Emil Salim, Ola Ullsten, World Commission on Forests and Sustainable Development, 1999-04-15
Forests are extraordinary in their contribution to the basic human need for environmental stability and security as well as in their contribution to the livelihood of many. The World Commission on Forests and Sustainable Development (WCFS) through its unique makeup and independent nature has been able to address the most significant issues surrounding the world's forests in a manner not possible for any other body or institution. By convening public hearings all over the world to give voice to those who depend on forests and by engaging itself in the politics of the issues at the highest levels, the WCFS has endeavored to address fundamental and serious concerns. This report representing the culmination of these efforts discusses forest practices, politics and policies and the social situations which they create or perpetuate and presents the Commission's findings, conclusions and recommendations. Journal of the Senate of the United States of America United States. Congress. Senate, 1976 **Global Concerns for Forest Resource Utilization** Atsushi Yoshimoto, Kiyoshi Yukutake, 2013-11-11
This book is a collection of papers presented at the international symposium on forest sector analysis held in Miyazaki, Japan, in 1998. It is structured with three themes: understanding global forest sector issues; discussing the contribution of modeling efforts to forest sector analysis; and discussing the role of Japanese forest policy in a global sense. The most important features are the case studies using various types of forest sector models. From a modeling perspective, changes in modeling efforts include more detail of spatial and multiple market levels, intergenerational welfare concerns, non-market valuation issues, and explicit treatment of the uncertainty inherent in both the policy process and in the biophysical systems. The reader of this book will benefit not only from presentation of forest utilization issues in different nations but also from the interrelatedness of the theory and application of forest sector modeling. **Wood Utilization**, 2007
Wood utilisation research and product development spans a broad spectrum of activities. These activities fall into five categories: harvesting wood; properties manufacturing and processing products; and testing and economics and marketing. This book deals with the US federal input in this field. **Federal Funding Sources for Rural Areas** M. Louise Reynnells, 1999-02
Lists federal funding programs available to rural areas which were selected from the Catalog of Federal Domestic Assistance, 1997. Provides extensive listings of federal assistance programs, national, regional, and local office contacts, and grant application procedures from the Appalachian Regional Commission, Departments of Agriculture, Commerce, Defense, Education and Energy, EPA, FEMA, Departments of Health and Human Services, Justice, Labor, Interior, and Transportation, HUD, NEA, National Foundation on the Arts and the Humanities, SBA, TVA, and the Corporation for National and Community Service. **Draft environmental statement** United States. Forest Service. Pacific Northwest Region, 1978 Timber Resource Plan, Winema National

Forest, Region 6, 1981 *World Forests, Society and Environment* Matti Palo,J. Uusivuori,2012-12-06 This book addresses current global and regional issues concerning the world s forests societies and the environment from an independent and non governmental point of view A main message is that cooperation on a global scale is not only commendable but essential if solutions to the problems facing the world s forests are to be found To achieve this modern science needs to find a clearer picture of relationships between forests human activity and the environment and of the consequences of environmental change for the ability of societies to survive Part I Editorial Perspectives is analyzing the ongoing globalization processes of forests societies and the environment Part II Society and Environment reviews worldwide trends with significance for the future of forests and forestry While the trends are influenced by forest sector issues that sector is influenced to a much larger extent by external factors such as demography urbanization or technological development Part III Importance of Forests looks at the value of the goods and services of forests tangible and intangible market and non market and concludes that failure to recognize their full value is one of the crucial impediments to sustainable development In Part IV Global Forum scientists take up global forestry themes deforestation trade and the environment climate change biodiversity with the aim of stimulating wider discussion Part V Regional Forum looks at major themes of particular relevance to Africa Asia Pacific Latin America North America and Europe such as farm and agroforestry corruption and concessions urban forestry and environmental conflicts Part VI introduces the special theme forest sectors in transition economies Teams of scientists from Russia and China focus on the implications of the transition from plan to market economy illuminating both the very different nature of the forest sector in the two countries and the different transition paths that they have adopted In the past millennium the entire world has been discovered In the past half century the contribution of forests to the economy worldwide has been perceived while only recently have their societal and environmental benefits been globally recognized Globalization is a demanding process requiring knowledge and information This book offers knowledge facts and information but also values from diverse human and cultural perspectives about world forests society and environment to help us towards equity in our use of the global forest to create a clearer vision on a unasylyva **Forest Resource Policy in Latin America** Ronnie de Camino,Julio C. Tresierra,Ramón López,Thomas Kelly,Markku Simula,Kari Keipi,Carlos Felipe Jaramillo,Olli Haltia,Jared J. Hardner,Marc J. Dourojeanni,Jan G. Laarman,Richard Rice,2000-01-01 Forest Resource Policy in Latin America gathers the thinking of a score of experts on sustainable use and management of forests including incentives for investment The authors tackle the thorny social issues of property rights deforestation and forest management and ownership by indigenous people and take a hard look at the trade and environmental issues in forest production that will affect future directions for sustainable forestry development in Latin America Some argue that the main opportunity to conserve natural forests lies in recognizing and paying for the environmental services they provide In addition compensatory measures such as the establishment and better management of strictly protected areas appear to be the best tools to delay

the loss of ecosystems and species Alternative forest concession policies and trade and environmental issues in forest production are also analyzed
