N program and is produced by Pascal Press independently of Australian governments Helping Children Learn Mathematics, 5th Australian Edition Robert Reys, Mary Lindquist, Diana V. Lambdin, Nancy L. Smith, Anna Rogers, Leicha Bragg, Audrey Cooke, Melissa Fanshawe, Mark Gronow, 2025-10-10 Diversity in Mathematics Education Alan Bishop, Hazel Tan, Tasos N Barkatsas, 2014-09-20 This book presents a research focus on diversity and inclusivity in mathematics education. The challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is often argued to require differentiation as a response. Typically different curricula, text materials, task structures or pedagogies are favoured responses but huge differences in achievement still result. If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education. The book is written by a group of experienced collaborating researchers who share this focus. It is written for researchers, research students, teachers and in-service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity. Several chapters report new research in this direction. The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne, Australia. The chapters all focus on the ideas of development in both research and practice, recognising that the current need is for new inclusive approaches. The studies presented are set in different contexts including Australia, China, the United States and Singapore.

Back cover **Compendium for Early Career Researchers in Mathematics Education**

Gabriele Kaiser, Norma Presmeg, 2019-04-26 The purpose of this Open Access compendium written by experienced researchers in mathematics education is to serve as a resource for early career researchers in furthering their knowledge of the state of the field and disseminating their research through publishing. To accomplish this the book is split into four sections: Empirical Methods, Important Mathematics Education Themes, Academic Writing and Academic Publishing, and a section Looking Ahead. The chapters are based on workshops that were presented in the Early Career Researcher Day at the 13th International Congress on Mathematical Education (ICME 13). The combination of presentations on methodological approaches and theoretical perspectives shaping the field in mathematics education research, as well as the strong emphasis on academic writing and publishing, offered strong insight into the theoretical and empirical bases of research in mathematics education for early career researchers in this field. Based on these presentations the book provides a state-of-the-art overview of important theories from mathematics education and the broad variety of empirical approaches currently widely used in mathematics education research. This compendium supports early career researchers in selecting adequate theoretical approaches and adopting the most appropriate methodological approaches for their own research. Furthermore, it

helps early career researchers in mathematics education to avoid common pitfalls and problems while writing up their research and it provides them with an overview of the most important journals for research in mathematics education helping them to select the right venue for publishing and disseminating their work

School Reform in an Era of Standardization Ian Hardy, 2020-12-29 School Reform in an Era of Standardization explores how teachers and school based administrators navigate the processes of accountability and standardization in schooling systems and settings It provides clear insights into how the work and learning of teachers and students in schools have been dramatically reconstituted by increased pressures of external political scrutiny and accountability The book reveals in detail the nature and effects of standardization processes upon schools and schooling systems Specifically it shows how curriculum development teaching and assessment practices have all been recalibrated under conditions of increased external scrutiny of teacher and student work and learning and how such processes are manifest in curriculum dominated by attention to literacy and numeracy more scripted pedagogies and standardized testing However the research not only elaborates the detrimental effects of such processes but also how those responsible for educating in schools teachers heads of curriculum deputy principals and principals have responded proactively by interpreting interrogating and challenging these conditions In this way it provides resources for hope evidence of what are described as more authentic accountabilities and at the same time it provides a clear portrait of the difficulty of fostering substantive curriculum teaching and assessment reform during an era of increasingly reductive accountability processes It will be an invaluable resource for understanding and enhancing practices in schools and school systems in the decades to come and for giving hope to educators in the ongoing work of rebuilding trust in public education

Maximising Test Results Edward Connor, 2009 This book provides an invaluable resource for helping students improve their performance in numeracy tests now compulsory in Years 3 and 5 The contents detail the specific types of questions likely to occur and how to best approach answering them Teachers will be able to assess the performance of students using the four test papers provided in this book Answers have been provided at the back

The Art and Heart of Good Teaching Terence Lovat, 2019-07-22 This book summarizes and updates findings from the Australian Values Education Program with a focus on the latest international research in the field both theoretical and practice based Further it provides a theoretical and practical basis for understanding the disenchantment with low level accountability approaches to learning e g NAPLAN in Australia In turn the book demonstrates the effectiveness of Values Education as a holistic pedagogy with the potential to enhance students learning effects in terms of their personal social emotional and academic development It offers well tested alternative pedagogical approaches based on research insights largely originating from actual classroom based practice

Asian Migration and Education Cultures in the Anglosphere Megan Watkins, Christina Ho, Rose Butler, 2019-03-27 Asian migration and mobilities are transforming education cultures in the Anglosphere prompting mounting debates about tiger mothers and dragon children and competition and segregation in Anglosphere schools This

book challenges the cultural essentialism which prevails in much academic and popular discussion of Asian success and in relation to Asian education mobilities As anxiety and aspiration within these spaces are increasingly ethnicised the children of Asian migrants are both admired and resented for their educational success This book explores popular perceptions of Asian migrant families through in depth empirically informed accounts on the broader economic social historical and geo political contexts within which education cultures are produced This includes contributions from academics on global markets and national policies around migration and education classed trajectories and articulations local formations of ethnic capital and transnational assemblages that produce education and mobility as means for social advancement At a time when our schooling systems and communities are undergoing rapid transformations as a result of increasing global mobility this book is a unique and important contribution to an issue of pressing significance This book was originally published as a special issue of the Journal of Ethnic and Migration Studies

High-Stakes Testing in Education Theo J.H.M

Eggen, Gordon Stobart, 2015-10-14 High stakes educational testing is a global phenomenon which is increasing in both scale and importance Assessments are high stakes when there are serious consequences for one or more stakeholders Historically tests have largely been used for selection or for providing a licence to practise making them high stakes for the test takers Testing is now also used for the purposes of improving standards of teaching and learning and of holding schools accountable for their students results These tests then become high stakes for teachers and schools especially when they have to meet externally imposed targets More recent has been the emergence of international comparative testing which has become high stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries In this book we draw on research which examines each of these uses of high stakes testing The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise To underline the international appeal of high stakes testing the studies are drawn from Australia Africa the Caribbean Europe former Soviet republics and North America Collectively they illustrate the power of high stakes assessment in shaping for better or for worse policy making and schooling This book was originally published as a special issue of Assessment in Education Principles Policy Practice
