The Myths We Live By By Mary Midgley:

The Myths We Live by Mary Midgley, 2004 *The Myths We Live By* is a powerful clearly written book that shows us what goes wrong when we try to apply the metaphors of science to the problems of our lives Essential reading for anyone concerned about how to understand the world today **The Myths We Live by** Mary Midgley, 2003 [The Myths We Live By](#) Mary Midgley, 2011-04 Mary Midgley argues in this powerful book that far from being the opposite of science myth is a central part of it [Myths We Live by](#) Colin Grant, 1998 Colin Grant challenges the popular use of myth as a dismissive designation of the superstitions and falsehoods of other cultures The author maintains that myths occupy a place in our present day lives that is every bit as important to us as the divinities and heroes of classical antiquity were to the ancients The myths themselves are in a constant state of flux and transformation They ebb and flow both within the context of wider culture and individual experience Published in English *The Sparkle from the Coal* Barbara Howard, 2024-10-31 Perhaps one of the least appreciated aspects of Rowan Williams is his theology of imagination Seeking to fill this gap this book explores the imaginative impulse operative in Rowan Williams theology and poetry which centres around the notion of divine desire and the way in which imagination can reveal possibility even in the bleakest of circumstances Drawing on his poetic work as well as his theological writing the book explores how Williams theology leads us to a fresh understanding of the ways in which the renewing and enabling energy of the Holy Spirit is ever active within and beyond the Church in enabling human imaginations to cooperate with the divine energy of love in bringing creation to fulfilment [The Essential Mary Midgley](#) Mary Midgley, 2005 This anthology includes carefully chosen selections from her best selling books including *Wickedness* *Beast and Man* *Science and Poetry* and *The Myths We Live By* An unrivalled introduction to a great philosopher and includes a *American Government* Alan R. Gitelson, Robert L. Dudley, Melvin J. Dubnick, 2017-01-27 What students think they know about politics is often based on common myths Rather than dismissing those myths as outright falsehoods this text encourages students to confront their preconceived notions in order to think critically about government and politics Clearly and distinctively woven into each chapter the myths and realities theme provides a pedagogical framework that engages students with interesting problems while effectively covering the core concepts of American government [Philosophy as Practice in the Ecological Emergency](#) Lucy Weir, 2023-03-30 This book argues that philosophy is as practical as plumbing and what we need right now is what philosophers can offer as philosophers to help us all our species and beyond through this ecological emergency this climate change this anthropocene This book is about the meaning and purpose of philosophy as a way of a practice of responding to the ecological emergency which includes climate change biodiversity loss pollution habitat destruction and all the associated impacts that fragment and threaten to create collapse among the systems that created and sustain us There are the related economic and social impacts the fragmentation of communities and political ideologies through attitude polarisation and the increasing threats to systems by those who seek to promote further exploitation at the

expense of attempts to regain some system of cooperation and an attitude of compassion which is at the heart of our survival strategies as a species Philosophy has always sought to address questions related both to our place in the universe and to how to live given our understanding of our place Those of us committed to a philosophical life have used a range of metaphors and narratives to enlighten and to exhort to action those who would seek to understand what to do how and why Philosophy has played a key role in helping us as a species to respond to the ecological emergency What then is the practice of philosophy given that we re in an ecological emergency This question is the thread and it forms the framework for the dialogue that runs through the book *Theory of World Security* Ken Booth,2007-12-20 What is real What can we know How might we act This book sets out to answer these fundamental philosophical questions in a radical and original theory of security for our times Arguing that the concept of security in world politics has long been imprisoned by conservative thinking Ken Booth explores security as a precious instrumental value which gives individuals and groups the opportunity to pursue the invention of humanity rather than live determined and diminished lives Booth suggests that human society globally is facing a set of converging historical crises He looks to critical social theory and radical international theory to develop a comprehensive framework for understanding the historical challenges facing global business as usual and for planning to reconstruct a more cosmopolitan future Theory of World Security is a challenge both to well established ways of thinking about security and alternative approaches within critical security studies *The Earth Is Our Home* Nelson Rivera,2016-11-14 This book demonstrates that Mary Midgley s philosophy of evolution points the way towards considering the earth as our only true home since we are products of this planet and its evolving and complex life along with every other organism From the knowledge of ourselves as knowing animals with a biological as well as a cultural history Midgley proposes the elaboration of an evolutionary epistemology that situates us firmly on the earth together with other creatures while at the same time helping us to build knowledge of the world from the complexity of the human experience I like to call this approach by a known theological analogy a view from below that is from the underside of the world from the realms of nature and history Such an approach does not begin by assuming conceptions of design or order in nature a view that we term from above although it does not rule out the possibility of teleological or metaphysical constructions of reality in the long run This down to earth approach I consider essential for any philosophy or theology that wants to take evolutionary theory seriously while committed to a proper and non dismissive assessment of religious views **Plato and the Mythic Tradition in Political Thought** Tae-Yeoun Keum,2020-12-08 Winner of the Gustave O Arlt Award in the Humanities Winner of the Istvan Hont Book Prize An ambitious reinterpretation and defense of Plato s basic enterprise and influence arguing that the power of his myths was central to the founding of philosophical rationalism Plato s use of myths the Myth of Metals the Myth of Er sits uneasily with his canonical reputation as the inventor of rational philosophy Since the Enlightenment interpreters like Hegel have sought to resolve this tension by treating Plato s myths as mere regrettable embellishments

