The Sparrow The Sparrow 1 By Mary Doria Russell:

Religions and Extraterrestrial Life David A. Weintraub, 2014-07-16 In the twenty first century the debate about life on other worlds is quickly changing from the realm of speculation to the domain of hard science Within a few years as a consequence of the rapid discovery by astronomers of planets around other stars astronomers very likely will have discovered clear evidence of life beyond the Earth Such a discovery of extraterrestrial life will change everything Knowing the answer as to whether humanity has company in the universe will trigger one of the greatest intellectual revolutions in history not the least of which will be a challenge for at least some terrestrial religions Which religions will handle the discovery of extraterrestrial life with ease and which will struggle to assimilate this new knowledge about our place in the universe Some religions as currently practiced appear to only be viable on Earth Other religions could be practiced on distant worlds but nevertheless identify both Earth as a place and humankind as a species of singular spiritual religious importance while some religions could be practiced equally well anywhere in the universe by any sentient beings Weintraub guides readers on an invigorating tour of the world s most widely practiced religions It reveals what if anything each religion has to say about the possibility that extraterrestrial life exists and how or if a particular religion would work on other planets in distant parts of the universe

Between Human and Divine Mary Reichardt, 2010 An introduction to recent and emerging Catholic literary works and artists [The Call to Holiness](#) Richard M. Gula, 2003 The Call to Holiness was inspired by the fundamental conviction that spirituality without morality is disembodied and morality without spirituality is rootless In other words our moral life arises out of our spirituality to become its public face Furthermore what we do to nurture our spirituality through spiritual practices can and ought to have an effect on our moral practices In the end spirituality and morality converge when we consider life as a whole rather than simply focus on individual actions in the moral life or devotional practices in the spiritual life BOOK JACKET Title

Exophilosophy Richard Playford, 2024-12-09 This volume addresses philosophical questions raised by the possibility of alien life and extraterrestrial intelligence The different philosophical perspectives and approaches presented across the chapters will provide a foundation for future work on exophilosophy Interest in space exploration and alien life has never been greater In popular culture for example it has proven a persistent theme in science fiction films e.g. Star Trek Star Wars books e.g. H.G. Wells Arthur C. Clarke Ray Bradbury and computer games e.g. Sid Meier's Alpha Centauri as well as bestselling non-fiction books von Däniken's multimillion selling

Chariots of the Gods and hit documentary shows e g Ancient Aliens There has also been persistent interest in these topics amongst scientists with organizations such as NASA and SETI having an enormous impact on both the scientific and popular imagination Yet curiously the topic has received relatively little philosophical attention Whilst certain aspects of these topics remain within the proper purview of the sciences a host of philosophical questions are raised by the possibility of alien life and extraterrestrial intelligences and the possibility of our coming into contact with them This collection of essays will examine some of these questions whilst laying the groundwork for future study in an as yet under researched area of philosophy Exophilosophy is essential reading for scholars and students with an interest in space and philosophy especially those working in philosophy of science metaphysics epistemology ethics philosophy of language and philosophy of religion

Religion in Science Fiction Steven Hrotic, 2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction s metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist

The Latinx Files Matthew David Goodwin, 2021-05-14 In *The Latinx Files* Matthew David Goodwin traces how Latinx science fiction writers are reclaiming the space alien from its xenophobic legacy in the science fiction genre The book argues that the space alien is a vital Latinx figure preserving Latinx cultures by activating the myriad possible constructions of the space alien to represent race and migration in the popular imagination The works discussed in this book including those of H G Wells Gloria Anzald a Junot Diaz Andr M Carrington and many others often explicitly reject the derogatory correlation of the space alien and Latinxs while at other times they contain space aliens that function as a source of either enlightenment or horror for Latinx communities Throughout this nuanced analysis *The Latinx Files* demonstrates how the character of the space alien has been significant to Latinx communities and has great potential for future writers and artists

Creative Encounters, Appreciating Difference Sam Gill, 2018-11-15 Across the world from personal relationships to global politics differences cultural religious racial gender age ability are at the heart of the most disruptive and disturbing concerns While it is laudable to nurture an environment promoting the tolerance of difference

Creative Encounters Appreciating Difference argues for the higher goal of actually appreciating difference as essential to creativity and innovation even if often experienced as stressful and complex. Even encounters that are apparently harmful and negatively valued arguments conflict with oppression usually heighten the potential for creativity innovation movement action and identity. Drawing on classic encounters that have played a significant role in the founding of the academic study of religion and the social sciences this book explores in some depth the dynamics of encounter to reveal both its problematic and creative aspects and to develop perspectives and strategies to assure encounters both include the appreciation of difference and also are recognized as creative and innovative. The two examples most extensively considered show that the academic study of the peoples indigenous to North America and to Australia involved creative constructions concoctions of primary examples in order to establish and give authority to academic theories and definitions. Rather than damning these examples as bad scholarship this book considers them to be encounters engendering creative constructions that are distinctive to academia yet their potential for harm must be understood. Most important to the book is a persistent development of perspectives and strategies for understanding and approaching encounters in order to assure the appreciation of difference is accompanied by the potential for creativity and innovation. Specific perspectives and strategies are related to naming moving gesture and play and particularly relevant to religion the development of an aesthetic of impossibles. Since these historical examples engage highly relevant present concerns the distinction of real and fake truth and lie map and territory the threading essays show how these more or less classic examples might contribute to appreciating these contemporary concerns that are generated in the presence of difference.

The Standing Dead Ricardo Pinto, 2010-08-31 THE ACCLAIMED SEQUEL TO THE CHOSEN In desperation the Ruling Lord Suth searches within the sacred walls of Osrakum for Carnelian his son and Osidian the God Emperor elect. He suspects the Empress Ykoriana is behind their disappearance and knows that if they are not found soon it is her other son Osidian's brother Molochite who will rule with fearful consequences for the Three Lands. Captive of the tribes of the Earthsky Carnelian is for the moment safe and succumbs readily to the seasonal rhythms of tribal life. He is convinced by unexpected discoveries that it is fate that has brought him there. He grows to love these simple people and hopes for sanctuary among them. But the dark forces Carnelian helped unleash in Osrakum begin to cast their shadow over his adopted home. He is witness to the awful oppression that the Masters whom the tribesmen call the Standing Dead have been inflicting on them for millennia. But even more terrible is the presence Carnelian has unwittingly brought with him. Potent and terrifying it threatens everything he now holds dear in this new found world. With The Standing Dead Ricardo Pinto gives us a tumultuous new chapter in the Stone Dance of the Chameleon trilogy and confirms his place as one of fantasy's most singular and literate voices.

The Gospel According to Science Fiction Gabriel McKee,2007-01-01 Explores the theological nature of science fiction drawing on examples from television literature and films to explain how science fiction can help people understand not only who they are but who they will become *Governance of the Global and Extra-Terrestrial Commons* Michael Roe,2023-06-26 This book provides a unique analysis of the complex relationship between governance and the global commons It has a specific reference to the dynamic and growing outer space economy and society and how experience in the maritime sector which exhibits many of the same issues and challenges as outer space can be useful in suggesting moves forward in policy making and design This book fills a large gap in the literature of both governance and the development of outer space Whilst the maritime sector has a long history of debate albeit little in terms of governance and policy making outer space has much less and what there has been commonly focused upon technical considerations The importance of this book is that the failures of maritime governance need to be avoided in the outer space sector which exhibits many of the same issues particularly those related to the global commons Innovative and exciting this book will be of interest to academics studying corporate governance business management and space capitalism
