Unconscious Crime Joel Peter Eigen,2004-12-01 A sleepwalking homicidal nursemaid a morally vacant juvenile poisoner a man driven to arson by a lesion of the will an articulate and poised man on trial for assault who while conducting his own defense undergoes a profound

personality change and becomes a wild and delusional alter. These people are not characters from a mystery novelist's vivid imagination but rather defendants who were tried at the Old Bailey, London's central criminal court in the mid nineteenth century. In *Unconscious Crime*, Joel Peter Eigen explores these and other cases in which defendants did not conform to any of the Victorian legal system's existing definitions of insanity yet displayed convincing evidence of mental aberration. Instead they were or claimed to be missing, absent or unconscious, lucid though unaware of their actions. Based on extensive research in the Old Bailey Sessions Papers, verbatim courtroom narratives taken down in shorthand during the trial and sold on the street the following day, Eigen's book reveals a growing estrangement between law and medicine over the legal concept of the Person as a rational and purposeful actor with a clear understanding of consequences. The M'Naughtan Rules of 1843 had formalized the Victorian insanity plea, guiding the courts in cases of alleged delusion and derangement. But as Eigen makes clear in the cases he discovered, even though defense attorneys attempted to broaden the definition of insanity to include mental absence, the courts and physicians who testified as experts were wary of these novel challenges to the idea of human agency and responsibility. Combining the colorful intrigue of courtroom drama and the keen insights of social history, *Unconscious Crime* depicts Victorian England's legal and medical cultures confronting a new understanding of human behavior and provocatively suggests these trials represent the earliest incarnation of double consciousness and multiple personality disorder.

The Films of James Cameron Matthew Wilhelm Kapell, Stephen McVeigh, 2011-09-29 Among the most expensive and most profitable films of all time, the works of James Cameron have had a profound effect upon popular culture and the technology of moviemaking. Yet the very blockbuster nature of his films means that the political commentary, cultural discourse and rich symbolism within the works are often overlooked. From *The Terminator* to *Avatar*, the director has evinced a persistence of themes, concerns and visions that capture the contemporary zeitgeist. This collection of essays on James Cameron's films, written by a diverse group of scholars from a wide range of disciplines, provides a comprehensive exploration of the work and legacy of one of America's foremost filmmakers.

Beyond The Occult: Twenty Years' Research into the Paranormal Colin Wilson Author, 2013-01-01 Twenty years after writing the classic *The Occult*, Colin Wilson re-examines the whole spectrum of the mystical and paranormal, producing a general occult theory that is as convincing and powerful as the evidence for the existence of atomic particles. A huge amount of new material has come to light in the past two decades, revealing new perspectives on many aspects of this crucially important subject. Linking fascinating glimpses into the realm of the paranormal with scientific thinking on the nature of physical reality, he begins his study with the powers of the human mind: ESP, clairvoyance, psychometry, precognition, psychokinesis and dowsing. He then moves on to consider the more mysterious topics: poltergeists, spirit possession and reincarnation, that have convinced him of the reality of disembodied spirits. In *Beyond the Occult*, Colin Wilson puts forward a powerful case that our so-called normal experience may in fact be subnormal and that evolution may have brought us near the edge of a quantum leap into a hugely

