Health Management Stephen B. Johnson,Thomas J. Gormley,Seth S. Kessler,Charles D. Mott,Ann Patterson-Hine,Karl M. Reichard,Philip S. Scandura, Jr.,2011-06-01 System Health Management with Aerospace Applications provides the first complete reference text for System Health Management SHM the set of technologies and processes used to improve system dependability Edited by a team of engineers and consultants with SHM design development and research experience from NASA industry and academia each heading up sections in their own areas of expertise and co coordinating contributions

from leading experts the book collates together in one text the state of the art in SHM research technology and applications. It has been written primarily as a reference text for practitioners for those in related disciplines and for graduate students in aerospace or systems engineering. There are many technologies involved in SHM and no single person can be an expert in all aspects of the discipline. System Health Management with Aerospace Applications provides an introduction to the major technologies, issues, and references in these disparate but related SHM areas. Since SHM has evolved most rapidly in aerospace, the various applications described in this book are taken primarily from the aerospace industry. However, the theories, techniques, and technologies discussed are applicable to many engineering disciplines and application areas. Readers will find sections on the basic theories and concepts of SHM, how it is applied in the system life cycle, architecture design, verification, and validation, etc. the most important methods used: reliability, quality assurance, diagnostics, prognostics, etc. and how SHM is applied in operations: commercial aircraft, launch operations, logistics, etc. to subsystems: electrical, power structures, flight controls, etc. and to system applications: robotic spacecraft, tactical missiles, rotorcraft, etc.
