Counseling Boys and Men with ADHD George Kapalka, 2010-11-16 Attention deficit hyperactivity disorder primarily affects boys and male teens and the symptoms can continue on into adulthood. Consequently, clinicians need to be well versed in techniques to treat this disorder that are tailored specifically to the needs of males; there are, however, few resources available to them. This guidebook provides a review of the counseling, educational, and medical interventions that can benefit boys and men with ADHD. Kapalka begins with a review of symptoms, etiology, assessment, and diagnosis, and then discusses a variety of specific interventions: individual counseling, parenting techniques, classroom interventions, and group counseling techniques. The use of medication in conjunction with counseling is also considered. Throughout all of the topics covered, Kapalka emphasizes what it is like to be male and have ADHD and describes the impacts that masculinity and gender expectations can have on the expression of and response to the disorder. **JETP Letters**, 1990 West's Federal Supplement, 1988 **FCC Record** United States. With over 100,000 iPhone applications and 125,000 registered iPhone developers, is it still possible to create a top-selling app that stands apart from the six-figure crowd? Of course, but you'll need more than a great idea and flawless code: an eye-catching and functional user interface design is essential. With this book, you'll get practical advice on user interface design from 10 innovative developers who, like you, have sat wondering how to best utilize the iPhone's minimal screen real estate. Their stories illustrate precisely why, with more apps and more experienced creative developers, no iPhone app can succeed without a great user interface. Whatever type of iPhone project you have in mind—social networking app, game, or reference tool—you'll benefit from the information presented in this book. More than just tips and pointers, you'll learn from the authors' hands-on experiences, including Dave Barnard of App Cubby on how to use Apple's user interface conventions and test for usability to assure better results; Joachim Bondo, creator of Deep Green Chess, beats a classic design problem of navigating large dataset results in the realm of the iPhone; former Apple employee Dan Burcaw tailors user interfaces and adds the power of CoreLocation, Address Book, and Camera to the social networking app Brightkite; David Kaneda takes his Basecamp project management client Outpost from a blank page, literally, to a model of dashboard clarity; Craig Kemper focuses on the smallest details to create his award-winning puzzle games TanZen and Zentomino; Tim Novikoff, a graduate student in applied math with no programming experience, reduces a complex problem to simplicity in Flash of Genius SAT Vocab; long-time Mac developer Chris Parrish goes into detail on the creation of the digital postcard app Postage, which won the 2009 Apple Design Award; Flash developer Keith Peters provides solutions for bringing games that

were designed for a desktop screen to the small touch sensitive world of the iPhone Jürgen Siebert creator of FontShuffle outlines the anatomy of letters and how to select the right fonts for maximum readability on the iPhone screen Eddie Wilson an interactive designer reveals the fine balance of excellent design and trial by fire programming used to create his successful app Snow Report Combined with Apress best selling Beginning iPhone 3 Development Exploring the iPhone SDK you'll be prepared to match great code with striking design and create the app that everyone is talking about *Companion to Psychiatric Studies E-Book* Eve C Johnstone, David Cunningham Owens, Stephen M Lawrie, Andrew M McIntosh, Michael D.
