The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy driven interest in the voices and perspectives of children and youth

Children's rights law is often studied and perceived in isolation from the broader field of human rights law. This volume explores the interrelationship between children's rights law and more general human rights law in order to see whether elements from each could successfully inform the other. Children's rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child, the use of general principles and the inclusion of third parties e.g. parents and other care takers in treaty provisions. The first part of this book questions whether these features could be a source of inspiration for general human rights law. In part two the reverse question is asked: could children's rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women, persons with disabilities, indigenous peoples or older persons. Finally, the interaction between children's rights law and human rights law and the potential for their isolation, inspiration or integration may be coloured or determined by the thematic issue under consideration. Therefore, the third part of the book studies the interplay between children's rights law and human rights law in the context of specific topics: intra-family relations, LGBTIQ marginalization, migration, media, the environment and transnational human rights obligations.

The EU as a Children's Rights Actor Ingi Iusmen, Helen Stalford, 2015-11-16. This edited collection critiques from an interdisciplinary perspective the growing body of EU children's rights activities in the light of broader political, economic and legal processes. Specifically, it interrogates whether EU intervention effectively responds to what are perceived as violations of children's rights and the extent to which EU efforts to uphold children's rights complement and reinforce parallel national and international pursuits. Moreover, it scrutinises the compatibility of EU children's rights measures with the principles and provisions enshrined in the UN Convention on the Rights of the Child (CRC).

Children, Human Rights and Temporary Labour Migration Rasika Jayasuriya, 2021-06-22

This book focuses on the neglected yet critical issue of how the global migration of millions of parents as low-waged migrant workers impacts the rights of their children under international human rights law. The work provides a systematic analysis and critique of how the restrictive features of policies governing temporary labour migration interfere with provisions of the Convention on the Rights of the Child that protect the child-parent relationship and parental role in children's lives. Combining social and legal research, it identifies both potential harms to children's well-being caused by prolonged child-parent separation and State duties to protect this relationship, which is deliberately disrupted by temporary labour migration policies. The book boldly argues that States benefitting from the labour of migrant workers share responsibility under international human rights law to mitigate harms to the children of these workers, including by supporting effective measures to maintain transnational child-parent relationships. It identifies measures to incorporate children's best interests into temporary labour migration policies, offering ways to reduce interferences with children's family rights. This book fills a gap that emerges at the intersection of child rights studies, migration research, and existing literature on the purported nexus between labour migration and international development. It will be a valuable resource for academics, researchers, and policymakers working in these areas.
