Public Governance and Emerging Technologies Jurgen Goossens, Esther Keymolen, Antonia Stanojević, 2025-03-26 This open access book focuses on public governance's increasing reliance on emerging digital technologies Disruptive or emerging digital technologies such as artificial intelligence and blockchain are often portrayed as highly promising with the potential to transform established societal economic or governmental practices Unsurprisingly public actors are therefore increasingly experimenting with the application of these emerging digital technologies in public governance The first part of the book shows how automatization via algorithmic systems the networked nature of distributed technologies such as blockchain and data driven use of AI in public governance can promote hyper connectivity and hyper complexity This trend and the associated concerns have drawn societal political and scholarly attention to regulatory compliance considering the current and potential future uses of emerging technologies Accordingly the second part of the book focuses on regulatory compliance and regulatory solutions It explores the compatibility of technology with existing regulations existing legal tools that could be innovatively applied for the successful regulation of emerging technologies and approaches to updating existing legislation or creating new legislation for the regulation of emerging technologies While socio ethical considerations on upholding public values in a digital world are at the heart of all chapters the third part specifically focuses on public values and trust It advances a conceptual normative discussion putting the spotlight on trust and other fundamental public values that should be safeguarded The book shows that the success of using emerging technologies in public governance depends to a large extent on the choices made by key stakeholders in public administration legislative and regulatory bodies and tech companies When using and regulating emerging technologies in public governance it is crucial to uphold public values and comply with legislation in a way that prioritizes the citizen's perspective To this end the book offers an interdisciplinary approach based on qualitative and conceptual research

Black and White Oliver Schuchard, 2005 In this magnificent book Oliver Schuchard provides more than sixty five exquisite black and white photographs spanning his thirty eight years of photography In addition he explains the aesthetic rationale and techniques he used in order to produce these photographs emphasizing the profound differences between yet necessary interdependence of craft and content Although Schuchard believes that craft is important he maintains that the idea behind the photograph and the emotional content of the image are equally vital and are in fact functions of one another The author also shares components of his life experience that he believes helped shape his development as an artist and a teacher He chose the splendid photographs included in this book from among nearly 5 000 negatives that had been exposed all over the world from Missouri to Maine California Alaska Colorado France Newfoundland and Hawaii among many other locations Approximately 250 negatives survived the initial review and each of those was printed before a final decision was made on which photographs were to be featured in the book The final choices are representative of Schuchard's work and serve to substantiate his belief that craft concept and self must be fully understood and carefully melded for a good photograph to occur This amazing work by award winning photographer Oliver Schuchard will be treasured by professional and amateur photographers alike as well as by anyone who simply enjoys superb photography *Naval Research Logistics Quarterly*, 1958

Everyday Freedom Philip K. Howard, 2024-01-23 America is in a self reinforcing spiral of decreasing trust confidence and capability Howard shows us how to break out of it short clear passionate Jonathan Haidt New York Times bestselling author of *The Righteous Mind* Something basic is missing in our culture Americans know it Nothing much works as it should Simple daily choices seem impossible or fraught with peril In the workplace we walk on eggshells Big projects say modernizing infrastructure get stalled in years of review Endemic social problems such as homelessness become well more endemic Yet there's a glaring vacuum in the 2024 political debate no party or candidate offers a governing vision that deals with the root causes of alienation and failure *Everyday Freedom* pinpoints the source of powerlessness that is fraying American culture and causing public failure and offers a bold vision of simpler governing frameworks to re empower Americans in their daily choices It diagnoses our collective futility as resulting from the assault on authority after the 1960s that aimed at enhancing freedom instead created a plague of powerlessness The teacher in the classroom the principal in a school the nurse in the hospital the official in Washington the parent on a field trip the head of a local charity or church all have their hands tied Who has a vision to revive hope and action Not political leaders who are picking the scab of resentment while social media gets rich selling distrust Stop the Steal Defund the Police *Everyday Freedom* in the tradition of Thomas Paine's *Common Sense* offers a radical vision for change Re empower Americans in their everyday choices Nothing will work sensibly until Americans are free to draw on their skills intuitions and values when confronting daily challenges This is the only cure to alienation and the only way to deliver good government Embraced by some of America's leading economists jurists social psychologists and philosophers Philip Howard's understanding of the essential role of human agency is the key

to making America a fully functioning democracy again a place where problems can be solved and positive progress can be made *Mathematical Tables and Other Aids to Computation* ,1953 **Technical News Bulletin** ,1965
