Building and Using a Groundwater Database Garry Rowe, Sylvia J. Dulaney, 1991-07-24 Building and Using a Groundwater Database is an introductory book that focuses on the fundamentals of groundwater database use It is an excellent guide for people who collect and use groundwater quality data hydrogeological data and general geological data as well as people who are required to prepare information about groundwater resources for others to use The book also serves as a textbook for computer based hydrogeology courses Many university courses now make use of computerized groundwater data yet no textbook exists to guide students in database use Building and Using a Groundwater Database provides detailed information regarding the steps and perspectives required to create a database and use it for groundwater management land use practices planning cleanups site investigations and general hydrogeologic reporting The book is structured to take the reader from the foundations of database development through maintenance and everyday use of the database Actual examples from selected case studies are used to illustrate database principles This book is unique in that it deals with the management and structuring of groundwater data as opposed to the collection and interpretation of data It illustrates how database software managers can be integrated with groundwater software tools Building and Using a Groundwater Database provides consultants engineers public officials university instructors local and municipal water utilities and banking and loan institutions with a clear concise guide to using groundwater databases

E - Learning Modules Dan Ryan, 2012-06-20 The term e Learning is a neologism for CSCL systems that came about during the emergence of website e learning modules From an e learning perspective conventional e learning systems were then based on instructional packets which were delivered to students using assignments Assignments were evaluated by the instructor In contrast the new e learning places increased emphasis on social learning and use of

social software such as blogs wikis podcasts and virtual worlds such as Second Life This phenomenon has also been referred to as Long Tail Learning E learning by contrast to e learning systems not based on CSCL assumes that knowledge as meaning and understanding is socially constructed Learning takes place through conversations about content and grounded interaction about problems and actions Advocates of social learning claim that one of the best ways to learn something is to teach it to others However it should be noted that many early online courses such as those developed by Murray Turoff and Starr Roxanne Hiltz in the 1970s and 80s at the New Jersey Institute of Technology courses at the University of Guelph in Canada the British Open University and the online distance courses at the University of British Columbia where Web CT now incorporated into Blackboard Inc was first developed have always made heavy use of online discussion between students Also from the start practitioners such as Harasim in 1995 have put heavy emphasis on the use of learning networks for knowledge construction long before the term e learning let alone CSCL was even considered There is also an increased use of virtual classrooms online presentations delivered live as an online learning platform and classroom for a diverse set of education providers such as Minnesota State Colleges and Universities and Sachem MN School District In addition to virtual classroom environments social networks have become an important part of e learning Social networks have been used to foster online learning communities around subjects as diverse as test preparation and language education Mobile Assisted Language Learning MALL is a term used to describe using handheld computers or cell phones to assist in language learning Some feel however that schools have not caught up with the social networking trends Few traditional educators promote social networking unless they are communicating with their own colleagues DLR Associates consulting group first became interested in e learning modules at the annual Distance Learning Conference held at the University of Maine I decided to offer e learning services since we were already evolved with computer assisted education techniques DLR Associates had been involved with CAE since computers were first used in engineering education It was our hope a trend could be started towards blended learning services where computer based activities were integrated with practical or classroom based situations Dan Ryan Professor Emeritus Clemson University **PC Mag** ,1988-04-26 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **InfoWorld** ,1987-11-23 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **InfoWorld** ,1986-06-30 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects Computerworld ,1989-08-21 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network
