Investigating Complex Phenomena: Bridging between Systems Thinking and Modeling in Science Education Tom Bielik, Moritz Krell, Laura Zangori, Orit Ben Zvi Assaraf, 2023-11-15 Understanding the complexity of the natural world and making sense of phenomena is one of the main goals of science and science education When investigating complex phenomena such as climate change or pandemic outbreaks students are expected to engage in systems thinking by considering the boundaries of the investigated system identifying the relevant components and their interactions and exploring system attributes such as hierarchical organization dynamicity feedback loops and emergence Scientific models are tools that support students reasoning and understanding of complex systems and students are expected to develop their modeling competence and to engage in the modeling process by constructing testing revising and using models to explain and predict phenomena Computational modeling tools for example provide students with the opportunity to explore big data

Isolation and Molecular Characterization of Circulating Tumor Cells Mark Jesus M. Magbanua, John W. Park, 2017-05-29 Numerous studies have shown that elevated levels of circulating tumor cells CTCs in blood of cancer patients are associated with poor response to treatment and inferior survival probabilities Despite this clinical significance the molecular biology of CTCs remains poorly understood The paucity in molecular information can be attributed to the tremendous technical challenges involved in isolating these extremely rare cells Recent technological advancements in rare cell technology however have allowed for the reliable enrichment and isolation of CTCs Consequently the use of recently developed molecular approaches e g multiplexed QPCR microarray and next generation sequencing analyses to profile CTCs have provided novel insights into the molecular makeup of these tumor cells This book discusses approaches for enrichment and isolation of CTCs as well as recent advances in comprehensive molecular profiling of CTCs using cutting edge omics technology

Intravital Imaging Saparna Pai, Michael J. Hickey, Wolfgang Weninger, 2017-12-20 Inflammation of the CNS can have devastating long lived and in some cases fatal consequences for patients The stimuli that can induce CNS inflammation are diverse and include infectious agents autoimmune responses against CNS expressed antigens and sterile inflammation following ischemia or traumatic injury In these conditions cells of the immune system play central roles in promulgation and resolution of the inflammatory response However the immunological mechanisms at work in these diverse responses differ according to the nature of the response Our understanding of the actions of immune cells in the CNS has been restricted by the difficulty in visualising leukocytes as they undergo recruitment from the cerebral microvasculature and following their entry into the CNS parenchyma However advances in in vivo microscopy over the last 10 15 years have overcome many of these difficulties and studies using these forms of microscopy have revealed a wealth of new information regarding the cellular and molecular mechanisms of CNS inflammation This Research Topic brings together state of the art reviews examining the use of in vivo imaging in investigating inflammation and leukocyte behaviour in the CNS Papers in this Research Topic describe how in vivo microscopy has increased our understanding of the actions of immune cells in the inflamed CNS following various stimuli including autoimmunity infection and sterile inflammation Animal Biotechnology

Words from the Hill Stu Garrard, 2017-04-18 A disruptive and surprising journey through the Beatitudes Most of the time life doesn't work out like we expect it will We spend time and energy trying to climb some sort of spiritual ladder oblivious to the fact that it is God who is moving toward us We want answers to our problems yet what is offered is presence What if we were to become united with our brokenness rather than our victories What if God moves closest to us in the absence the ache and the longing Words from the Hill turns each beatitude on its head to see the unexpected beneath the understood diving into the story of a woman on death row to speak about mercy personal stories from the Israeli Palestinian conflict to talk about peace and much more Stu Garrard has walked with these people in their stories and he vulnerably offers his own as he unpacks the Good News of the Beatitudes God is on your side and He is closer than you think