expanded human consciousness *Experiential Consciousness and the Nature of Human Identity* Vitor Jose F. Rodrigues, 2022-12-13 Consciousness is hard to bring to the laboratory as it confronts us with a classic dilemma can a mind observe itself However who then is observing the observer Without experiential awareness culture the arts science and philosophy would not make sense Would it make sense if refrigerators were to produce a refrigerator culture without the experience of freezing food Virtually all human culture is destined to provide conscious experiences This volume provides a rich array of views on human nature and the way it shows up in the strange land of human identity *Otaku Hiroki Azuma*, 2009 Printbegr nsninger Der kan printes 10 sider ad gangen og max 40 sider pr session **New York Times Saturday Review of Books and Art** ,1981 **People Who Don't Know They're Dead** Gary Leon Hill, 2025-09-12 In *People Who Don't Know They're Dead* Gary Leon Hill tells a family story of how his Uncle Wally and Aunt Ruth Wally's sister came to counsel dead spirits who took up residence in bodies that didn't belong to them And in the telling Hill elucidates much of what we know or think we know about life death consciousness and the meaning of the universe When people die by accident in violence or maybe they're drunk stoned or angry they get freeze framed Even if they die naturally but have no clue what to expect they might not notice they're dead It's frustrating to see and not be seen It's frustrating not to know what you're supposed to do next It's especially frustrating to be in someone else's body and think it's your own That's if you're dead If you're alive and that spirit has attached itself to you well that's a whole other set of frustrations Wally Johnston a behavioral psychologist first started working with a medium in the 70s to help spirits move on to the next stage Some years after that Ruth Johnston an academic psychiatric nurse who'd become interested in new consciousness and alternative healing began working with Wally to clear spirits who weren't moving on These hitchhikers had attached themselves to the auras of living relatives or strangers in an attempt to hold on to a physical existence they no longer need Through her pendulum Ruth obtains permission from the higher self of both hitchhiker and host to work with them Then Wally speaks with them gently but firmly to make sure they know they are no longer welcome to inhabit the bodies and wreak havoc on the lives of the living Hill has woven this fascinating story with the history and theory of what happens at death with particular emphasis on the last 40 years and the work of such groundbreaking thinkers as Elmer Green Raymond Moody William James Aldous Huxley Edith Fiore Martha Rogers Mark Macy Elisabeth Kubler Ross Bruce Lipton and a host of others whose work helps inform our idea of what it is to live and to die As it turns out our best defense against hitchhikers is to live consciously And our best chance of doing that is by paying attention and staying open to possibilities **Divided Minds and Successive Selves** Jennifer Radden, 1996 TABLE OF CONTENTS 1 heterogeneities of self in everyday life 2 a language of successive selves 3 multiplicity through dissociation 4 succession and recurrence outside dissociative disorder 5 From abnormal psychology to metaphysics a methodological preamble 6 memory responsibility and contrition 7 purposes and discourses of responsibility ascription 8 multiplicity and legal culpability 9 paternalistic intervention 10 responsibilities over

Mind over Mind Morton Klass, 2004-09-01 Mind Over Mind explores the phenomenon of spirit possession from both anthropological and psychological perspectives Spirit possession is ritually important in many cultures from India to Brazil to Madagascar but has tended to be narrowly regarded from modern American and European perspectives as a psychopathological problem of multiple personality disorder This book proposes an integration of anthropological and psychological approaches concluding with a new analytical framework for understanding spirit possession and resolving the controversy surrounding the reality of possession The issues raised are thus essential to both the anthropology of religion and the psychology of altered states of consciousness At the same time Mind over Mind confronts the most challenging philosophical issues of human consciousness and human identity which can not be properly formulated without the insights of social and cultural anthropology At the most general level this study argues for the unequivocal importance of an interdisciplinary approach to spirit possession and for the integral significance of anthropology for the other human sciences

Billy Milligan Daniel Keyes, 2001 **Horror on the Brain** Austin Lim, 2025-04-08 A fascinating exploration of the science and psychology behind fear madness and the haunting stories that linger in our minds Scientists throughout centuries have mined the depths of humanity looking for and finding answers to life's most mysterious questions but perhaps the most memorable accounts of hidden dimensions have been left to us by science fiction writers like Philip K Dick and Octavia Butler When science discovers science fiction writers ask what's next Horror on the Brain reveals the real science and psychology behind science fiction's most iconic characters from Mary Shelley's Dr Frankenstein to the doctors of H P Lovecraft and even today's horror blockbusters like Get Out and The Last of Us In this fascinating exploration of fear and madness neuroscientist Dr Austin Lim recounts psychology's most bizarre and haunting real life cases alongside famous speculative fiction that stretched that science to the edge In 1924 Hans Berger invented the EEG a commonly used brain imaging device as a means to telepathically communicate with his sister eerily similar to the protagonist in H P Lovecraft's Beyond the Wall of Sleep while Nobel Prize winning research on marine animals in the 1960s reflects his tentacled creations Phineas Gage the 19th century man who experienced a dramatic personality shift following a traumatic brain injury shares similarities to Robert Louis Stevenson's Dr Jekyll Investigate the neurological causes of schizophrenia and how characters in Sheridan Le Fanu's story In a Glass Darkly manifest the diagnosis Neurological conditions from sleepwalking to the Cotard delusion which leads patients to believe they are dead even going to such extremes as burying themselves alive have provided the basis for horror stories since their discovery and likewise the wildly imaginative minds of writers have even
