Learning with Learning Disability Owen Barden, 2025-07-09
This book uses the concept of learning disability to explore what it means to be human It argues that we need to learn with rather than from or about learning disability This crucial distinction means being open to what learning disability can teach us about what it means to be human This approach comes from recognising learning disability as an organising concept a concept which radically transforms our sense of what it means to be or not be a person After reflecting on the author's relationship to learning disability the book explores relationships and tensions between conceptualisations of learning disability and of the human Through historical ontology the book initially examines how the phenomenon of learning disability came into being It then explores ways in which the concept of learning disability has over the course of the 20th and 21st centuries radically transformed our sense not only of education and learning but also of who is or is not deemed entitled to full citizenship and the associated rights and so who is or is not fully human Each chapter of the book exposes tensions and contradictions apparent in the ways we tend to think about personhood and learning disability illuminating them through a series a binary oppositions human and not fully human menacing and vulnerable controlled and abandoned capable and incapable human and posthuman The book concludes by drawing together these tensions and contradictions to challenge the prevailing metanarrative of disability and make the case for a more inclusive conceptualisation of what it means to be human It will be of interest to all scholars and students of disability studies the history of learning disability humanism and posthumanism and learning disability advocacy

Child and Adolescent Development for Educators Christi Crosby Bergin, David Allen Bergin, Sue

Walker, Graham Daniel, Angela Fenton, Pearl Subban, 2018-09-01 *Child and Adolescent Development for Educators* covers development from early childhood through high school. This text provides authentic research based strategies and guidelines for the classroom helping future teachers to create an environment that promotes optimal development in children. The authors apply child development concepts to topics of high interest and relevance to teachers including classroom discipline, constructivism, social emotional development and many others. *Child and Adolescent Development for Educators* combines the core theory with practical implications for educational contexts and shows how child development links to the Australian Professional Standards for Graduate Teachers. Case studies and real world vignettes further bridge the distance between research and the classroom. Along with strong coverage of key local research such as the Longitudinal Study of Australian Children and Longitudinal Study of Indigenous children. **ECEL 2022 21st European Conference on e-Learning**

Losada-Puente, 2025-03-19 The teaching practice becomes a reciprocal activity in the classroom when teachers apply their creativity and their knowledge resulting from research and scientific evidence in the didactic teaching process with the purpose of strengthening in the students the key competencies of their training turning students at the core of the didactic process. Teaching strategies must be articulated from previous research and planning and designed sequentially to promote real and interesting learning scenarios and thereby achieve significant learning. From this perspective of teaching learning strategies the reciprocal interaction between the student and the teacher becomes the focus of attention with a playful motivating interesting and rewarding approach for the learner. The role of the teacher is conceived as fundamental in the teaching process to achieve the link between teaching learning and evaluation strategies. For this reason multidisciplinary studies are welcome from all stages of the educational system with quantitative qualitative and mixed approaches and reviews promoting good teaching practices of reflection and innovation from these studies. **Innovative Technologies and Learning**
