Aging Society And Ict Global Silver Innovation Global E Governance:

Aging Society and ICT T. Obi, J.P. Auffret, N. Iwasaki, 2013-09-12 It is predicted that by 2050 22% of the world's population will be over 60 years of age. This rapid shift in demographics calls for the development of coherent and forward-looking policies to address the many challenges which will inevitably arise as a result. This book presents 33 articles from the workshop jointly organized by APEC and OECD held in Waseda University Tokyo Japan in September 2012. At this workshop a group of international experts described a wide range of important issues associated with an aging population and discussed how both governments and the private sector can best mobilize innovation and research to transform this global challenge into an opportunity for active and productive aging and new sources of sustainable growth. The authors call for a comprehensive approach to achieve policy coherence as well as for strengthening public private partnerships and promoting collaboration among multiple stakeholders and systems. The book is divided into six chapters covering such subjects as lessons learnt from best practice solutions for the aging society, policy initiatives, health innovation, smart communities and new services. Innovation will be necessary to meet the challenges and to mitigate the health, social and economic impacts of an aging population worldwide as well as unlocking the potential of ICTs through increased research and new models. This book will be of interest to all those whose work involves the development of new services for older people in sectors such as health and nursing care, education and training, transportation, community development and smart cities among others. A

Decade of World E-Government Rankings T. Obi, N. Iwasaki, 2015-09-08 The field of e-Government has emerged alongside the developments in information technology in recent decades and has become an increasingly important factor in all our lives. It has faced a wide range of challenges from the changing technologies of the internet, digital economy such as IOT, big data, cloud and 4G mobile as well as the rapid growth of ICT innovations and applications. The Institute of e-Government at Waseda University Japan was established in 2001 and this book is the latest in the series of e-Government ranking surveys published by the Institute since 2005. The book is divided into three parts, the first of which is an overview of the e-Government ranking survey including a section on historical trends, the 2015 ranking and e-Government ranking by indicators. The second part covers findings and trends and includes analysis in the fields of digital internet economy, IOT, cloud, open, big data, cyber security, smart cities, social media and e-aging. The last section presents 63 country reports. The lessons learnt from the best practices explored in this book will contribute greatly to the work of all those involved in setting up, developing and improving e-Government worldwide. **Postal Services in the Digital Age** M. Finger, B. Bukovc, M. Burhan, 2014-06-11 In recent

years the postal sector has undergone radical changes which have primarily been driven by operational and technological developments. Not only has the advent of Information and Communication Technology (ICT) added competition to the market but it has also provided ample opportunity for the broadening and improvement of services and product range. This book deals with the challenges faced by the postal sector in the digital age and with the vast opportunities that technological

advancements offer postal operators with regard to developing new business solutions and services tailored to the needs of their customers. It provides an analysis of these opportunities and identifies the ways in which postal operators might benefit from the digital age and new market requirements. The book is divided into three main parts: various digital dimensions, e-commerce challenges and opportunities for partnership with governments. A final chapter discusses the developments described in the book and the views and ideas of the authors. _x000D_ The book will be of interest to all those responsible for developing and running postal services as well as to anyone affected by the changes which have already taken place or the possibilities opening up for new and improved services. *Electronic Governance and Open Society: Challenges in Eurasia*

Technology Development and Platform Enhancements for Successful Global E-Government Design Bwalya, Kelvin Joseph, 2013-12-31 While electronic research has developed in many governments around the world, the majority of its research has focused on the supply and demand aspects of e-government instead of the focus on technology integration for successful e-government design. *Technology Development and Platform Enhancements for Successful Global E-Government Design* compiles the shared experiences of e-government designers and practitioners with a focus on technological design. By highlighting the different technological nuances that need to be incorporated into successful e-government designs, this book is a useful tool for professionals and researchers concerned with the organizational development in different types of e-government communities and environments.

Blurring the Boundaries Through Digital Innovation Fabrizio D'Ascenzo, Massimo Magni, Alessandra Lazazzara, Stefano Za, 2016-06-16 This book examines the impact of digital innovation on organizations. It reveals how the digital revolution is redefining traditional levels of analysis while at the same time blurring the internal and external boundaries of the organizational environment. It presents a collection of research papers that examine the interaction between Information and Communication Technology (ICT) and behavior from a threefold perspective. First, they analyze individual behavior in terms of specific organizational practices like learning, collaboration, and knowledge transfer as well as the use of ICT within the organization. Second, they explore the dynamics at work on the border

between the internal and the external environments by analyzing the organizational impact of ICT usage outside the company as can be seen in employer branding consumer behavior and organizational image Third they investigate how ICT is being adopted to help face societal challenges outside the company like waste and pollution smart cities and e government The diversity of views offered makes this book particularly relevant for users companies scientists and governments The content is based on a selection of the best papers original double blind peer reviewed contributions presented at the annual conference of the Italian chapter of AIS which took place in Rome Italy in October 2015 or in other reputable international peer refereed Information Systems conferences
