Air: The Restless Shaper of the World William Bryant Logan, 2013-07 Examines the science of the air we breathe and how the smallest molecular changes in composition can make the difference between life and death [Air](#) William Bryant Logan, 2012-08-13 In a sublime exploration of the most unpredictable element of the earth William Bryant Logan opens our eyes to the astonishing physics chemistry biology history art and even music of the air Air sustains the living Every creature breathes to live exchanging and changing the atmosphere Water and dust spin and rise make clouds and fall again fertilizing the dirt Twenty thousand fungal spores and half a million bacteria travel in a square foot of summer air The chemical sense of aphids the ultraviolet sight of swifts a newborn's awareness of its mother's breast all take place in the medium of air Ignorance of the air is costly The artist Eva Hesse died of inhaling her fiberglass medium Thousands were sickened after 9 11 by supposedly safe air The African Sahel suffers drought in part because we fill the air with industrial dusts With the passionate narrative style and wide ranging erudition that have made William Bryant Logan's work a touchstone for nature lovers and environmentalists Air is like the contents of a bag of seaborne dust that Darwin collected aboard the Beagle a treasure trove of discovery [A Reading of Elemental Ecocriticism in Select Northeast Indian English Poetry](#) Ruth Magdalene, 2023-09-30 Elemental Ecocriticism An in depth exploration of the intricate relationship between nature and human existence through the lenses of four visionary poets This book delves into the macro and micro level injustices inflicted upon the elements of nature as conveyed through systematically crafted narratives Through the poetical verses of these four poets the principles and features of the elements are showcased highlighting their importance for human ecstasy and existence A must read for those seeking a deeper understanding of the complex interplay between humanity and the natural world **The Innovative Use of Materials in Architecture and Landscape Architecture** Caren Yglesias, 2014-02-21 This book is about materials The fundamental properties and technical aspects are reviewed within a context of a material's history the theories of its meaning and making and its use Information about the sustainability aspects of each material is included as a critical necessity in construction Innovative design comes from an understanding of materials for what they are how they have been used in the past and how they can support human activity The author provides essential information to students and professionals concerned with advancing their design at a time when the consumption of natural resources and the consequences of wasteful practices are of urgent concern Instructors considering this book for use in a course may request an examination copy here **Medieval Media** Ingrid Nelson, 2025-09-16 No detailed description available for Medieval Media **Imagination in an Age of Crisis** Jason Goroncy, Rod Pattenden, 2022-06-01 This book explores the vital role of the imagination in today's complex climates cultural environmental political racial religious spiritual intellectual etc It asks What contribution do the arts make in a world facing the impacts of globalism climate change pandemics and losses of culture What wisdom and insight and orientation for birthing hope and

action in the world do the arts offer to religious faith and to theological reflection These essays poems and short reflections written by art practitioners and academics from a diversity of cultures and religious traditions demonstrate the complex cross cultural nature of this conversation examining critical questions in dialogue with various art forms and practices and offering a way of understanding how the human imagination is formed sustained employed and expanded Marked by beauty and wonder as well as incisive critique it is a unique collection that brings unexpected voices into a global conversation about imagining human futures

The Hidden Army - MI9's Secret Force and the Untold Story of D-Day Matt

Richards,2018-07-05 Almost seventy five years ago MI9 dreamt up the most audacious escape and evasion plan of World War Two Formulated by Airey Neave one of the first men ever to escape from Colditz this plan was one of subterfuge concealment and deception on a scale never seen before With numerous downed RAF and Allied pilots on the run in Europe and with the fabled Comete Escape Line having been infiltrated by double agents Neave s plan was to hide these men right under the very noses of the Nazis rather than risk repatriation Choosing a forest in the heart of France right next to one of the German Army s largest ammunition bases Neave Belgian agents and the French Resistance would secretly transport and hide Allied pilots and soldiers within feet of the enemy Nobody thought it would work but such was the success of the secret camp that a whole community of over one hundred and fifty Allied escapers lived within the forest for three months in the run up to D Day Despite numerous close shaves they were never discovered and this outrageous plan brilliant in its simplicity saw the Allied evaders make their home in the forest cooking and hunting to survive and even setting up a golf course in the forest using branches for clubs without discovery This operation remained absolutely secret to the point that the inhabitants of the villages surrounding the forest were unaware until the end of the existence of that allied force so close to them Told through interviews with evaders members of the Resistance and the children charged with smuggling food into the forest this book tells the compelling story of one of the most audacious operations in World War Two A story that has until today remained as secret as the Hidden Army of Freteval

The Preacher's Guide to Suicide H. C. Johnson,2022-03-18 This book makes the

startling claim that the pulpit is the appropriate place to address suicide In A Preacher s Guide to Suicide Johnson chisels through the rusty prison bars of cultural pretense and the oppressive myths of suicide Using history the social and behavioral sciences and biblical inquiry over the centuries of varied Christian voices Johnson demonstrates that suicide is part of the very fabric of Christian identity And to preach suicide awareness is to preach life into the very act of dying While grappling with the contemporary understanding of neuroscience psychopathology societal values and individualism Johnson seeks to present suicide in a hopeful light as we all approach death in those daily moments of confession forgiveness and prayer Johnson hopes to provoke further conversation within the Christian community about the richness of suicide within the Scriptures and seeks to be a source of inspiration for preachers