irrelevant to his main enterprise Others such as Karl Popper have railed against the deceptive power of myth concluding that a tradition built on Platonic foundations can be neither rational nor desirable Tae Yeoun Keum challenges the premise underlying both of these positions She argues that myth is neither irrelevant nor inimical to the ideal of rational progress She tracks the influence of Plato's dialogues through the early modern period and on to the twentieth century showing how pivotal figures in the history of political thought More Bacon Leibniz the German Idealists Cassirer and others have been inspired by Plato's mythmaking She finds that Plato's followers perennially raised the possibility that there is a vital role for myth in rational political thinking

Eschatology and the Technological Future Michael S. Burdett, 2014-12-05 The rapid advancement of technology has led to an explosion of speculative theories about what the future of humankind may look like These technological futurisms have arisen from significant advances in the fields of nanotechnology biotechnology and information technology and are drawing growing scrutiny from the philosophical and theological communities This text seeks to contextualize the growing literature on the cultural philosophical and religious implications of technological growth by considering technological futurisms such as transhumanism in the context of the long historical tradition of technological dreaming Michael Burdett traces the latent religious sources of our contemporary technological imagination by looking at visionary approaches to technology and the future in seminal technological utopias and science fiction and draws on past theological responses to the technological future with Pierre Teilhard de Chardin and Jacques Ellul Burdett's argument arrives at a contemporary Christian response to transhumanism based around the themes of possibility and promise by turning to the works of Richard Kearney Eberhard Jüngel and Jürgen Moltmann Throughout the author highlights points of correspondence and divergence between technological futurisms and the Judeo-Christian understanding of the future

Western Imaginings Rohan Davis, 2018 Wahhabism is often understood as a radical version of Islam responsible for inspiring and motivating Islamic terrorism In contrast to the existing literature that treats Wahhabism as a historical phenomenon or a monolithic theological ideology a literature often written by authors keen to promote geopolitical interests or with ideological axes to grind Western Imaginings The Intellectual Contest to Define Wahhabism considers Wahhabism as a discursive construct crafted and popularized by a Western intellectual elite This comprehensive study speaks to how and why Western intellectuals have chosen to represent Wahhabism in specific ways

Technology and the Trajectory of Myth David Grant, Lyria Bennett Moses, 2017-12-29 This book presents an entirely new way of understanding technology as the successor to the dominant ideologies that have underpinned the thought and practices of the Western world Like the preceding ideologies of Deity State and Market technology displays the features of a modern myth promising to deal with our existential concerns on condition of our subjection to them Utilising robust empirical evidence Lyria Bennett Moses and David Grant argue that the pathway out of this mythological maze is the production of means to establish a new sense of political corporate and personal self responsibility

Educational Research: Why 'What Works' Doesn't Work Paul

Smeyers, Marc Depaepe, 2007-01-07 Education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations All over the world and particularly in the English speaking countries governments look for means of improving student achievement as measured by standardized test scores Although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good education Also the research on which they are based is not the only legitimate way to do educational research Social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role In this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory Beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip Freedom of inquiry in educational research can no longer be taken for granted Narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort This book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask How did we arrive at this place and Where is educational research heading The book illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science This book could not be more timely and important Nicholas C Burbules Grayce Wicall Gauthier Professor University of Illinois With research increasingly tied to State policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research Internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates Thomas S Popkewitz the University of Wisconsin Madison USA This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research **Imagining Outer Space**

Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the

book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age

Libraries, Literatures, and Archives Sas Mays, 2013-11-26 Not only does the library have a long and complex history and politics but it has an ambivalent presence in Western culture both a site of positive knowledge and a site of error confusion and loss Nevertheless in literary studies and in the humanities including book history the figure of the library remains in many senses under researched This collection brings together established and up and coming researchers from a number of practices literary and cultural studies gender studies book history philosophy visual culture and contemporary art with an effective historical sweep ranging from the time of Sumer to the present day In the context of the rise of archive studies this book attends specifically and meta critically to the figure of the library as a particular archival form considering the traits that constitute or fail to constitute the library as institution or idea and questions its relations to other accumulative modes such as the archive in its traditional sense the museum or the filmic or digital archive Across their diversity and in addition to their international standard of research and writing each chapter is unified by commitment to analyzing the complex cultural politics of the library form

Music, Myth and Story in Medieval and Early Modern Culture Katherine Butler, Samantha Bassler, 2019 The complex relationship between myths and music is here investigated Myths and stories offer a window onto medieval and early modern musical culture Far from merely offering material for musical settings authoritative tales from classical mythology ancient history and the Bible were treated as foundations for musical knowledge Such myths were cited in support of arguments about the uses effects morality and preferred styles of music in sources as diverse as theoretical treatises defences or critiques of music art sermons educational literature and books of moral conduct Newly written literary stories too were believed capable of moral instruction and influence and were a medium through which ideas about music could be both explored and transmitted How authors interpreted and weaved together these traditional stories or created their own reveals much about changing attitudes across the period Looking beyond the well known figure of Orpheus this collection explores the myriad stories that shaped not only musical thought but also its styles techniques and practices The essays show that music itself performed and created knowledge in ways parallel to myth and worked in tandem with old and new tales to construct social political and philosophical views This relationship was not static however as the Enlightenment dawned the once authoritative gods became comic characters and myth became a medium for ridicule Overall the book provides a foundation for exploring myth and story throughout medieval and early modern culture and facilitating further study into the Enlightenment and beyond

Pessimism in International Relations Tim Stevens, Nicholas Michelsen, 2019-06-29 This volume explores the past present and future of pessimism in International Relations It seeks to differentiate pessimism from cynicism and fatalism and assess its possibilities as a respectable perspective on national and international politics The book traces the origins of pessimism in political thought from antiquity through to the present day illuminating its role in key schools of International Relations and in the work of important international political theorists The authors analyse the resurgence of pessimism in contemporary politics such as in the new populism attitudes to migration indigenous politics and the Anthropocene This edited volume provides the first collection of scholarly work on pessimism in International Relations theory and practice and offers fresh perspectives on an intellectual position often considered as disreputable as it is venerable **How the Light**

Gets In Graham Ward, 2016 How the Light Gets In Ethical Life I presents a systematic account of the teachings of the Christian faith to offer a vision from a human created and limited perspective of the ways all things might be understood from the divine perspective It explores how Christian doctrine is lived and the way in which beliefs are not simply cognitive sets of ideas but embodied cultural practices Christians learn how to understand the contents of their faith learn the language of the faith through engagements that are simultaneously somatic affective imaginative and intellectual In the first of four volumes Graham Ward examines the complex levels of these engagements through three historical developments in the systematic organization of doctrine the Creeds the Summa and Protestant dogmatics He outlines a methodology for exploring and practicing systematic theology that captures how the faith is lived in cultural social and embodied engagements Ward then unpicks several fundamental theological concepts and how they are to be understood from the point of view of an engaged systematics truth revelation judgement discernment proclamation faith seeking understanding and believing as it relates to and grounds the possibilities for faith This groundbreaking work offers an interdisciplinary investigation through poetry art film the Bible and theological discourse analysing the human condition and theology as the deep dream for salvation The final part relates theology as a lived and ongoing pedagogy concerned with individual and corporate formation to biological life social life and life in Christ Here an approach to living theologically is sketched that is the primary focus for all four volumes ethical life
