Valencia,2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author

and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino/Latina students. He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory, an asset-based perspective, and a systemic inequality approach. By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools, Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps. Following each of these concerns, Valencia provides a number of reform suggestions that can lead to systemic transformations of K-12 education. *Students of Color and the Achievement Gap* makes a persuasive and well-documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political, economic, and cultural frameworks.

**The Politics and Governance of Basic Education** Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-09-05. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world, economic inclusion has risen to the top of the development discourse. A well-performing education system is central to achieving inclusive development, but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased, but quality remains low, with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making progress, combining practical steps to achieve incremental gains to re-orient the system towards learning.

*An Age of Accountability* John L. Rury, 2023-10-13. *An Age of Accountability* highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century, the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps, which repeatedly failed to materialize. But even after very clear disappointments, no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide, especially in the public sector. As a consequence, many Americans continue to believe that accountability remains a vital necessity, even if educators and policy scholars disagree.

**Environmental Finance and Green Banking** Samsul Alam, Sergey Sosnovskikh, 2023-05-31

Environmental finance and green banking are central drivers of the transition to a sustainable economy and essential components in solutions to climate change. This book presents the latest research on theory and practices in these interdisciplinary fields incorporating both public and corporate finance. It introduces three parts: environmental investing and financing, green banking, and environmental policies in the public sector. The book explores the current trends, dynamics, and ways forward for environmental finance and green banking, including fundamental theories (e.g., environmental Kuznets curve) and comparisons between traditional and green bond efficiency, corporate governance practices and disclosure, green central banking, climate finance, sustainable strategies, green Islamic banking, and public climate fund management in multi-country contexts. The contributors to this book highlight significant challenges ahead while recognizing potential opportunities such as the revolution in green investments and trading in green bonds. This book is a welcome addition to the literature on environmental economics and finance and the economics of sustainability and climate change. Current questions and challenges in healthcare of the post-socialist countries Yuriy Timofeyev, Maria Kaneva, Galina Skvirskaya, 2023-09-08. The Common Core, an Uncommon Opportunity Judith K. March, Karen H. Peters, 2014. Because the Common Core requires bold action. Why? The Common Core: an Uncommon Opportunity. Why now? Because it tackles a largely overlooked component of implementation: how to redesign your instructional delivery system. K-12. And you'll have to if you don't: you'll be subject to the very same failure and frustration so many other districts and schools are experiencing. What's more, March and Peters describe how to integrate 21st Century Skills at the very same time. It will help district leaders develop structured, consistent, and organized teaching and learning practices. Make district-wide infrastructure adjustments for sustained reform. Use best practices for sustained achievement and continuous curriculum review. **Corporate Governance Matters** David Larcker, Brian Tayan, 2015-07-06. This is the most comprehensive and up-to-date reference for implementing and sustaining superior corporate governance. Stanford corporate governance experts David Larcker and Bryan Tayan carefully synthesize current academic and professional research, summarizing what is known and unknown and where the evidence remains inconclusive. **Corporate Governance Matters**, Second Edition, reviews the field's newest research on issues including compensation, CEO labor markets, board structure, succession, risk, international governance, reporting, audit, institutional and activist investors, governance ratings, and much more. Larcker and Tayan offer models and frameworks demonstrating how the components of governance fit together with updated examples and scenarios illustrating key points. Throughout, their balanced approach is focused strictly on two goals: to get the story straight and to provide useful tools for making better, more informed decisions. This edition presents new or expanded coverage of key issues ranging from risk management and shareholder activism to alternative corporate governance structures. It also adds new examples, scenarios, and classroom elements, making this text even more useful in academic settings. For all directors, business leaders, public policymakers, investors, stakeholders, and MBA faculty and students concerned with effective corporate governance. **Improving Animal**

**Welfare through Genetic Selection** Wendy Mercedes Rauw, 2016-07-12 In livestock species breeding goals are aimed primarily at improvement of production traits However there are a number of examples where selection for high production efficiency has resulted in reduced welfare through unfavorable outcomes in health and fitness characteristics These effects raise questions about what is ethically acceptable in animal breeding Welfare problems may be experienced when physiological balance is disturbed by genetic selection for high production alone by a mismatch between the environmental challenges and the range of coping responses available to an animal or from a mismatch between the animal's needs and their degree of satisfaction This may be resolved by either improving the environment to support the animal but also by providing the animal through genetic selection with means to adapt to the production environment The Standing Committee of the European Convention for the Protection of Animals kept for Farming Purposes emphasizes that breeding goals should include health and welfare The Farm Animal Welfare Council pleads for a greater emphasis in breeding programs on traits associated with good welfare However although breeding goals in most farm animal species have been broadened beyond production traits to include functional traits behavioral traits are rarely included despite their potential to improve animal production and welfare It is the goal of the present Research Topic to bring together experimental and theoretical research focusing on the genetics of welfare traits and the possibility to improve animal welfare through selection This topic presents an overview of the relationship between selection for high production and livestock robustness examples of improving robustness through the introduction of novel traits in livestock breeding and a discussion on selection methods to address welfare issues The discussion on sustainability of breeding practices is very alive today and will remain to be an important part of the debate in the future *The Annalist*, 1938 *Bulletin of the Atomic Scientists*, 1995-09 **New Antimicrobial Peptides From Bacteria/Invertebrate Obligate Symbiotic Associations** András Fodor, Eustachio Tarasco, Selcuk Hazir, David Clarke, Adler Ray Dillman, 2022-03-30 *Ageism* Tay McNamara, John Williamson, 2019-05-24 Ageism Past Present and Future presents perspectives for understanding ageism and puts ageism in the context of specific social institutions McNamara and Williamson uniquely provide a number of complementary ways to understand ageism including social and psychological theories of ageism economic development ageism as frame or lens and ageism at the intersection of various social categories such as gender and race They then put ageism in the context of mass media health care employment and public policy This short text is an ideal addition to courses on sociology of aging social policy and social problems *Harvest of Fish and Wildlife* Kevin L.
