Exploring Math And Computer Science William Gasarch, Clyde Kruskal, 2018-12-26 Points questions stories and occasional rants introduce the 24 chapters of this engaging volume With a focus on mathematics and peppered with a scattering of computer science settings the entries range from lightly humorous to curiously thought provoking Each chapter includes sections and sub sections that illustrate and supplement the point at hand Most topics are self contained within each chapter and a solid high school mathematics background is all that is needed to enjoy the discussions There certainly is much to enjoy here CHOICE Ever notice how people sometimes use math words inaccurately Or how sometimes you instinctively know a math statement is false or not known Each chapter of this book makes a point like those above and then illustrates the point by doing some real mathematics through step by step mathematical techniques This book gives readers valuable information about how mathematics and theoretical computer science work while teaching them some actual mathematics and computer science through examples and exercises Much of the mathematics could be understood by a bright high school student The points made can be understood by anyone with an interest in math from the bright high school student to a Fields medal winner The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate

Stephen J. Ceci, Wendy M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women's underrepresentation in science Everyone is interested academics politicians parents high school girls and boys women in search of college majors administrators working to accommodate women's educational interests the list goes on But one thing often missing is an evidence based examination of the problem uninfluenced by personal opinions accounts of lived experiences anecdotes and the always encroaching inputs of popular culture This is why this special issue of Frontiers in Psychology can make a difference In it a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical objective approaches to understanding women's underrepresentation in science today The questions considered within this special issue span academic disciplines methods levels of analysis and nature of analysis what these articles share is their scholarly evidence based approach to understanding a key issue of our time **The Silent**
