**The Way of Coyote** Gavin Van Horn,2018-10-05 Stories of how the paths of people and wildlife cross and merge and how if we attend to each other s needs we may all enjoy a brighter urban future The Wall Street Journal With The Way of Coyote Gavin Van Horn reveals the stupendous diversity of species that can flourish in urban landscapes like Chicago That isn t to say city living is without its challenges Chicago has been altered dramatically over a relatively short timespan its soils covered by concrete its wetlands drained and refilled its river diverted and made to flow in the opposite direction The stories in The Way of Coyote occasionally lament lost abundance but they also point toward incredible adaptability and resilience such as that displayed by beavers plying the waters of human constructed canals or peregrine falcons raising their young atop towering skyscrapers Van Horn populates his stories with a remarkable range of urban wildlife and probes the philosophical and religious dimensions of what it means to coexist drawing frequently from the wisdom of three unconventional guides wildlife ecologist Aldo Leopold Taoist philosopher Lao Tzu and the North American trickster figure Coyote Ultimately Van Horn sees vast potential for a more vibrant collective of ecological citizens as we take

our cues from landscapes past and present Part urban nature travelogue part philosophical reflection on the role wildlife can play in waking us to a shared sense of place and fate The Way of Coyote is a deeply personal journey that questions how we might best reconcile our own needs with the needs of other creatures in our shared urban habitats **The Routledge Companion to Landscape Studies** Peter Howard,Ian Thompson,Emma Waterton,Mick Atha,2013-02-15 Landscape is a vital synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world such as climate change social alienation environmental degradation loss of biodiversity and destruction of heritage As a concept landscape does not respect disciplinary boundaries Indeed many academic disciplines have found the concept so important it has been used as a qualifier that delineates whole sub disciplines landscape ecology landscape planning landscape archaeology and so forth In other cases landscape studies progress under a broader banner such as heritage studies or cultural geography Yet it does not always mean the same thing in all of these contexts The Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of landscape The Companion contains thirty nine original contributions from leading scholars within the field which have been divided into four parts Experiencing Landscape Landscape Culture and Heritage Landscape Society and Justice and Design and Planning for Landscape Topics covered range from phenomenological approaches to landscape to the consideration of landscape as a repository of human culture from ideas of identity and belonging to issues of power and hegemony and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local national and international policy in relation to landscape This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology archaeology cultural studies geography landscape planning landscape architecture countryside management forestry heritage studies ecology and fine art It serves as an invaluable point of reference for scholars researchers and graduate students alike engaging in the field of landscape studies **Breaking the Mould** Rob Barnard,Natasha Daintry,Clare Twomey,2007 The international ceramics scene is enjoying the highest profile it has had for many years Breaking the Mould looks at ceramic artists working within this versatile medium Drawing on the rich history of pottery these artists are pushing the techniques objectives and perceptions of the medium into new exciting territory The book profiles the work of over 70 ceramicists including Suzanne King Simon Fell Grayson Perry Barnaby Barford Carina Ciscato and Amy Houghton Their work ranges from interpretations of utilitarian pots to abstract sculpture and a revisioning of kitch porcelain ornaments all of which are brought to life in beautiful colour reproductions Essays by prolific makers and academics look at the history and inspirations behind the medium today Following in the footsteps of New Directions in

**Winged Worlds** Olga Petri, Michael Guida, 2023-06-26 This edited collection explores our often surprising modes of co inhabiting the cultural and aerial worlds of birds It focuses on our encounters with non captive birds and the cultural geographies of feathered flight This book offers a timely contribution to the more than human geographies of flight space and territory The chapters support an ethics of attention as a new basis for the conservation and cultivation of aerial habitats Contributions adopt an interdisciplinary approach to the patterns of intrusion and escape that shape our encounters with birds and unsettle our traditionally terrestrial concepts of space Each chapter focuses on a different aspect of our shared lives with birds ranging from scientific observation to the social media enabled spectacle of co habitation and spatial competition Written in a thought provoking style this book seeks to address a dearth of critical perspectives on the cultural geographies of flight and its implications for the ways in which we understand common spaces around and above us in the context of any effort at conservation *Methods in Human-Animal Studies* Annalisa Colombino, Heide K.

