there is political tension or war in the Middle East or in Eastern Europe oil and jet fuel prices shoot upward If an airline isn't protected against these higher prices they can devastate its finances and send it quickly into bankruptcy This seemingly happens on a yearly basis Thankfully for most airlines they are able to protect themselves against higher oil and jet fuel prices at least in the short term by hedging using financial instruments The challenge for airlines is to determine which financial instruments they should use in which products they should hedge and how far out from fuel consumption they should hedge This book systematically explores the different financial instruments that airlines have to choose from and in what situations they should be used It will also present the reader with the options airlines have in terms of manipulating operational levers in response to higher fuel prices such as airfares capacity and fleet size once the protective benefits of hedging wear off

Pinnacle Airlines Flight 4712 Bombardier/Canadair Regional Jet CL600-2B19, N8905F, Traverse City, Michigan, April 12, 2007 United States. National Transportation Safety Board, 2008 On April 12 2007 about 0043 eastern daylight time a Bombardier Canadair Regional Jet CRJ CL600 2B19 N8905F operated as Pinnacle Airlines flight 4712 ran off the departure end of runway 28 after landing at Cherry Capital Airport TVC Traverse City Michigan There were no injuries among the 49 passengers including 3 lap held infants and 3 crewmembers and the aircraft was substantially damaged Weather was reported as snowing The airplane was being operated under the provisions of 14 Code of Federal Regulations Part 121 and had departed from Minneapolis St Paul International Wold Chamberlain Airport Minneapolis Minnesota about 2153 central daylight time Instrument meteorological conditions prevailed at the time of the accident flight which operated on an

instrument flight rules flight plan The National Transportation Safety Board NTSB determines that the probable cause of this accident was the pilots decision to land at TVC without performing a landing distance assessment which was required by company policy because of runway contamination initially reported by TVC ground operations personnel and continuing reports of deteriorating weather and runway conditions during the approach This poor decision making likely reflected the effects of fatigue produced by a long demanding duty day and for the captain the duties associated with check airman functions Contributing to the accident were 1 the Federal Aviation Administration pilot flight and duty time regulations that permitted the pilots long demanding duty day and 2 the TVC operations supervisor s use of ambiguous and unspecific radio phraseology in providing runway braking information P ix Jane's All the World's Aircraft ,2009 Popular Aviation ,2005
