 AN OVERVIEW Turner R K Bateman I J and Adger W N 1 1 Coastal zone pressure and sustainable management challenges
 Given the continued intensification of the process of globalisation involving population growth population density changes via
 urbanisation industrial development increased trade and capital flows liberalisation of transnational corporation activity and
 lifestyle and attitudinal changes coastal zones and their hydrologically linked catchment areas have come under heavy
 environmental pressure The scale and extent of socio economic activities have profound implications for the now coevolving
 natural and human systems and their complex interrelationships Turner Perrings and Folke 1997 The consequences of this
 process of change manifest themselves across a range of spatial and temporal scales Indeed the juxtaposition of different
 spatial functional and temporal scales that is inherent in the catchment coastal ecosystems seas oceans continuum poses
 particularly difficult challenges for both science and resource management governance *Environmental Economics and
