Grasman, G. van Straten, 2012-12-06 Researchers in the

natural sciences are faced with problems that require a novel approach to improve the quality of forecasts of processes that are sensitive to environmental conditions Nonlinearity of a system may significantly complicate the predictability of future states a small variation of parameters can dramatically change the dynamics while sensitive dependence of the initial state may severely limit the predictability horizon Uncertainties also play a role This volume addresses such problems by using tools from chaos theory and systems theory adapted for the analysis of problems in the environmental sciences Sensitive dependence on the initial state chaos and the parameters are analyzed using methods such as Lyapunov exponents and Monte Carlo simulation Uncertainty in the structure and the values of parameters of a model is studied in relation to processes that depend on the environmental conditions These methods also apply to biology and economics For research workers at universities and semi governmental institutes for the environment agriculture ecology meteorology and water management and theoretical economists

### **Stochastic Phenomena and Chaotic Behaviour in Complex Systems**

Unesco,Austria. Bundesministerium für Wissenschaft und Forschung,1984 This book contains all invited contributions of an interdisciplinary workshop of the UNESCO working group on systems analysis of the European and North American region entitled Stochastic Phenomena and Chaotic Behaviour in Complex Systems The meeting was held at Hotel Winterthalerhof in Flattnitz Karnten Austria from June 6 10 1983 This workshop brought together some 20 mathematicians physicists chemists biologists psychologists and economists from different European and American countries who share a common interest in the dynamics of complex systems and their analysis by mathematical techniques The workshop in Flattnitz continued a series of meetings of the UNESCO working group on systems analysis which started in 1977 in Bucharest and was continued in Cambridge U K 1981 and in Lyon 1982 The title of the meeting was chosen in order to focus on one of the current problems of the analysis of dynamical systems A deeper understanding of the various sources of stochasticity is of primary importance for the interpretation of experimental observations Chaotic dynamics plays a central role since it introduces a stochastic element into deterministic systems
