**Detroit** Scott Martelle, 2014-03-01 Detroit was established as a French settlement three quarters of a century before the founding of this nation A remote outpost built to protect trapping interests it grew as agriculture expanded on the new frontier Its industry took a great leap forward with the completion of the Erie Canal which opened up the Great Lakes to the East Coast Surrounded by untapped natural resources Detroit turned iron from the Mesabi Range into stoves and railcars and eventually cars by the millions This vibrant commercial hub attracted businessmen and labor organizers European immigrants and African Americans from the rural South At its mid 20th century heyday one in six American jobs were connected to the auto industry its epicenter in Detroit And then the bottom fell out Detroit A Biography takes a long unflinching look at the evolution of one of America's great cities and one of the nation's greatest urban failures It tells how the city grew to become the heart of American industry and how its utter collapse from 1.8 million residents in 1950 to 714,000 only six decades later resulted from a confluence of public policies private industry decisions and deep thick seams of racism And it raises the question when we look at modern day Detroit are we looking at the ghost of America's industrial past or its future

**The Classical Review**

,2003      **North American Odyssey** Craig E. Colten, Geoffrey L. Buckley, 2014-03-27 This groundbreaking volume offers a fresh approach to conceptualizing the historical geography of North America by taking a thematic rather than a traditional regional perspective. Leading geographers building on current scholarship in the field explore five central themes. Part I explores the settling and resettling of the continent through the experiences of Native Americans, early European arrivals, and Africans. Part II examines nineteenth-century European immigrants, the reconfiguration of Native society, and the internal migration of African Americans. Part III considers human transformations of the natural landscape in carving out a transportation network, replumbing waterways, extracting timber and minerals, preserving wilderness, and protecting wildlife. Part IV focuses on human landscapes, blending discussions of the visible imprint of society and distinctive approaches to interpreting these features. The authors discuss survey systems, regional landscapes, and tourist and mythic landscapes, as well as the role of race, gender, and photographic representation in shaping our understanding of past landscapes. Part V follows the urban impulse in an analysis of the development of the mercantile city, nineteenth and twentieth-century planning, and environmental justice. With its focus on human-environment interactions, the mobility of people, and growing urbanization, this thoughtful text will give students a uniquely geographical way to understand North American history.
