The White Plague By Frank Herbert:

The White Plague Frank Herbert, 2025-09-18 John Roe O'Neill molecular biologist American of Irish descent saw the car bomb explosion that killed instantly his wife Mary and their twin five year olds Kevin and Mairead Physically almost unharmed a shock wave of blinding all engulfing hatred and revulsion seared through his mind Revulsion not just for the bombers but for a world that could produce such horror And he sought revenge on that world creating and unleashing the most devastating plague As his plague swept the world bringing not just death but the mad anarchy of terror he went on a journey where he was forced to see the awfulness of his own handiwork **The White Plague** Frank Herbert, Bradford Dillman, 1986 *Ferocious Minds* Damien Broderick, 2005-01-01 Two centuries ago the first Enlightenment failed when its dream of reason smashed into the passions and fury of stubborn humans Without a deep broad understanding of the world the emerging Enlightenment was left floundering its best impulses perverted into the bloody excess of the French Revolution Arguably its idealism and noble goals led directly and shockingly to the 20th century's totalitarian nightmares Now the 21st century is learning anew the Faustian hunger to know everything that can be known But Enlightenment values of reason and tolerance enriched by new knowledge face a complex world no less eager to embrace medieval terrorism and ancient superstitions a world bizarrely denying itself many of the fresh opportunities and insights availed by science Can we find cures for poverty unhappiness ignorance the ruination of the planet aging and perhaps for death itself If so should we Damien Broderick's own ferocious mind invites you to explore today's unexpected treasure house of understanding and provides enticing glimpses of tomorrow's [The Cambridge Companion to Science Fiction](#) Edward James, Farah Mendlesohn, 2003-11-20 Science fiction is at the intersection of numerous fields It is a literature which draws on popular culture and which engages in speculation about science history and all types of social relations This volume brings together essays by scholars and practitioners of science fiction which look at the genre from these different angles After an introduction to the nature of science fiction historical chapters trace science fiction from Thomas More to more recent years including a chapter on film and television The second section introduces four important critical approaches to science fiction drawing their theoretical inspiration from Marxism postmodernism feminism and queer theory The final and largest section of the book looks at various themes and sub genres of science fiction A number of well known science fiction writers contribute to this volume including Gwyneth Jones Ken MacLeod Brian Stableford Andy Duncan James Gunn Joan Slonczewski and Damien Broderick **Discovering Dune** Dominic J. Nardi, N. Trevor Brierly, 2022-08-01 Frank Herbert's *Dune* is one of the most well known science fiction novels of all time and it is often revered alongside time honored classics like *The Lord of the Rings* Unlike Tolkien's work the *Dune* series has received remarkably little academic attention This collection includes fourteen new essays from various academic disciplines including philosophy political science disability studies Islamic theology environmental studies and Byzantine history that examine all six of Herbert's *Dune* books As a

compendium it asserts that a multidisciplinary approach to the texts can lead to fresh discoveries Also included in this collection are an introduction by Tim O Reilly who authored one of the first critical appraisals of Herbert s writings in 1981 and a comprehensive bibliography of essential primary and secondary sources The End Marq de Villiers,2025-10-16 What is the fate of the world as we know it Tsunamis earthquakes volcanoes hurricanes pandemics cosmic radiation gamma bursts from space colliding comets and asteroids these things used to worry us from time to time but now they have become the background noise of our culture Are natural calamities indeed more probable and more frequent than they were Are things getting worse Are the boundaries between natural and human caused calamities blurring Are we part of the problem If so what can we do about it In The End award winning writer Marq de Villiers examines these questions at a time when there is an urgent need to understand the perils that confront us to act in such a way as best we can for the inevitable disasters when they come We can do nothing about some natural calamities but about others we can do a great deal De Villiers helps us understand which is which and lays out some provocative ideas for mitigating the damage all such calamities can inflict on us and our world The End is a brilliant and challenging look at what lies ahead and at what we can do to influence our future
