The Fear Index Robert Harris, 2012-01-31 At the nexus of high finance and sophisticated computer programming a terrifying future may be unfolding even now Dr Alex Hoffmann's name is carefully guarded from the general public but within the secretive inner circles of the ultrarich he is a legend He has developed a revolutionary form of artificial intelligence that predicts movements in the financial markets with uncanny accuracy His hedge fund based in Geneva makes billions But one morning before dawn a sinister intruder breaches the elaborate security of his lakeside mansion and so begins a waking nightmare of paranoia and violence as Hoffmann attempts with increasing desperation to discover who is trying to destroy him Fiendishly smart and suspenseful *The Fear Index* gives us a searing glimpse into an all too recognizable world of greed and panic It is a novel that forces us to confront the question of what it means to be human and it is Robert Harris's most spellbinding and audacious novel to date

The Fear Index Robert Harris, 2012-08-21 High tech finance and sophisticated computer programming combine in this terrifying and fiendishly smart new novel from Robert Harris Dr Alex Hoffmann stays out of the public spotlight but within the secretive inner circles of the ultra rich he is a legend And now he has developed a revolutionary form of artificial intelligence that predicts movements in the financial markets with uncanny accuracy As a result his Geneva based hedge fund is poised to make billions But one morning before dawn a sinister intruder breaches the elaborate security of his lakeside mansion So begins a waking nightmare of paranoia and violence as Hoffmann attempts with increasing desperation to discover who is trying to destroy him

The Fear Index Robert Harris, 2012 A chilling contemporary thriller from Robert Harris set in the competitive world of high finance Dr Max Hoffman is a legend A physicist once employed on the Large Hadron Collider he now uses a revolutionary and highly secret system of computer algorithms to trade on the world's financial markets None of his rivals is sure how he does it but somehow Hoffman's hedge fund built around the standard measure of market volatility the VIX or Fear Index generates astonishing returns for his investors Late one night in his house beside Lake Geneva an intruder disturbs Hoffman and his wife while they are asleep This terrifying moment is the start of Robert Harris's new novel a story just as compelling and timely as his most recent contemporary thriller *The Ghost* Over the next 48 hours as the markets edge towards another great crash Hoffman's world disintegrates But who is trying to destroy him

On Capitalism and Inequality Robert U. Ayres, 2020-05-29 Capitalism is under attack Defenders say that capitalism has raised billions of people from poverty But a central activity of capitalism today Wall Street style is speculation gambling using other people's money and privatizing the profits while socializing the debts Skeptics argue that capitalism has redistributed the wealth of the planet in favor of a very few meanwhile leaving the planet in bad shape and leaving billions of people out in the cold Wealth is now extremely mal distributed opportunity is far from equal and upward social mobility has declined significantly in recent decades This book reviews the evidence and arguments pro and con in considerable detail The evidence is mixed The main virtue of capitalism is its emphasis on

competition as a driver of innovation and thus of economic growth It is true that economic growth has accelerated in recent centuries and it is true that billions of people have been lifted from poverty But it is not necessarily true that intense winner take all competition in the marketplace is the explanation for growth Neoclassical economic theory posits that self interest is the primary motive for all economic decisions leaving little room for cooperation and even less for altruism The theory applies to an unrealistic model of human behavior known as Homo economicus or economic man whose characteristic activity is buying or selling The reason for using the adjective word social as in socialism or social service or social democracy is essentially to deny those postulates of standard economic theory Real humans are not rational utility maximizers whatever that is and very often do things that are not in their own personal best interests This can happen because other interests such as family loyalty professional religious or patriotic duty may take precedence Real people rarely behave like Homo economicus who has rivals but no friends He or she does not trust anyone hence cannot cooperate with others and can never create or live in a viable social system or marriage Yet social systems ranging from families and tribes to firms cities and nations do and must exist or civilization cannot exist A viable social system must not allow winner takes all It must reallocate some of the societal wealth being created by competitive activities to support the young the old and the weak because all of those people have equal rights if not the same luck or the same skills Both competition and cooperation have important roles to play A hybrid capitalism involving both is the only viable solution The book ends with a specific suggestion namely Universal Basic Income or UBI

Transmedia Creatures Francesca Saggini, Anna Enrichetta Soccio, 2018-10-19 On the 200th anniversary of the first edition of Mary Shelley's Frankenstein Transmedia Creatures presents studies of Frankenstein by international scholars from converging disciplines such as humanities musicology film studies television studies English and digital humanities These innovative contributions investigate the afterlives of a novel taught in a disparate array of courses Frankenstein disturbs and transcends boundaries be they political ethical theological aesthetic and not least of media ensuring its vibrant presence in contemporary popular culture Transmedia Creatures highlights how cultural content is redistributed through multiple media forms and modes of production including user generated ones from below that often appear synchronously and dismantle and renew established readings of the text while at the same time incorporating and revitalizing aspects that have always been central to it The authors engage with concepts value systems and aesthetic moral categories among them the family horror monstrosity diversity education risk technology the body from a variety of contemporary approaches and highly original perspectives which yields new connections Ultimately Frankenstein as evidenced by this collection is paradoxically enriched by the heteroglossia of preconceptions misreadings and overreadings that attend it and that reveal the complex interweaving of perceptions and responses it generates Published by Bucknell University Press Distributed worldwide by Rutgers University Press
