Bus Driver Numeracy And Literacy Test:

Driver Behaviour and Training Dr Lisa Dorn, 2012-10-01 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The objective of the Driver Behaviour and Training volumes and of the conference on which they are based is to describe and discuss recent advances in the study of this important area. It bridges the gap between practitioners in road safety and theoreticians investigating driving behaviour from a number of different perspectives and related disciplines. Educating drivers to be safe for life means a shift in focus from simply developing vehicle handling skills towards ensuring that drivers are aware of how goals and motivations can influence decision making throughout their driving career. A major focus within this fourth volume is to consider how driver training needs to be adapted in order to raise awareness of how human factors contribute to unsafe driving behaviour. From this it goes on to promote the development of driver education that considers all the skills that are essential for road safety. The readership will include road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from regulatory authorities and professional driver training organisations such as the police service and private and public sector personnel. *Resources in Education*, 1995. The Progress of Education, 1998. **Literacy, Lives and Learning** David Barton, Roz Ivanic, Yvon Appleby, Rachel Hodge, Karin Tusting, 2012-11-12 Demonstrating what it is like to be an adult learner in today's world, this book focuses on language literacy and numeracy learning. The authors explore the complex relationship between learning and adults' lives following a wide range of individual students in various formal learning situations from college environments to a young homeless project and a drug support and aftercare centre. The study is rooted in a social practices approach and examines how people's lives shape their learning. Themes addressed range from how literacy is learned through participation and how barriers such as violence and ill health impact on people's lives. Based on a major research project and detailed reflexive and collaborative methodology, the book describes a coherent strategy of communication and impact which will have a direct effect on policy and practice. *Social Welfare*, 1999-04.
