Spin Cycle Jeffrey R. Henig, 2008-02-13 One important aim of social science research is to provide unbiased information that can help guide public policies However social science is often construed as politics by other means Nowhere is the polarized nature of social science research more visible than in the heated debate over charter schools In *Spin Cycle* noted political scientist and education expert Jeffrey Henig explores how controversies over the charter school movement illustrate the use and misuse of research in policy debates Henig's compelling narrative reveals that despite all of the political maneuvering on the public stage research on school choice has gradually converged on a number of widely accepted findings This quiet consensus shows how solid research can supersede partisan cleavages and sensationalized media headlines In *Spin Cycle* Henig draws on extensive interviews with researchers journalists and funding agencies on both sides of the debate as well as data on federal and foundation grants and a close analysis of media coverage to explore how social science research is spun in the public sphere Henig looks at the consequences of a highly controversial New York Times article that cited evidence of poor test performance among charter school students The front page story based on research findings released by the American Federation of Teachers AFT sparked an explosive debate over the effectiveness of charter schools In the ensuing drama reputable scholars from both ends of the political spectrum launched charges and counter charges over the research methodology and the implications of the data Henig uses this political tug of war to illustrate broader problems relating to social science of what relevance is supposedly non partisan research when findings are wielded as political weapons on both sides of the debate In the case of charter schools Henig shows that despite the political posturing in public forums many researchers have since revised their stances according to accumulating new evidence and have begun to find common ground Over time those who favored charter schools were willing to admit that in many instances charter schools are no better than traditional schools And many who were initially alarmed by the potentially destructive consequences of school choice admitted that their fears were overblown The core problem Henig concludes has less to do with research itself than with the way it is often sensationalized or misrepresented in public discourse Despite considerable frustration over the politicization of research until now there has been no systematic analysis of the problem *Spin Cycle* provides an engaging narrative and instructive guide with far reaching implications for the way research is presented to the public Ultimately Henig argues we can do a better job of bringing research to bear on the task of social
