Approaching Language Transfer Through Text Classification Explorations In The Detection Based Approach:

Approaching Language Transfer through Text Classification Scott Jarvis, Scott A. Crossley, 2012-03-14 Recent work has pointed to the need for a detection based approach to transfer capable of discovering elusive crosslinguistic effects through the use of human judges and computer classifiers that can learn to predict learners language backgrounds based on their patterns of language use This book addresses that need It details the nature of the detection based approach discusses how this approach fits into the overall scope of transfer research and discusses the few previous studies that have laid the groundwork for this approach The core of the book consists of five empirical studies that use computer classifiers to detect the native language affiliations of texts written by foreign language learners of English The results highlight combinations of language features that are the most reliable predictors of learners language backgrounds *Cross-Linguistic Influence: From Empirical Evidence to Classroom Practice* M. Juncal Gutierrez-Mangado, María Martínez-Adrián, Francisco

Gallardo-del-Puerto, 2019-07-09 This book presents the latest research in various areas of cross linguistic influence CLI providing educators with insights into how previously learned languages influence the learning of an additional language at different levels such as phonetics phonology morphosyntax vocabulary pragmatics writing style and learning context While the majority of the chapters have English as the target language one investigates the acquisition of French The L1s of the learners include Arabic Basque Catalan Chinese Czech Danish Finnish Galician Georgian German Norwegian Polish Russian Spanish and Swedish Each chapter ends with a reflection on possible pedagogical implications of the findings and offers recommendations on how to make the most of cross linguistic influence in the classroom **Approaching Language**

Transfer Through Text Classification Scott Jarvis, Scott A. Crossley, 2012-03-14 This book explains the detectionbased approach to investigating crosslinguistic influence and illustrates the value of the approach through a collection of five empirical studies that use the approach to quantify evaluate and isolate the subtle and complex influences of learners nativelanguage backgrounds on their English writing Automatic Language Identification in Texts Tommi

Jauhiainen, Marcos Zampieri, Timothy Baldwin, Krister Lindén, 2024-01-01 This book provides readers with a brief account of the history of Language Identification LI research and a survey of the features and methods most used in LI literature LI is the problem of determining the language in which a document is written and is a crucial part of many text processing pipelines The authors use a unified notation to clarify the relationships between common LI methods The book introduces LI performance evaluation methods and takes a detailed look at LI related shared tasks The authors identify open issues and discuss the applications of LI and related tasks and proposes future directions for research in LI **Constraints on**

Language Variation and Change in Complex Multilingual Contact Settings Bertus van Rooy, Haidee Kotze, 2024-07-15 *Constraints on Language Variation and Change in Complex Multilingual Contact Settings* explores an innovative proposal that linguistic similarities identified in different forms of contact influenced varieties of language use including translation

native and non native varieties of English and language use of bilinguals more generally can be accounted for in a coherent framework grounded in the notion of constrained communication These varieties have hitherto been studied in independent scholarly traditions especially translation studies and world Englishes leaving the potential underlying unity underexplored both conceptually and empirically The chapters collected in this volume aim to develop such a unified perspective by drawing on corpus data across a range of languages and language varieties with a focus on written language a neglected data source in research on multilingual contact settings The findings point to shared general characteristics across individual contact settings which result from probabilistically conditioned manifestations of the same deeper regularities constraints present in diverse language contact settings

The Usage-based Study of Language Learning and Multilingualism Lourdes Ortega, Andrea E. Tyler, Hae In Park, Mariko Uno, 2016-05-16 Usage based linguistics which is currently very popular bases its understanding of language on two key points Languages are cognitive social constructs i e learned vs genetically endowed and in order for communication and meaning to happen speakers must find a way to meet understand each other overcoming various differences lexicon social register etc to arrive there In this book high level contributors combine research from various usage based perspectives to explore these questions How do proficient speakers accomplish mental contact or communication through the available semiotic linguistic resources they share with other members of their discourse community How do young children learn to accomplish this And how do speakers of multiple languages learn to accomplish this across languages
