*Catalogue of the Cicadoidea (Hemiptera: Auchenorrhyncha)* Allen F. Sanborn, 2013-10-31 This is the third in a series of catalogs and bibliographies of the Cicadoidea covering 1981-2010. The work summarizes the cicada literature providing a means for easy access to information previously published on a particular species or to allow researchers the ability to locate similar work that has been published on other species. A total of 2,591 references are included in the bibliography. The book is a source of biological and systematic information that could be used by zoologists, entomologists, individuals interested in crop protection and students studying entomology as well as anyone interested in cicadas or who require specific information on the insects. Each genus/species is identified with the reference, the page number, any figures if applicable, the topics covered by the reference, any synonymies, and any biogeographic information mentioned for the species in the individual reference. An added benefit to the catalog is that it is the first complete species list for the Cicadoidea including all synonymies and new combinations through 2012. Provides nearly four times the number of references of the previous catalog demonstrating the explosion of data since that time. Contains all references found that mention a genus or species name in the work. Includes more than 300 additional references that were not in the two previous works on this subject. Features the first complete species list for the Cicadoidea including all synonymies.

might face at the present time      *Guide to Reference and Information Sources in the Zoological Sciences* Diane Schmidt, 2003-11-30 Animals have been studied for centuries But what are the most important and relevant reference and information sources in the zoological sciences This work is a comprehensive thoroughly annotated directory filled with hundreds of esteemed resources published in the field of zoology including indexes abstracts bibliographies journals biographies and histories dictionaries and encyclopedias textbooks checklists and classification schemes handbooks and field guides associations and Web sites A complete revision of the award winning Guide to the Zoological Literature The Animal Kingdom 1994 this new title includes extensive up to date coverage of invertebrates arthropods vertebrates fishes amphibians and reptiles birds and mammals In addition the work features a detailed introduction by the author as well as thorough subject title and author indexes Students and researchers can now quickly and easily pinpoint works in their field of study The book is of equal importance to LIS students specializing in science or biology librarianship as it provides a comprehensive straight forward overview of zoological information sources An essential addition to the core reference collection of public and academic libraries      **DNA Technology (Custom Published)** J.