Bruckner, 2023-06-07 This timely book provides a methodological guide for how to conduct and theorise research in human animal studies In response to critiques of the anthropomorphic slant to human animal research and the increasing political relevance of animals in contemporary environmental debates this book emphasises methods which bring to light the animal side of multispecies encounters Drawing from the interdisciplinary strength of human animal studies this book contains contributions from practitioners and scholars working in sociology anthropology ethology and geography Each chapter uses a case study approach to present a theoretical framework and empirical application of cutting edge methods in human animal studies from creative writing in multispecies ethnographies to visual methods like videography and body mapping Organized in three parts theorizing collaborating visualizing the book equips readers with methodological tools to conduct human animal studies research attentive to animal lives Furthermore chapters reflect on the opportunities limitations and ethical considerations of research that seeks to understand our more than human worlds The book is aimed towards undergraduate and graduate students in human animal studies and scholars investigating human animal relations It will also be of interest to practitioners and policy makers who engage with conservation wildlife management or the human animal interface of urban and regional planning *Neighborhood Hawks* John Lane, 2019-04 After reading J A Baker s fifty year old British

nature classic *The Peregrine* John Lane found himself an ocean away stalking resident red shouldered hawks in his neighborhood in Spartanburg South Carolina What he observed was very different from what Baker deduced from a decade of chronicling the lives of those brooding migratory raptors Baker imagined a species on the brink of extinction because of the use of agricultural chemicals on European farms A half century later in America Lane found the red shouldered hawks to be a stable Anthropocene species adapted to life along the waterways of a suburban nation Lane watched the hawks for a full

year and along the way made a pledge to himself Anytime he heard or saw the noisy nonmigratory hawks in his neighborhood he would drop whatever he was doing and follow them on foot on bike or in his truck The almanac that results from this discipline considers many questions any practiced amateur naturalist would ask such as where and when will the hawks nest what do they eat what are their greatest threats and what exactly are they communicating through those constant multintoned cries Lane s year following the hawks also led him to try to answer what would become the most complex question of all why his heart like Baker s goes out so fully to wild things

Seasons of Storm and Wonder Jim Crumley, 2022-09-08 From Jim Crumley the pre eminent Scottish nature writer Guardian this landmark volume documents the extraordinary natural life of the Scottish Highlands and bears witness to the toll climate chaos is taking on its wildlife habitats and biodiversity laying bare what is at stake for future generations In this landmark volume Jim Crumley brings together a sweeping five year quest to document the seasons and how he has seen them change It explores the damage to the Earth s natural rhythms but also relishes the enduring beauty and wonder of nature itself Drawing on his studies of each season over more than thirty years and reworking the volumes in his best selling Seasons quartet Crumley has created this unique account of our natural world today After a lifetime of immersing himself in the landscapes of Scotland and a handful of other northern countries Crumley has amassed a body of knowledge and insight and a bank of memorable imagery Combining lyrical prose and passionate eloquence he lays bare the impact of an increasingly chaotic climate and urges us all towards a more daring conservation vision that embraces everything from the mountain treeline to a second spring for the wolf

**The Nature of Spring** Jim Crumley, 2023-02-28 Third in the Wainwright Prize listed Seasons Tetralogy Spring marks the genesis of nature s year As Earth s northern hemisphere tilts ever more towards the life giving sun the icy dark days of winter gradually yield to the new season s intensifying light and warmth Nature responds For our flora and fauna for the very land itself this is the time of rebirth and rejuvenation although as Jim Crumley attests spring in the Northlands is no Wordsworthian idyll Climate chaos and its attendant unpredictable weather brings high drama to the lives of the animals he observes the badgers seals and foxes the seabirds and the raptors But there is also a wild elemental beauty to the highlands and islands a sense of nature in animation during this the most transformative of seasons Jim chronicles it all the wonder the tumult the spectacle of spring