Reading with Earth Anne Elvey,2024-03-21 Winner of the

2023 ANZATS Award for the Best Monograph by an Established Scholar Applying a re envisioned ecological feminist

hermeneutics this book builds on two important responses to twentieth and twenty first century situations of ecological trauma especially the complex contexts of climate change and cross species relations first ecological feminism second ecological hermeneutics in the Earth Bible tradition By way of readings of selected biblical texts this book suggests that an ecological feminist aesthetic bringing present situation and biblical text into conversation through engagement with activism and literature principally poetry is helpful in decolonizing ethics Such an approach is both informed by and speaks back to the new materialism in ecological criticism

Elemental Ecocriticism Jeffrey Jerome Cohen, Lowell Duckert, 2015-12-23 For centuries it was believed that all matter was composed of four elements earth air water and fire in promiscuous combination bound by love and pulled apart by strife Elemental theory offered a mode of understanding materiality that did not center the cosmos around the human Outgrown as a science the elements are now what we build our houses against Their renunciation has fostered only estrangement from the material world The essays collected in Elemental Ecocriticism show how elemental materiality precipitates new engagements with the ecological Here the classical elements reveal the vitality of supposedly inert substances mud water earth air chemical processes fire and natural phenomena as well as the promise in the abandoned and the unreal ether phlogiston spontaneous generation Decentering the human this volume provides important correctives to the idea of the material world as mere resource Three response essays meditate on the connections of this collaborative project to the framing of modern day ecological concerns A renewed intimacy with the elemental holds the potential of a more dynamic environmental ethics and the possibility of a reinvigorated materialism

One Midsummer's Day Mark Cocker, 2023-06-01 It takes a whole universe to make one small black bird The bestselling author of *Crow Country* and writer of *The Guardian's Country Diary* tells the story of all life on Earth through a single day spent in the company of swifts A jewel of a book Caroline Lucas MP Swifts are among the most extraordinary of all birds Their migrations span continents and their twelve week stopover when they pause to breed in European rooftops is the very definition of summer They may nest in our homes but much about their lives passes over our heads No birds are more wreathed in mystery Captivated Mark Cocker sets out to capture their essence Over the course of one day in midsummer he devotes himself to his beloved black birds as they spiral overhead Yet this is also a book about so much more Swifts are a prism through which Cocker explores the profound interconnections of the whole biosphere From the deep sea

thermal vents where life was born to the 15 million degrees at the core of our Sun he shows that life is a singular and glorious continuum These birds without borders are a perfect symbol to express the unity of the living planet But they also illuminate how no creature least of all ourselves can be said to be alive in isolation We are all inextricably connected Drawing deeply on science history literature and a lifetime of close observation One Midsummer's Day is a dazzling and wide ranging celebration of all life on Earth by one of our greatest nature writers A nature classic for the new century Jim Perrin author of Snowdon

Clouds Richard Hamblyn, 2017-05-15 Clouds have been objects of delight and fascination throughout human history their fleeting magnificence and endless variety having inspired scientists and daydreamers alike Described by Aristophanes as the patron goddesses of idle men clouds and the ever changing patterns they create have long symbolized the restlessness and unpredictability of nature and yet they are also the source of life giving rains In this book Richard Hamblyn examines clouds in their cultural historic and scientific contexts exploring their prevalence in our skies as well as in our literature art and music As Hamblyn shows clouds function not only as a crucial means of circulating water around the globe but also as a finely tuned thermostat regulating the planet s temperature He discusses the many different kinds of clouds from high scattered cirrus clouds to the plump thought bubbles of cumulus clouds even exploring man made clouds and clouds on other planets He also shows how clouds have featured as

meaningful symbols in human culture whether as ominous portents of coming calamities or as ethereal figures giving shape to the heavens whether in Wordsworth's poetry or today's tech speak Comprehensive yet compact cogent and beautifully illustrated this is the ultimate guidebook to those shapeshifters of the sky Being and Dwelling through Tourism Catherine Palmer, 2017-11-06 Much of the existing literature seeks to make sense of tourism based on singular approaches such as visibility identity mobility performance and globalised consumption What is missing however is an overarching framework within which these valuable approaches can be located This book offers one such framework using the concept of dwelling taken from Heidegger and Ingold as the starting point from which to consider the interrelatedness of being dwelling and tourism The anthropological focus at the core of the book is infused with multidisciplinary perspectives that draw on a variety of subjects including philosophy material cultural studies and cultural geography The main themes include sensuous material architectural and earthly dwelling and each chapter features a discussion of the unifying theoretical framework for each theme followed by an illustrative focus on specific aspects of tourism This theoretically substantive book will be of interest to anyone involved with tourism research from a wide range of disciplines including anthropology sociology geography cultural studies leisure studies and tourist studies *Поговорим о дыхании.
